1 Introduction

Tabsan EduSphere is a web-based campus management portal for universities, colleges and schools. It brings the everyday work of an institution into one secure place: departments, programs, courses, enrolments, timetables, attendance, assessments, results, graduation, certificates, fee receipts, reports and support tickets.

Everyone uses the same portal. What each person sees depends on their role: an administrator sees setup and management pages, a teacher sees their classes, a student sees their own records, and the finance office sees fee receipts.

This manual explains every screen in the portal step by step, with screenshots taken from a running installation. You do not need to read it from start to finish. Use the Contents page or the Index at the back to jump to the task you need.

1.1 Who should read this manual

The manual is written for everyone who signs in to the portal. Each section begins with an "Available to" line, so you can quickly see whether it applies to you.

- **SuperAdmin** – the platform owner. Manages the product license, tenants and campuses, which modules are switched on, which menus each role sees, portal branding, the institution policy and the Admin accounts.
- **Admin** – institution administrators. Set up departments, programs, courses, students and timetables, and manage results, graduation, certificates, user accounts, fee receipts and reports for their departments.
- **Faculty** – teachers. Work with their own classes: timetable, assignments, attendance, marks, gradebook, rubrics, quizzes, online course content, final year project supervision and announcements.
- **Student** – learners. View their timetable, assignments, quizzes, course material, attendance and results, check their degree progress and apply for graduation.
- **Finance** – finance office staff. Issue and confirm fee receipts and run the payment report.

1.2 How this manual is organised

Chapters follow the order in which an institution normally works: first the concepts and sign-in, then academic setup, then teaching and assessment, then progression and graduation, and finally reports, finance, accounts and SuperAdmin administration.

- Chapter 2 explains the terms used throughout the portal. Read it once if you are new.
- Chapter 3 covers signing in, finding your way around and signing out.
- Chapter 4 is a quick start for each role: the handful of pages you will use most.
- Chapters 5 to 13 describe each screen in detail: what it is for, what you need before you start, the steps, the fields, what happens afterwards and useful tips.

© 2026 Tabsan Nexora. All rights reserved.

- Chapter 14 answers common questions. Appendix A shows which menus each role can see, and Appendix B is a glossary.

1.3 User roles at a glance

Each user account has exactly one role. The role decides which menus appear in the sidebar and which actions the portal allows. If you need something your role cannot do, ask an Admin or SuperAdmin; they can either do it for you or, where appropriate, change your access.

Role	Scope	Typical work
SuperAdmin	Whole installation, all tenants	License, tenants and campuses, module composition, sidebar visibility, branding, institution policy, Admin accounts, audit logs
Admin	One tenant; only the departments assigned to them	Departments, programs, courses, enrolments, students, timetables, attendance, results, graduation, certificates, user import, payments, reports
Faculty	The departments and classes they teach	Teacher timetable, assignments, attendance, results, gradebook, rubrics, quizzes, LMS, course material, FYP, announcements
Student	Their own records	Timetable, assignments, quizzes, course material, attendance, results, degree audit, graduation application
Finance	Fee receipts	Payments, payment summary report, analytics

1.4 Accounts used in this manual

The screenshots were captured with the demonstration accounts below. All demo accounts use the password EduSphere147. These accounts exist only in the demonstration data; change or remove them before the portal is used with real students.

Username	Role	Notes
superadmin	SuperAdmin	Full platform access, including license and tenant management.
testadmin	Admin	Testing account with every right except SuperAdmin. Works in the University tenant and is assigned to all of its departments. Created by Scripts/08-Create-Test-Admin-User.sql.
faculty.it1	Faculty	A teacher in the Information Technology department.
bscs8s1	Student	A Computer Science student in semester 8.
finance1	Finance	A finance officer.
admin.sch / admin.col / admin.uni	Admin	The School, College and University administrators. Each sees only its own institute's departments, so no Institute filter is shown to them.
faculty.sch3 / faculty.col3 / faculty.eco1	Faculty	Teachers in the School Arts & Humanities, College Pre-Medical and University Economics departments.

© 2026 Tabsan Nexora. All rights reserved.

> **NOTE** Every account other than SuperAdmin belongs to one tenant (for example University, College or School). Only SuperAdmin can see data across tenants.

1.5 Conventions used in this manual

- Menu names, buttons and field labels are shown in **bold**, for example **Departments** > **Add Department**.
- Numbered lists are procedures: follow the steps in order.
- "Fields and options" tables explain each box or list on a form.
- "What happens next" explains the result of an action, and "Good to know" lists tips and limits.
- NOTE boxes add context, TIP boxes suggest a faster way, and IMPORTANT boxes warn about actions that change data or access.
- Fields marked with a red asterisk (*) in the portal are required; the portal will not save the form until they are filled in.

© 2026 Tabsan Nexora. All rights reserved.

2 Key Concepts

The portal uses a few terms consistently on every page. Understanding them makes the filters and forms much easier to follow.

2.1 How the academic structure fits together

Information in the portal is organised from the broadest level to the most specific. Most pages ask you to choose these levels in order, from left to right, before they show any data. Each choice narrows the next list.

Level	What it means	Example
Tenant	A separate institution in the installation, with its own users and data.	University, College, School
Campus	A physical site of a tenant.	UNI-1 (main campus)
Department	An academic unit. Belongs to one institution type.	Information Technology
Program	A degree or course of study offered by a department.	BS Computer Science
Semester / Class	A level within a program: semesters for University, classes for School and College.	Semester 4, Class 11
Course (subject)	A subject with a code, title and credit hours.	CS101 Introduction to Programming
Offering	A course taught in a particular semester or class, usually by one teacher. Students enrol in offerings.	CS101, BSCS Semester 1

Good to know

- If a list looks empty, check the filters at the top of the page first. Most pages show nothing until a department and an offering are chosen.
- Admins only see the departments assigned to them. Faculty only see the departments and classes they teach.

2.2 Institution types

Each department belongs to one institution type, and the type changes how progression and results work.

Type	Levels	Results	Demo departments
University	Semesters 1 to 8 (depending on the program); final year project in the last semester	Grades and GPA / CGPA	Information Technology, Business Administration, Economics, Spanish Language
College	Class 11 and Class 12	Percentage based	Information Technology, Pre-Medical, Pre-Engineering, Commerce (College)
School	Class 1 to Class 10	Percentage based	Science Department, Arts & Humanities, Commerce (Class 9-10)

© 2026 Tabsan Nexora. All rights reserved.

> **NOTE** Degree audit, degree rules, graduation applications, FYP and the GPA & CGPA report apply to University departments only.

2.3 Statuses you will see

Many lists show a coloured status badge. The most common ones are:

- **Active / Inactive** – inactive records are kept for history but no longer used. Most lists hide them unless you tick a "Show inactive" option.
- **Published** – results and assignments become visible to students only once published.
- **Pending / Approved / Rejected** – used for requests that need someone else to act, such as graduation applications, study plans and result changes.

2.4 Security and your session

- Your session ends automatically after a period of inactivity set by your administrator. Sign in again to continue; unsaved changes on the open page are lost.
- Passwords must be at least 8 characters and different from your previous password. Passwords expire after 90 days by default, and the portal asks you to choose a new one.
- New accounts start with a temporary password (the username) and must choose a new password at first sign-in.
- Two-factor authentication adds a 6-digit code from an authenticator app to sign-in (see Two-Factor Authentication).
- Every sign-in and every important change is recorded in the audit log.

© 2026 Tabsan Nexora. All rights reserved.

3 Getting Started

This chapter covers signing in, finding your way around the portal, and signing out.

3.1 Opening the portal and signing in

Open the portal address supplied by your administrator in a current browser such as Microsoft Edge, Google Chrome, Mozilla Firefox or Safari. The portal works on desktop computers, tablets and phones.

Before you start

- You need a username and password from your administrator. Students and staff usually receive them by email.
- If two-factor authentication is switched on for your account, have your authenticator app ready.

Procedure

1. Open the portal address. The **Sign in to your account** page appears.
2. Enter your **Username** and **Password**. Click the eye icon to show or hide the password while you type.
3. Click **Sign In**.
4. If two-factor authentication is enabled on your account, enter the 6-digit code from your authenticator app when prompted.
5. If this is your first sign-in, or your password has expired, the portal asks you to choose a new password before continuing.
6. The portal opens. SuperAdmin users land on the Dashboard; all other users land on the Helpdesk ticket queue, and the sidebar shows their menus.

© 2026 Tabsan Nexora. All rights reserved.

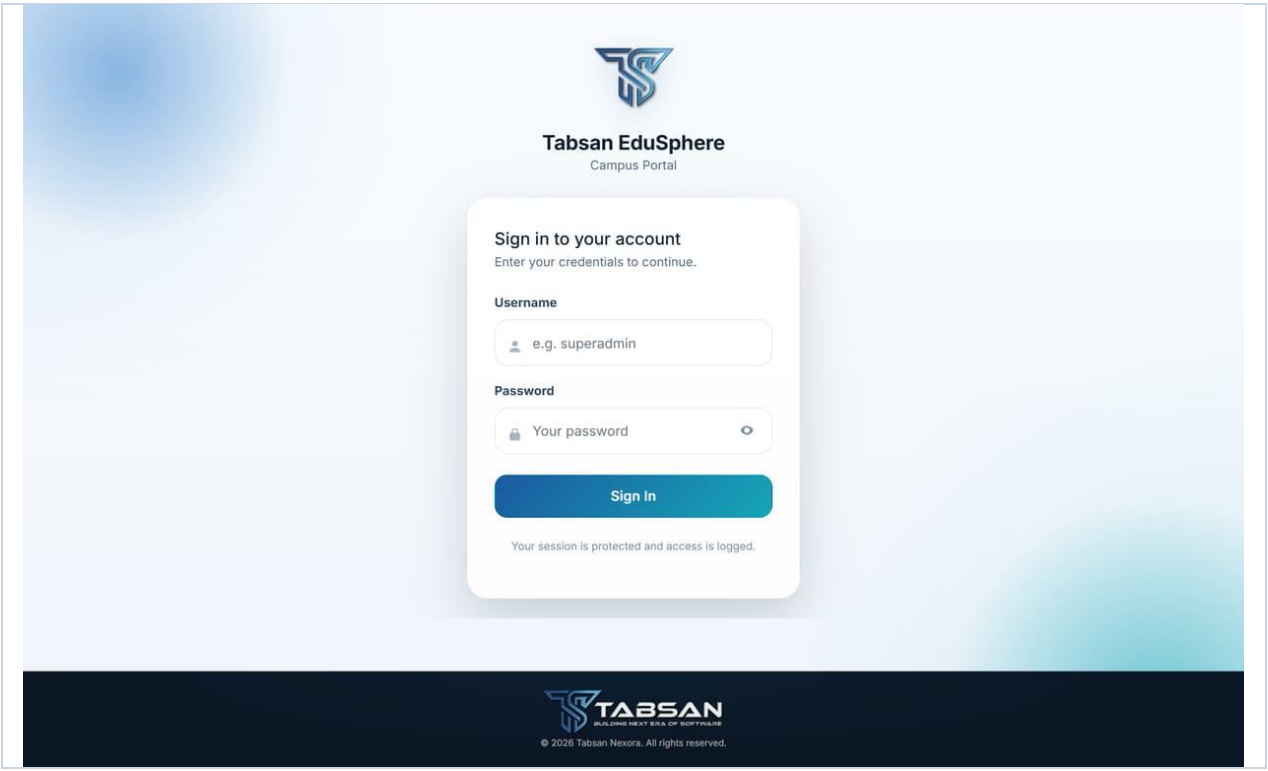

Figure 3.1 *The sign-in page*

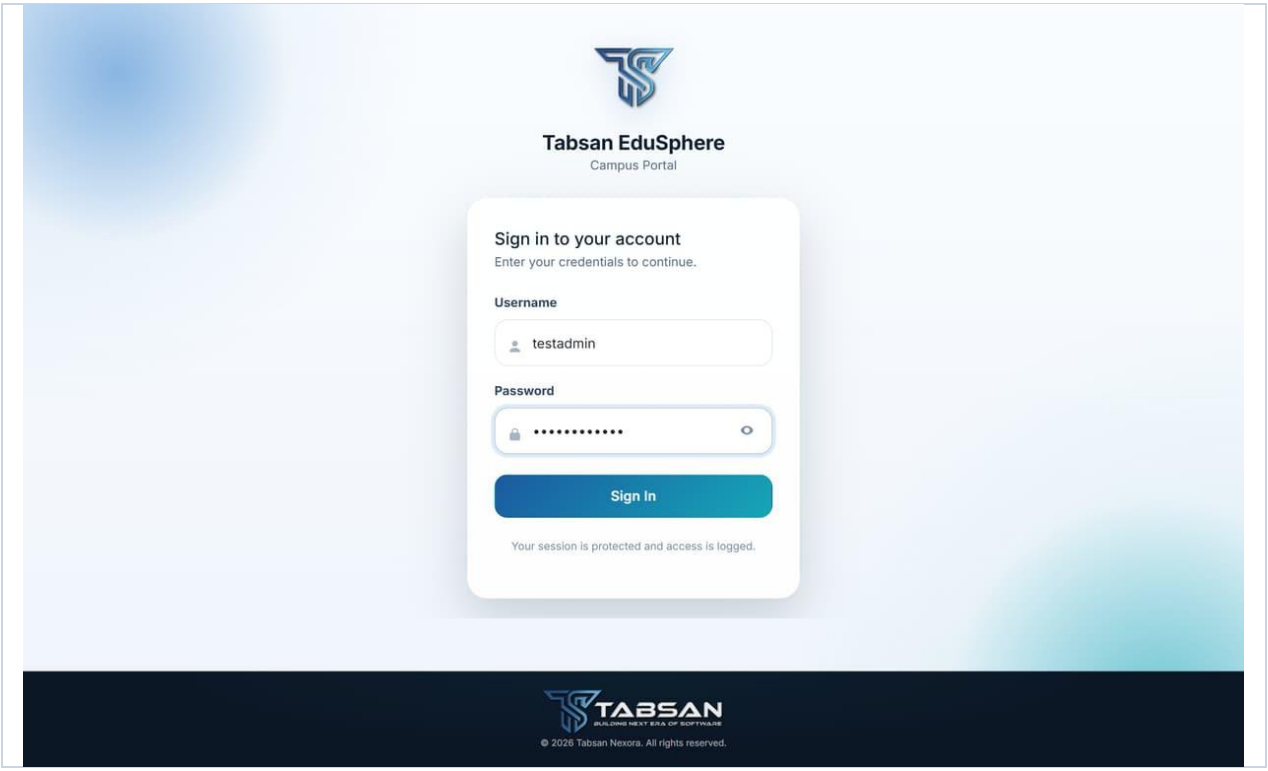

Figure 3.2 *Sign-in page with credentials entered*

© 2026 Tabsan Nexora. All rights reserved.

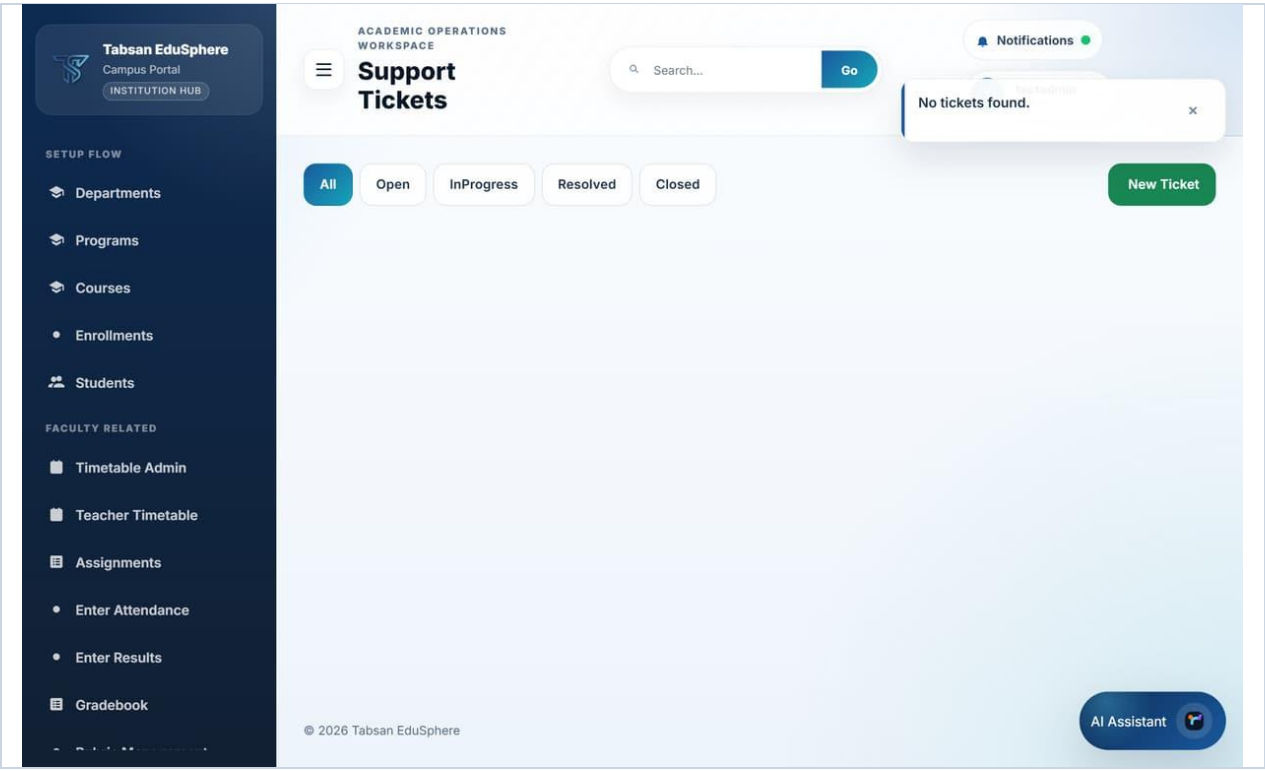

Figure 3.3 *Landing page after signing in (Admin)*

Good to know

- After several failed attempts the account may be blocked for security reasons. Ask your administrator to check the account rather than trying repeatedly.
- Do not let your browser save your password on a shared or public computer.

3.2 The portal layout

Every page shares the same layout, so once you know one page you know them all.

- **Sidebar** (left) – the menus your role can use, grouped into sections: Overview, Setup Flow, Faculty Related, Student Related, Academic Related, Settings Related and Financial Related. The highlighted item is the current page. Click the menu button (three lines) to collapse the sidebar to icons and give the page more room.
- **Page header** – the page title and the workspace name.
- **Search** – type part of a page or feature name, such as "attendance", and click **Go** to jump straight to it.
- **Notifications** – opens your notification inbox. A green dot means you have unread notifications.
- **Profile chip** (top right) – shows your username and role; click it to open the profile menu.
- **AI Assistant** (bottom right) – a chat assistant that answers questions about using the portal, when the AI module is switched on.
- **Messages** – after you save something, a short message appears at the top right confirming success or explaining a problem. It closes by itself, or click × to close it.

© 2026 Tabsan Nexora. All rights reserved.

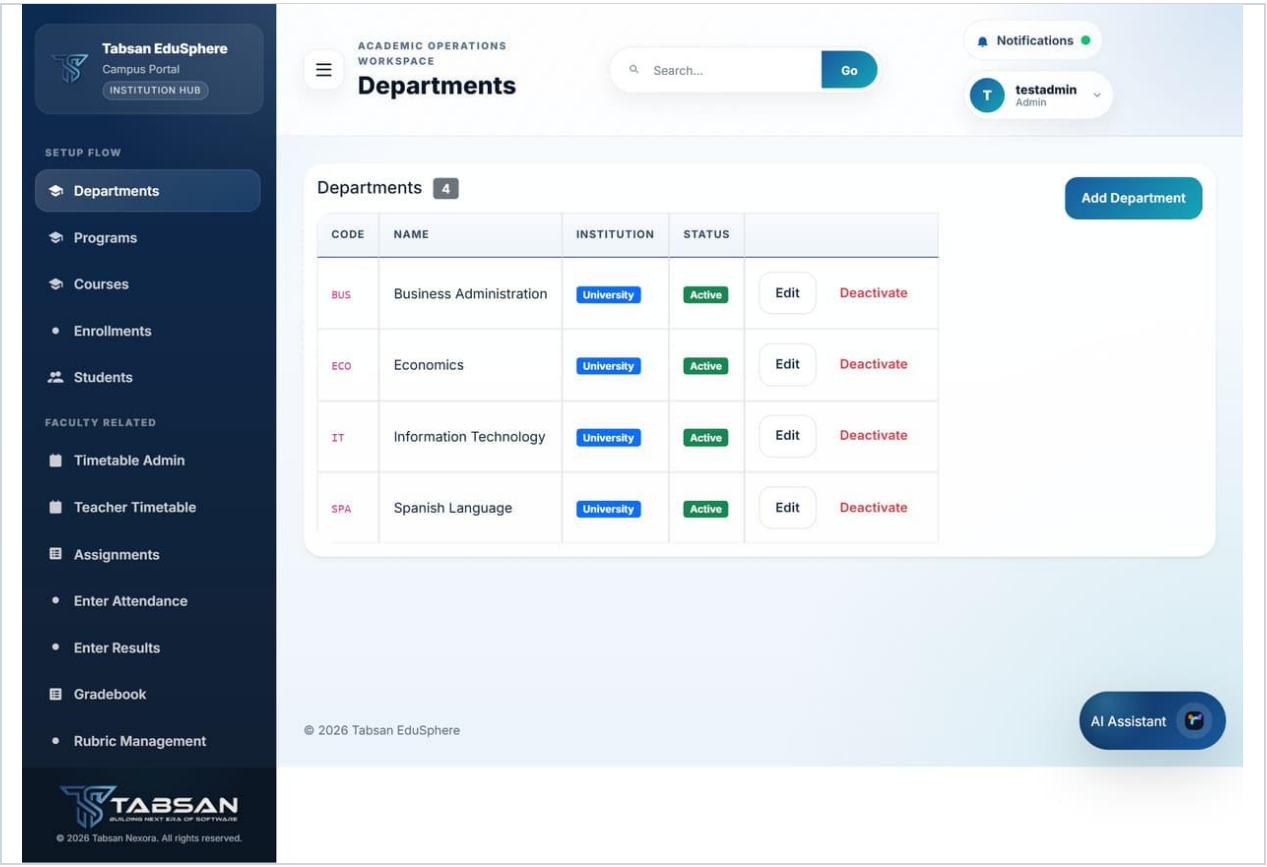

Figure 3.4 *Portal layout: sidebar, header, search, notifications and profile*

3.3 Using filters and lists

Most pages start with a row of filters, such as Institute, Campus, Department, Course and Offering. Choose them from left to right; each choice refreshes the next list and the data below.

The **Institute** filter (University, School or College) appears for users who can see more than one type of institution, such as SuperAdmin. Choosing an institute limits every list and drop-down on the page to it: only that institute's departments, programs, courses, classes or semesters and students are offered. Switching institute clears the department, course and other choices made for the previous one. Users who belong to a single institute do not see this filter; they only ever see their own institute's data.

Tables can be long. Use the browser's find feature (Ctrl+F, or Cmd+F on a Mac) to locate a name quickly, or narrow the filters.

© 2026 Tabsan Nexora. All rights reserved.

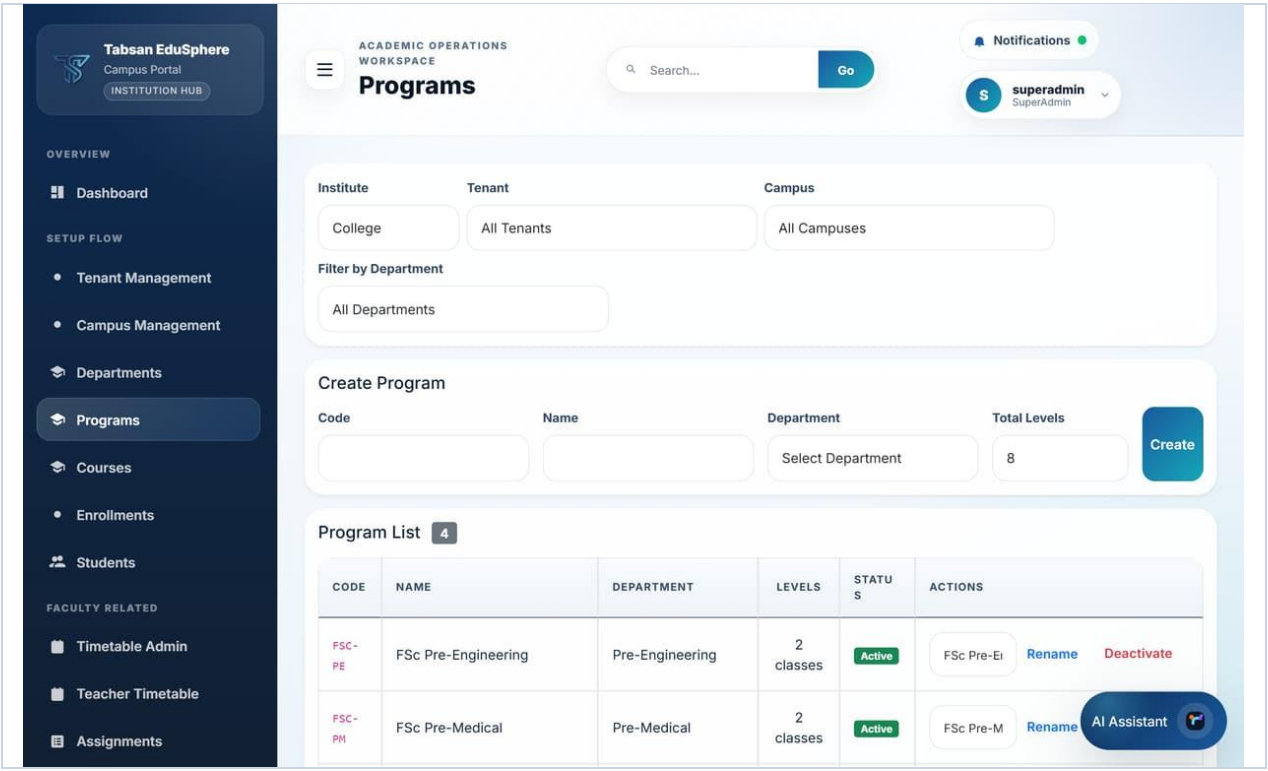

Figure 3.5 *Programs with the Institute filter set to College*

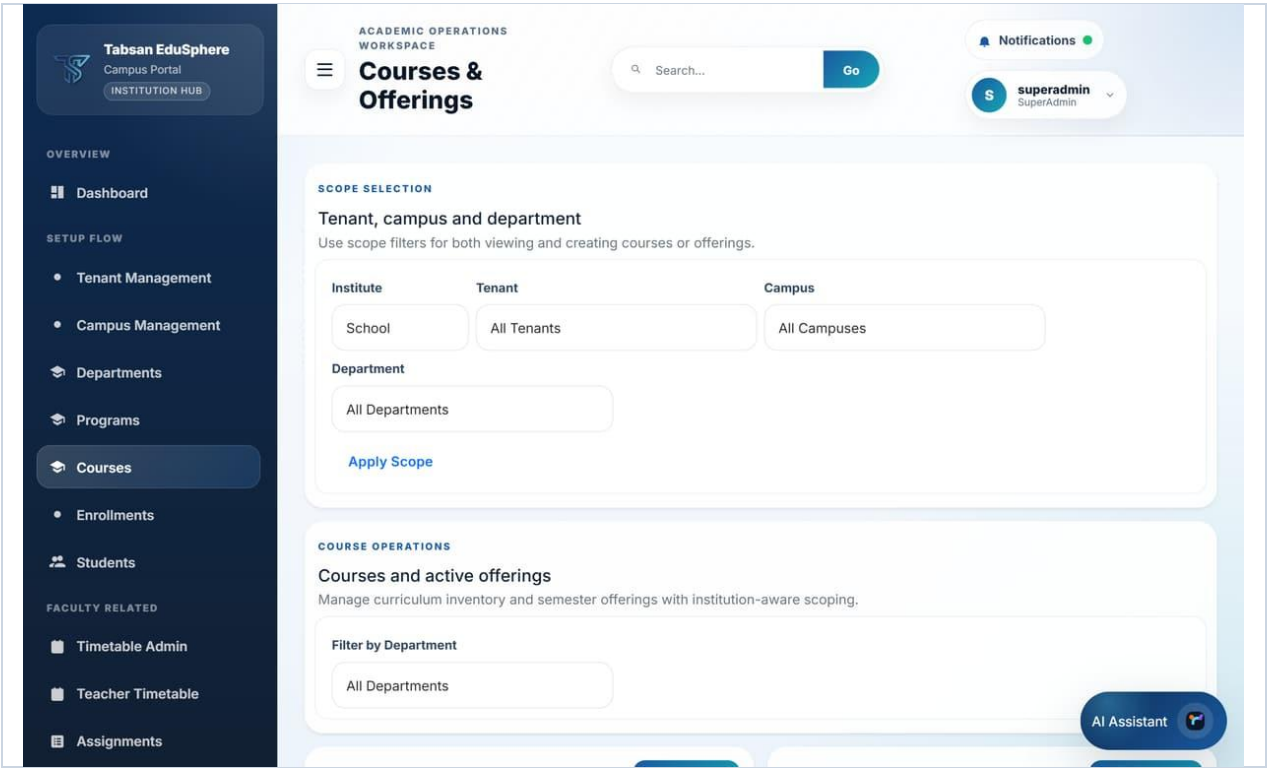

Figure 3.6 *Courses with the Institute filter set to School*

Good to know

- Your last choices are kept in the address bar, so you can bookmark a filtered page or send the link to a colleague with the same access.
- Buttons that change data, such as Deactivate or Delete, ask you to confirm first.

© 2026 Tabsan Nexora. All rights reserved.

3.4 Profile menu and signing out

Procedure

1. Click your name in the top-right corner.
2. Choose **View Notifications**, **User Settings** or **Two-Factor Authentication** to open those pages.
3. Click **Sign Out** to end your session.

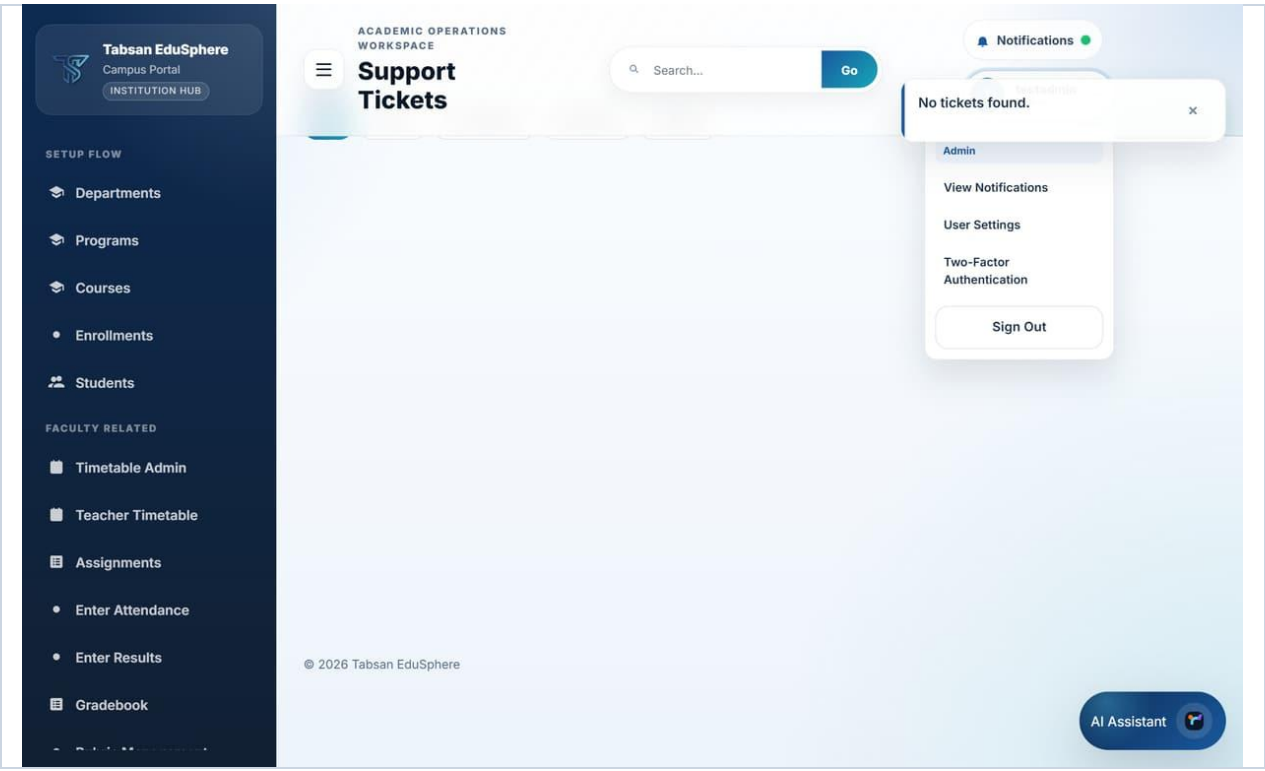

Figure 3.7 *The profile menu*

> **IMPORTANT** Always sign out on a shared computer. Closing the browser tab alone may leave your session open until it times out.

3.5 Access messages and read-only mode

If you open a page your role cannot use (for example from an old bookmark), the portal returns you to your landing page with a short message explaining why. Nothing is changed. Ask your administrator if you believe you need access.

> **IMPORTANT** If the product license is missing, expired or invalid, the portal switches to read-only mode: you can still view information, but saving, creating and deleting are blocked until a SuperAdmin uploads a valid license (see License Update).

© 2026 Tabsan Nexora. All rights reserved.

4 Quick Start by Role

This chapter lists the pages each role uses most, in the order they are usually needed. Each item points to the chapter that explains it in detail.

4.1 Admin: setting up a new term

Available to: Admin, SuperAdmin

Follow this order when preparing a new semester or school year. Each step depends on the one before it.

Procedure

1. Check that your **Departments** and **Programs** exist (Chapter 5).
2. Add any new **Courses**, then create an **offering** for each course you will teach this term and choose the teacher (Chapter 5).
3. Create **Buildings** and **Rooms** if they are new, then build the class **timetables** in Timetable Admin (Chapter 6).
4. Create accounts for new students and staff in **User Import** (Chapter 12).
5. Enrol students in **Enrollments** (Chapter 5): choose the department and class or semester, tick the courses and students, and enroll them all at once.
6. Check **Result Calculation** and **Grading Config** so marks become grades correctly (Chapter 8).
7. At the end of the term, publish results, then promote students in **Student Lifecycle** (Chapter 8).

4.2 Faculty: a typical week

Available to: Faculty

- Check your classes in **Teacher Timetable** (Chapter 6).
- Take attendance after each class in **Enter Attendance** (Chapter 7).
- Post notices in **Announcements** and upload notes in **Course Material** or **LMS Manage** (Chapter 7).
- Create and grade **Assignments** and **Quizzes** (Chapter 7).
- Enter marks in **Enter Results** and review them in the **Gradebook** (Chapter 7).
- Answer questions in **Discussion** and, for final-year students, supervise projects in **FYP** (Chapters 7 and 8).

4.3 Student: finding your information

Available to: Student

- **Student Timetable** – when and where your classes are (Chapter 6).
- **Assignments** and **View Quizzes** – what is due and how to submit (Chapter 7).

© 2026 Tabsan Nexora. All rights reserved.

- **Course Material** and **Announcements** – notes, files and notices from your teachers (Chapter 7).
- **Attendance** – your attendance percentage for each course (Chapter 7).
- **Results** – your published marks and grades; request a re-check if needed (Chapter 8).
- **Degree Audit** and **Graduation Apply** – your progress towards your degree (Chapter 9).
- **Helpdesk** – ask for help from the institution (Chapter 12).

4.4 Finance: managing fees

Available to: Finance

- Create a fee receipt for each student in **Payments**, or import many at once from a CSV file (Chapter 11).
- Confirm receipts when payment arrives, and cancel any issued in error (Chapter 11).
- Run **Report Center** > **Payment Summary** for totals by status (Chapter 10).

© 2026 Tabsan Nexora. All rights reserved.

5 Academic Setup

Academic setup follows the order shown in the Setup Flow menu: departments first, then programs, then courses and their offerings, and finally enrolments. Each level depends on the one before it: a program needs a department, an offering needs a course, and an enrolment needs an offering.

Students are created in User Import (Chapter 12) and then appear in the Students list.

5.1 Departments

Available to: SuperAdmin, Admin

Departments are the top level of the academic structure, such as Information Technology or Business Administration. Every program, course, teacher and student belongs to a department, and Admins manage only the departments assigned to them.

The list shows each department's code, name, institution type and status.

Procedure

1. Open **Departments** from the Setup Flow menu.
2. Click **Add Department**. A form opens on top of the page.
3. Enter the **Department Code** and **Department Name**, and choose the **Institution Type**.
4. Click **Create**. A confirmation message appears and the department is added to the list.
5. To rename a department later, click **Edit**, change the name and save.
6. To stop using a department without losing its history, click **Deactivate** and confirm. Click **Activate** to bring it back.

Fields and options

Field	What to enter or choose
Department Code	A short, unique code, for example CS or BUS. It appears in lists and reports and cannot be reused within the same campus.
Department Name	The full name, for example Computer Science.
Institution Type	University, College or School. It decides how levels and results work for everything in the department and cannot be changed later.

© 2026 Tabsan Nexora. All rights reserved.

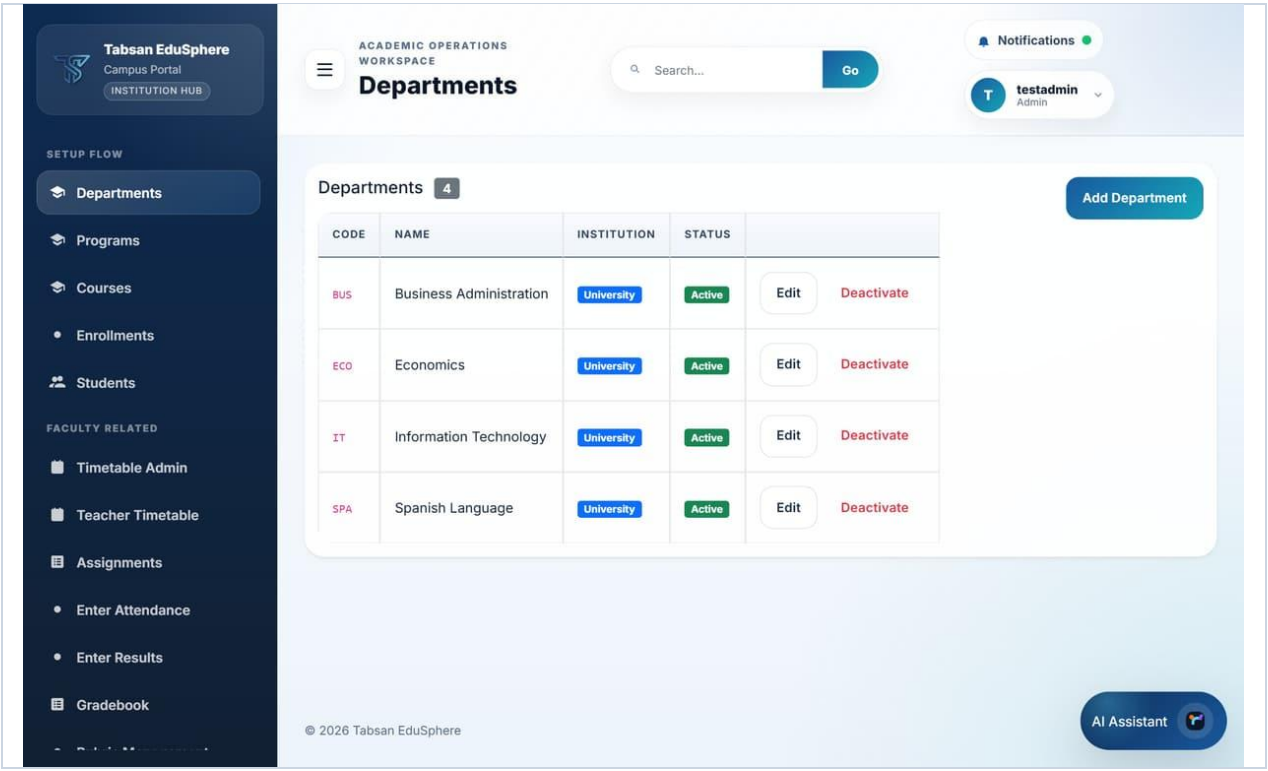

Figure 5.1 *Departments list*

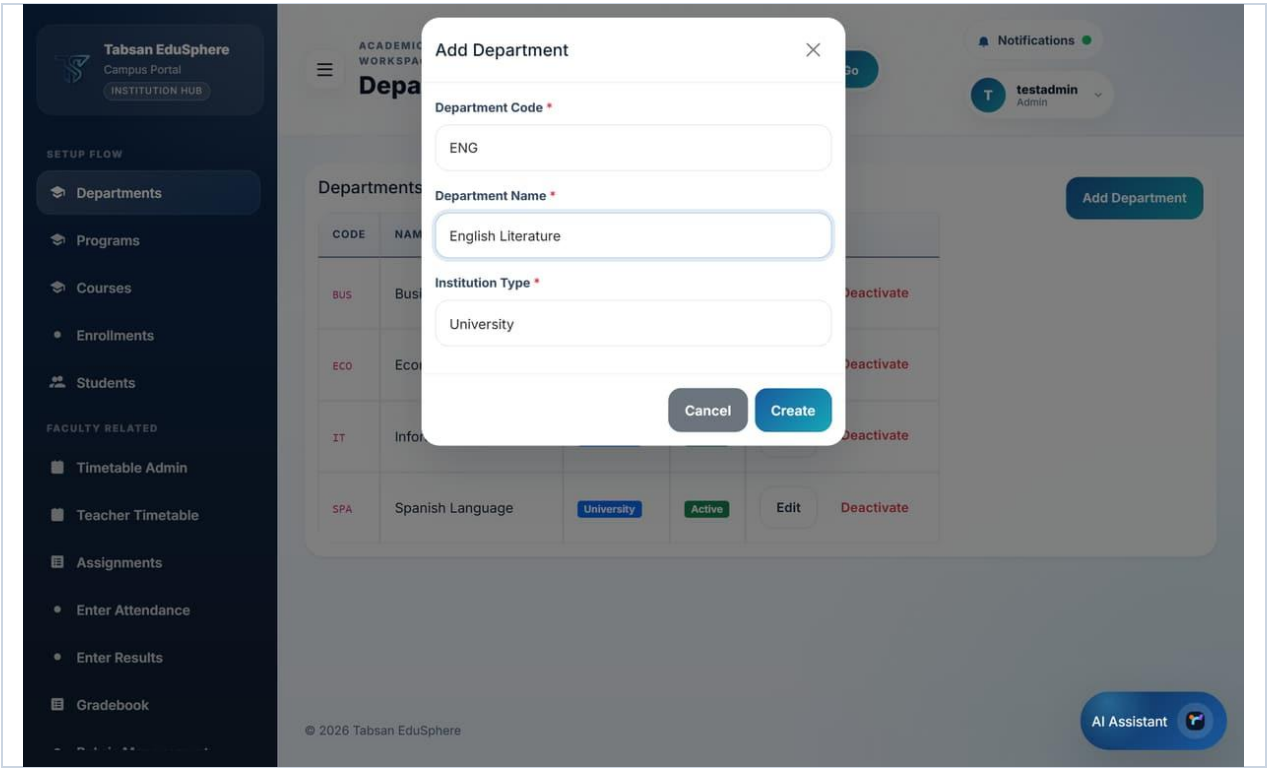

Figure 5.2 *Add Department form completed*

What happens next

The new department is immediately available in the Department filters across the portal. If you are an Admin, it is assigned to you automatically so you can manage it straight away.

© 2026 Tabsan Nexora. All rights reserved.

> **NOTE** SuperAdmin also sees tenant and campus filters and the Admin Department Assignments panel, which controls which Admin users manage each department.

5.2 Programs

Available to: SuperAdmin, Admin, Faculty (view)

A program is a degree or course of study offered by a department, for example Bachelor of Science in Computer Science. Students are admitted to a program, and the program decides how many levels (semesters or classes) they study.

Before you start

- The department the program belongs to must already exist.

Procedure

1. Open **Programs**.
2. In **Create Program**, enter the **Code** and **Name**, choose the **Department**, and set **Total Levels**.
3. Click **Create**. The program appears in the Program List.
4. Use **Filter by Department** to narrow the list. Use **Rename** to correct a name and **Deactivate** to retire a program.

Fields and options

Field	What to enter or choose
Code	A short code, for example BSCS.
Name	The full program name as it should appear on certificates and transcripts.
Department	The department that runs the program.
Total Levels	The number of semesters (University) or classes (School and College). Students graduate after completing the last level.

© 2026 Tabsan Nexora. All rights reserved.

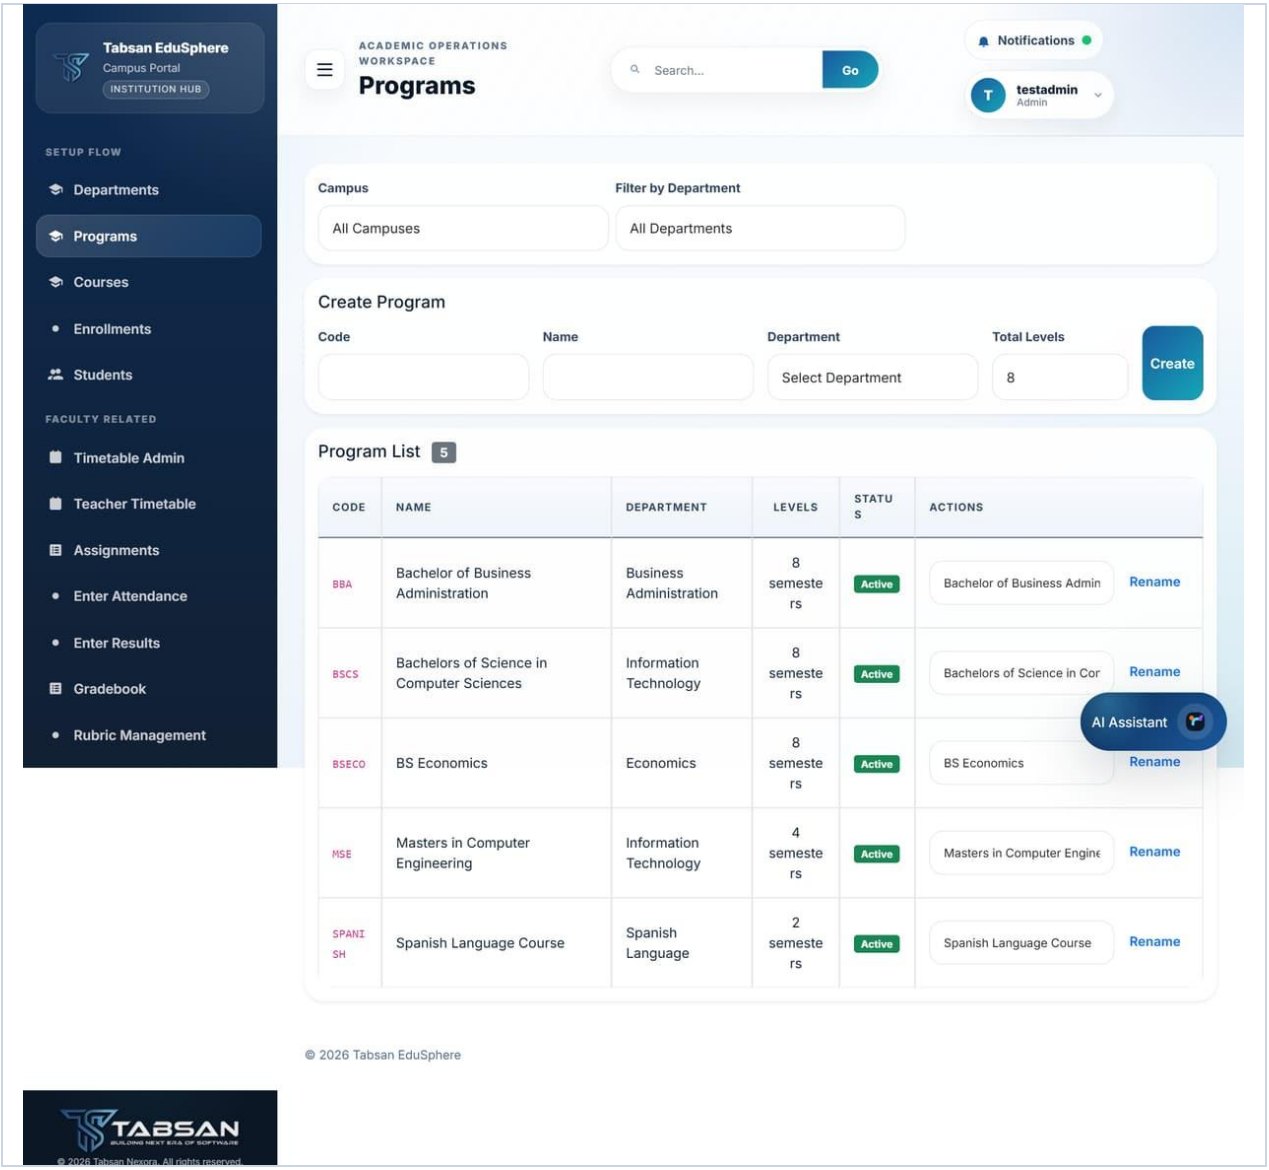

Figure 5.3 *Programs page*

Good to know

- A University program usually needs a degree rule before students can be audited for graduation (see Degree Rules).

5.3 Courses and offerings

Available to: SuperAdmin, Admin, Faculty (view)

A course is a subject, such as CS101 Introduction to Programming, with its credit hours and grading type. An offering is that course being taught in a particular semester or class, usually by one teacher. Students enrol in offerings, attendance is taken per offering, and marks are entered per offering.

The page has two parts: the course catalogue on the left and the active offerings on the right.

Before you start

- The department exists, and for offerings the teacher has a Faculty account.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Courses**, choose the **Department** in the scope filter and click **Apply Scope**.
2. To add a course, click **Add Course**, complete the form and save.
3. To teach a course this term, create an offering: choose the **Course**, optionally the **Faculty** member and the **Max Enrollment**, and save.
4. When teaching finishes, switch the offering **Off** so it no longer accepts enrolments.

Fields and options

Field	What to enter or choose
Course Code / Course Title	The subject code and full title, for example CS101 / Introduction to Programming.
Credit Hours	The credit value used for GPA and degree audits.
Grading Type	How the course is graded (for example by marks and grades).
This course is semester-based	Tick for normal semester courses. Untick for courses that run over several semesters, then set the Number of Semesters or a Duration.
Faculty (offering)	The teacher responsible for the offering. They will see it in their classes. Optional; it can be added later.
Max Enrollment (offering)	The largest number of students who can enrol. Further students are placed on a waiting list.

© 2026 Tabsan Nexora. All rights reserved.

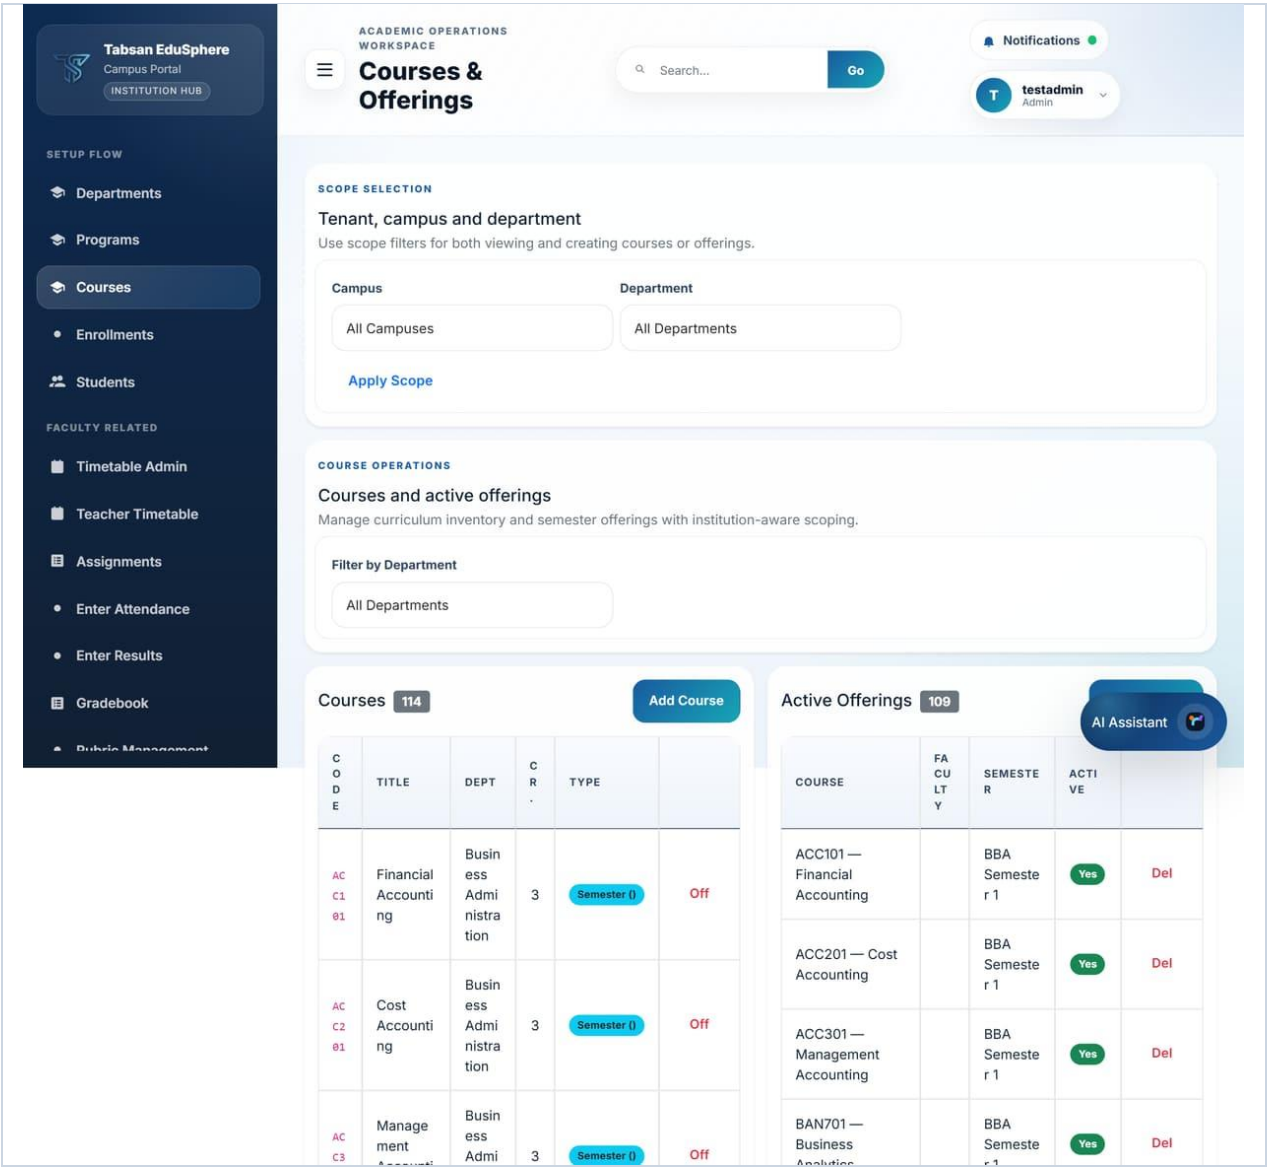

Figure 5.4 *Courses and active offerings*

Good to know

- Mark a course as core or elective where the option is shown; degree audits count core and elective credits separately.

5.4 Enrollments

Available to: SuperAdmin, Admin, Faculty (own courses)

Enrollments connect students to the course offerings they are taking. A student must be enrolled in an offering to appear in its attendance sheet, mark sheet and gradebook.

Staff enroll students in bulk: choose a department and a class or semester, tick the courses, tick the students, and enroll them all with one click. Each student is shown with their roll number and name, so you always know who you are selecting. Admins can manage every course in their departments; teachers can manage the courses they teach.

© 2026 Tabsan Nexora. All rights reserved.

Before you start

- The course offerings exist for the class or semester (see Courses) and are open for enrollment.
- The students have student profiles (created in User Import) in the department.

Procedure

1. Open **Enrollments**. SuperAdmin users can first choose an **Institute**.
2. Choose the **Department** and then the **Class** (School and College) or **Semester** (University). The list shows how many courses each class or semester has.
3. Under **1. Courses**, tick the courses to enroll the students in. All open courses are ticked to start with. Each row shows the teacher, the seats used (for example 20 / 40), any waitlist, and whether the course is Open, Closed or Full.
4. Under **2. Students**, the students of that department who are currently in that class or semester are listed with their **Roll No.**, **Name**, **Program** and level. Use **Search** (roll number or name) and **Program** to narrow the list, or **Show all department students** to include other levels. Students already in every ticked course are hidden.
5. Tick the students, or click **Select all shown**. The bar at the bottom counts your selection, for example "5 students × 4 courses selected".
6. Click **Enroll N students in M courses**. A summary shows how many were enrolled, waitlisted, already enrolled or not enrolled, with the reason for each student who could not be enrolled.
7. To see who is in a course, click **Roster** next to it. Tick students and click **Drop selected** to remove them, or **Download CSV** to save the list.

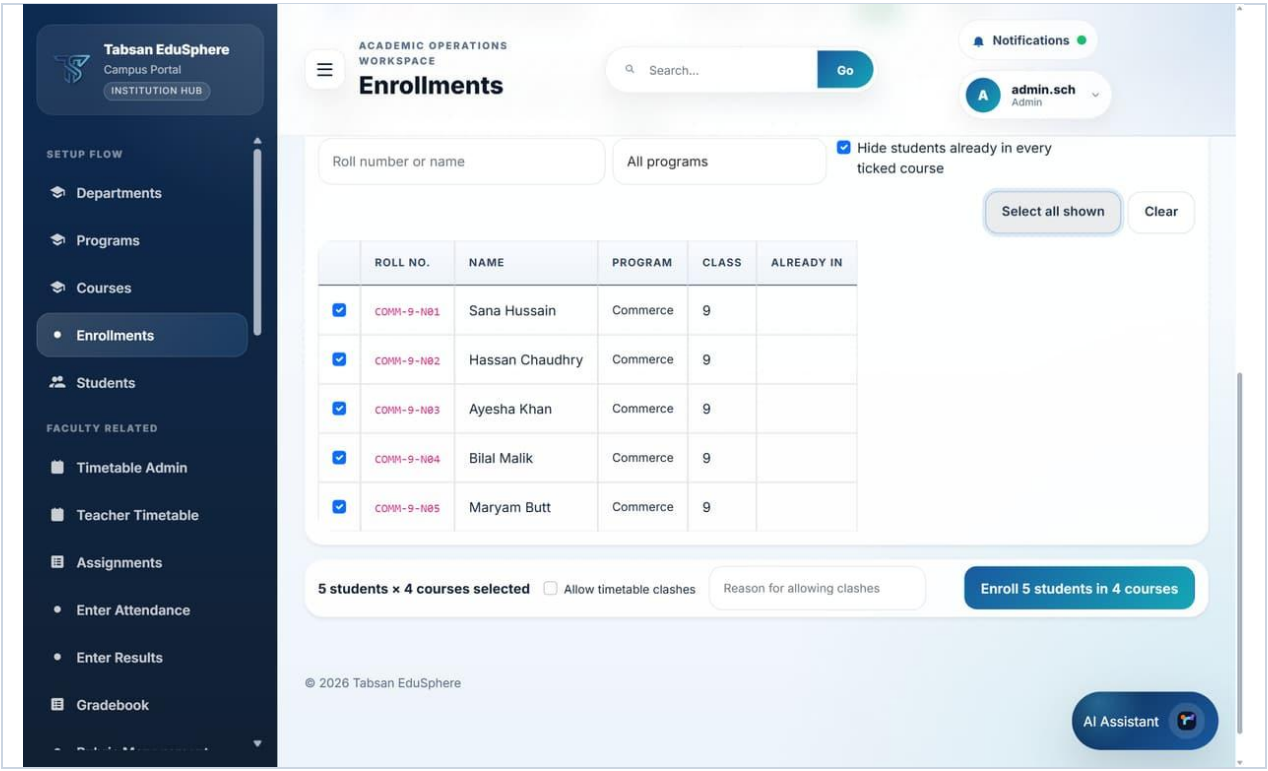

Figure 5.5 *Students of Commerce, Class 9 selected for enrollment in 4 courses*

© 2026 Tabsan Nexora. All rights reserved.

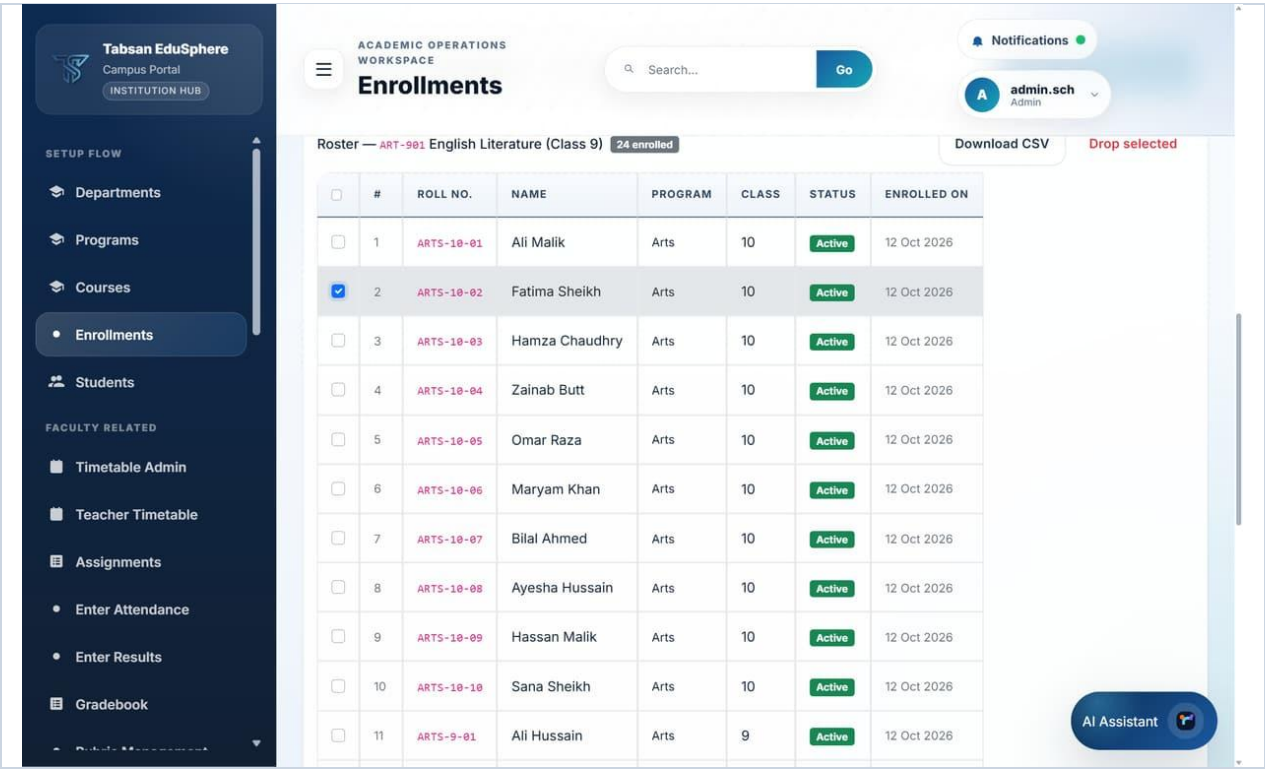

Figure 5.6 *Course roster with roll numbers, names and Drop selected*

What happens next

Enrolled students immediately appear in the course's attendance sheet, mark sheet and gradebook, and in their own My Enrolled Courses list. When a course is full, extra students are placed on its waitlist and move in automatically when a seat frees up.

Why a student may not be enrolled

Reason shown	What to do
Unmet prerequisites	The student has not passed the course listed in brackets. Enroll them in that course first (see Prerequisites).
Timetable clash detected	The course meets at the same time as another of the student's courses. Admins can tick **Allow timetable clashes** and give a reason.
Enrollment is closed for this offering	The course is closed. Admins can click **Open** next to it.
Semester is closed	The class or semester has been closed and cannot take new students.
Student belongs to a different institute	School, College and University students can only join their own institute's courses.
Already enrolled in this offering	Nothing to do: the student is already in the course.

Enrollment statuses

Status	Meaning
Active	The student is taking the offering.
Waitlisted	The offering was full; the student moves in automatically when a place becomes free.

© 2026 Tabsan Nexora. All rights reserved.

Status	Meaning
Dropped	The student left the offering. History is kept.
Cancelled	The enrollment (or waitlist place) was cancelled by the institution.

Good to know

- Admins can stop all enrollment changes for a campus with **Deactivate Enrollment**, and turn it back on the same way.
- Students can also enroll themselves in open courses from their own Enrollments page.

> **NOTE** Courses with prerequisites can only be enrolled in once the student has passed the prerequisite course (see Prerequisites).

5.5 Students

Available to: SuperAdmin, Admin, Faculty

The Students page is a searchable directory of student profiles. Each row shows the registration number, full name, department, program, current level and status.

Faculty see the students of the departments they teach; Admins see the students of their assigned departments.

Procedure

1. Open **Students**.
2. Choose a **Department** to filter the list.
3. Scan or search the list. The number beside Student List shows how many students match.

© 2026 Tabsan Nexora. All rights reserved.

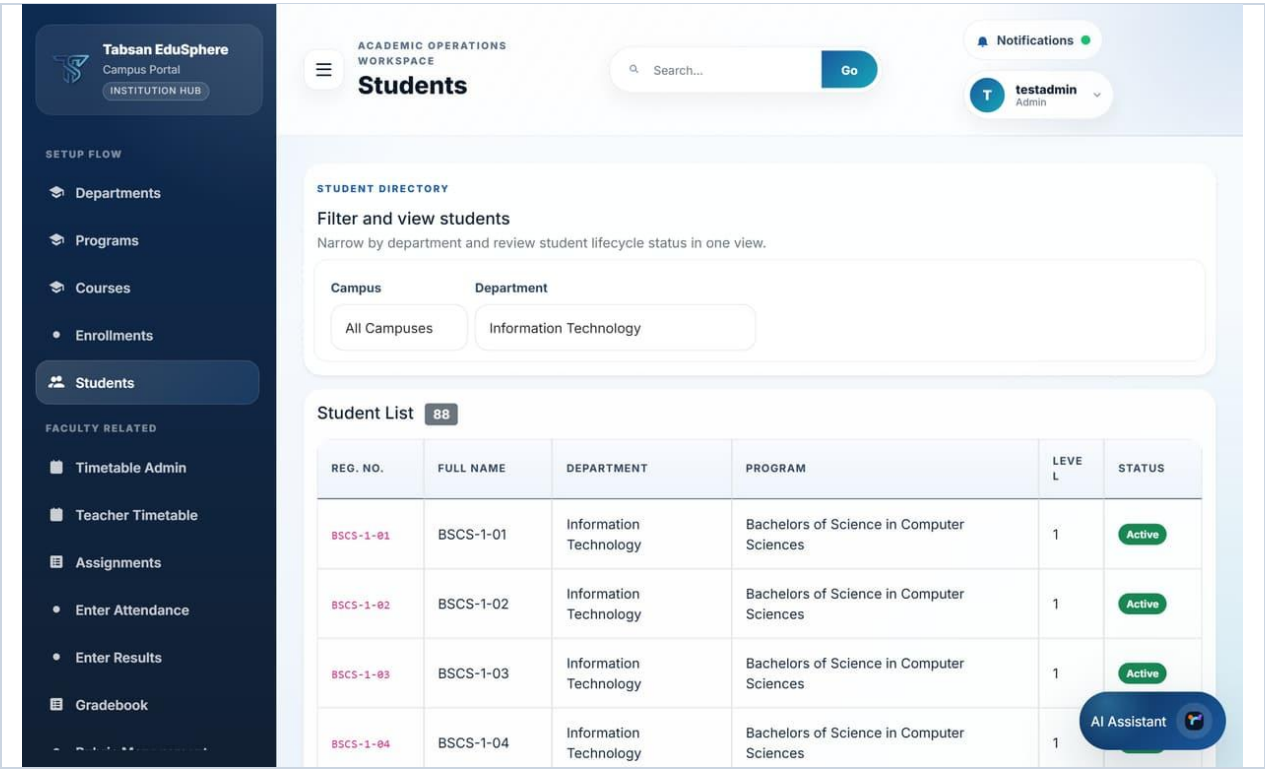

Figure 5.7 *Student list filtered by department*

Student statuses

Status	Meaning
Active	Currently studying.
Inactive	Studies paused or the account was deactivated.
Graduated	Completed the program. Graduated students keep read access to their records.

> **TIP** New students are added through User Import (single user or CSV). Promotion between semesters is handled in Student Lifecycle.

© 2026 Tabsan Nexora. All rights reserved.

6 Timetables and Facilities

Timetables tell teachers and students when and where each class happens. Buildings and rooms are set up first so they can be chosen when timetable entries are added.

6.1 Buildings and rooms

Available to: SuperAdmin, Admin

Buildings and rooms describe where classes take place. They are used when adding timetable entries, so rooms show correctly on teacher and student timetables.

Procedure

1. Open **Buildings**. Under **Add Building**, enter the **Name** and **Code** and click **Create**.
2. To rename a building or switch it off, click its name in the list; an edit panel opens with **Save** and **Deactivate**.
3. Open **Rooms** (or click **Rooms** next to a building). Choose the building, enter the **Room Number** and optional **Capacity**, and click **Create**.

Fields and options

Field	What to enter or choose
Building Name / Code	For example Faculty Block A / FBA. The code is shown on timetables, so keep it short.
Room Number	The room label, for example 101 or Lab 2.
Capacity	Optional. The number of seats, useful when planning large classes.

6.2 Timetable Admin

Available to: SuperAdmin, Admin

Timetable Admin builds the weekly class timetable for each program level, for example "7th Semester of BBA". A timetable has an effective date and a list of entries; each entry is one class on one day.

Before you start

- The program, its courses, the teachers and the rooms already exist.

Procedure

1. Open **Timetable Admin** and set the **Scope Selection** (campus and department), then click **Apply Scope**.
2. Under **Create Timetable**, choose the **Degree Program**, **Semester** and **Semester Number**, set the **Effective Date**, and click **Create Timetable**.
3. Select the new timetable in **Available Timetables**.
4. Under **Add Entry**, choose the **Day**, **Start** and **End** time, **Subject**, **Teacher**, **Building** and **Room**, then click **Add Entry**.
5. Repeat for every class in the week. The entries appear in a table ordered by day and time.
6. Publish the timetable so that students can see it in Student Timetable.

Fields and options

Field	What to enter or choose
Effective Date	The date from which the timetable applies. Create a new timetable when the schedule changes, rather than editing an old one, to keep history.
Subject (Fallback) / Room (Fallback)	Free-text alternatives for a subject or room that is not in the lists, for example "Sports Ground".

© 2026 Tabsan Nexora. All rights reserved.

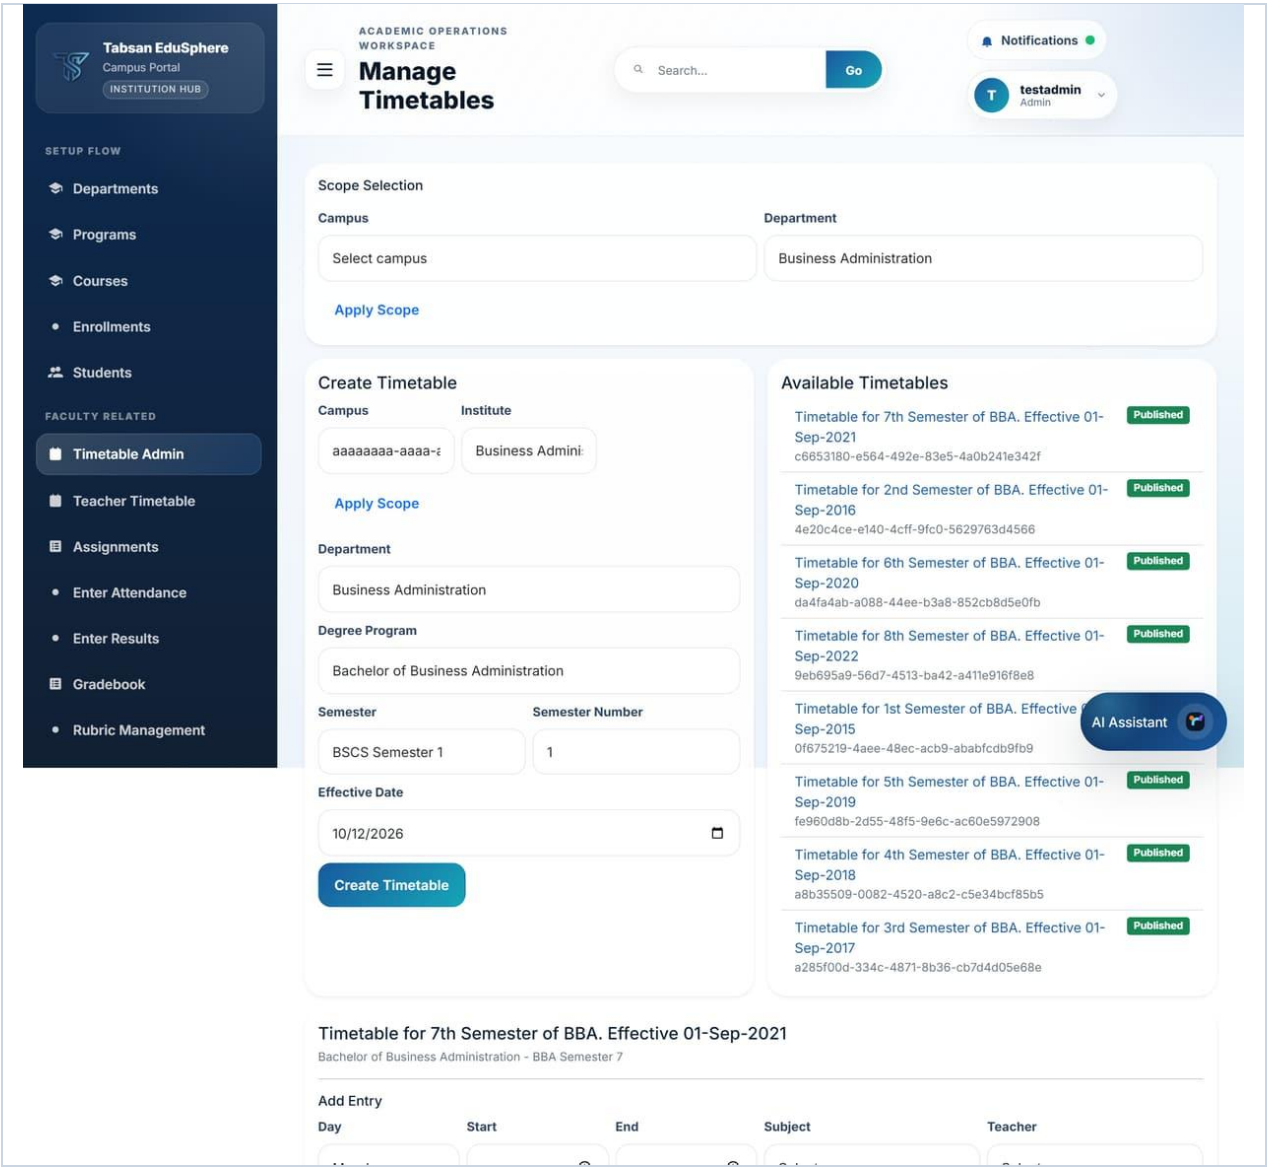

Figure 6.3 *Timetable Admin*

> **NOTE** SuperAdmin must select both a tenant and a campus before creating or editing entries.

6.3 Teacher Timetable

Available to: SuperAdmin, Admin, Faculty

Teacher Timetable shows every class assigned to one teacher across all published timetables, so a teacher can see their whole week in one place.

Faculty see their own timetable straight away. Admins choose a **Faculty** member and click **Apply**. Tick **Show deactivated** to include timetables that are no longer in use.

© 2026 Tabsan Nexora. All rights reserved.

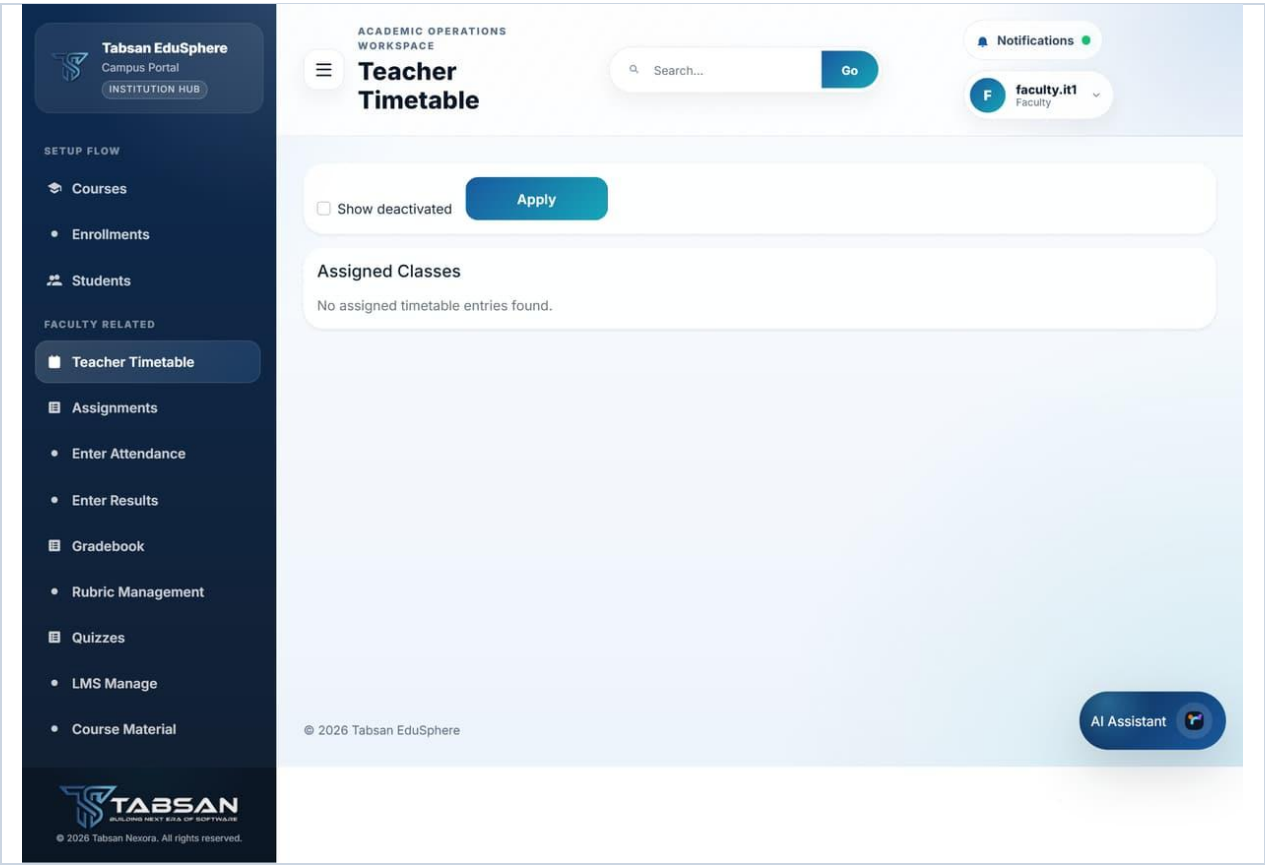

Figure 6.4 *Teacher Timetable (Faculty view)*

6.4 Student Timetable

Available to: Student

Students see the published timetables for their own department. Choose a **Timetable** and, if you only want one day, a **Day Filter**, then click **Apply**. Each row shows the day, time, subject, teacher, building and room.

© 2026 Tabsan Nexora. All rights reserved.

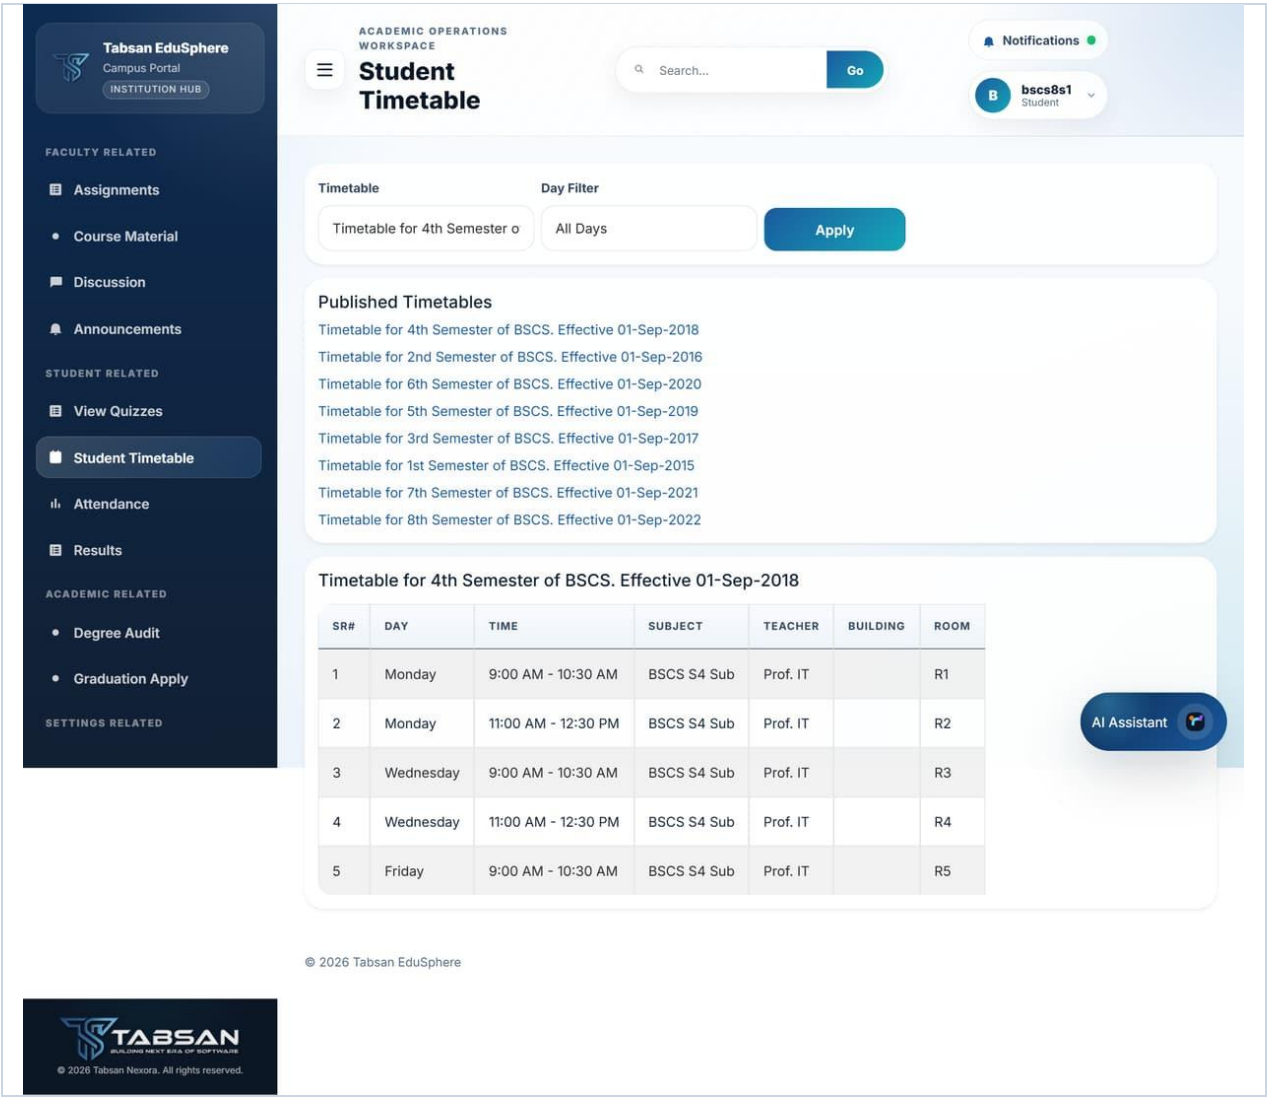

Figure 6.5 *Student Timetable*

Good to know

- If no timetable appears, it may not be published yet. Check with your department office.

© 2026 Tabsan Nexora. All rights reserved.

7 Teaching and Learning

This chapter covers the pages teachers use every week and what students see on the other side: assignments, attendance, marks, quizzes, course content, discussions and announcements.

7.1 Assignments

Available to: SuperAdmin, Admin, Faculty, Student

Assignments are pieces of coursework set for an offering. Teachers create and publish them, students submit text and/or a file before the due date, and teachers grade each submission with marks and feedback.

Procedure

1. Open **Assignments** and choose the department and offering.
2. Faculty: create an assignment with a **Title**, **Description**, **Due Date** and **Max Marks**, then publish it so students can see it.
3. Students: open the assignment, type notes in **Text Submission** and/or choose a file in **Upload File**, and submit before the due date.
4. Faculty: open the assignment to review submissions. For each student enter **Marks Awarded** and **Feedback**, and save.
5. Tick **Show inactive assignments** to see assignments that have been retired.

Fields and options

Field	What to enter or choose
Title / Description	What the students must do. Include any length, format or referencing requirements in the description.
Due Date	The deadline shown to students.
Max Marks	The highest mark available; used to calculate percentages and grades.

© 2026 Tabsan Nexora. All rights reserved.

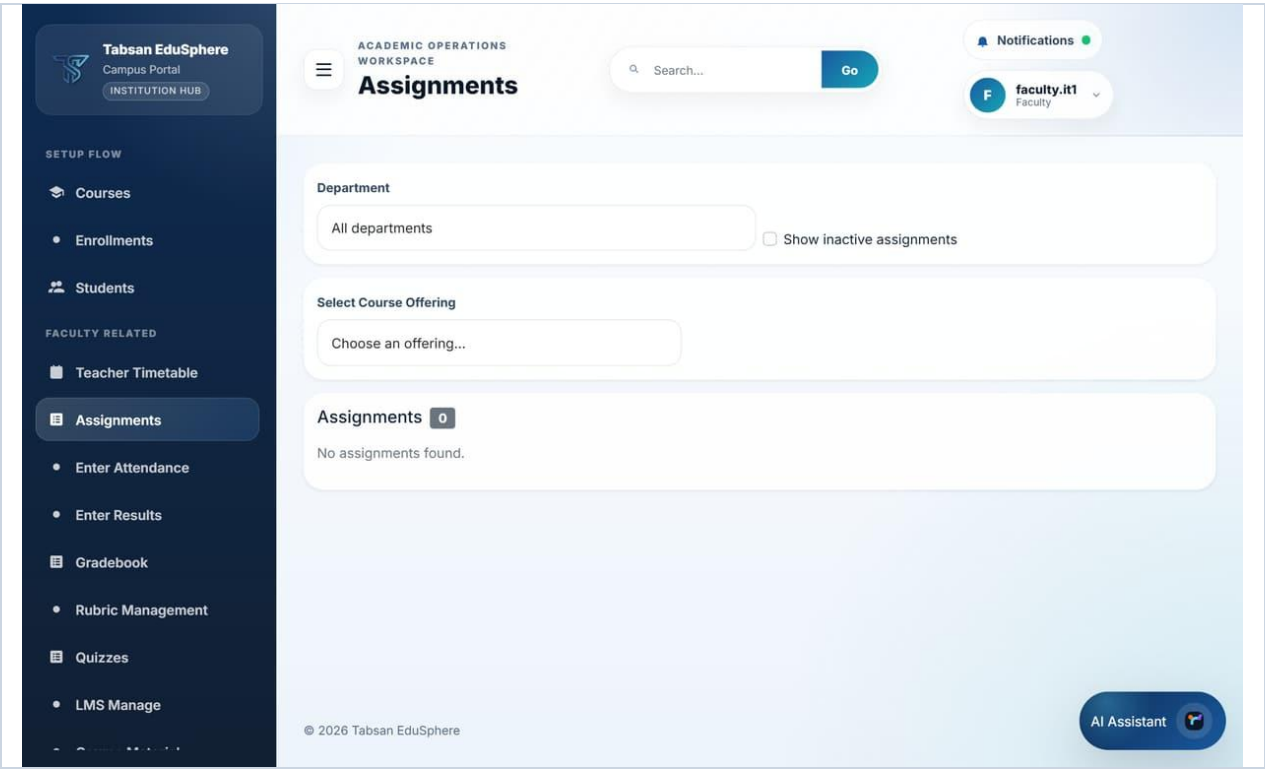

Figure 7.1 *Assignments (Faculty)*

© 2026 Tabsan Nexora. All rights reserved.

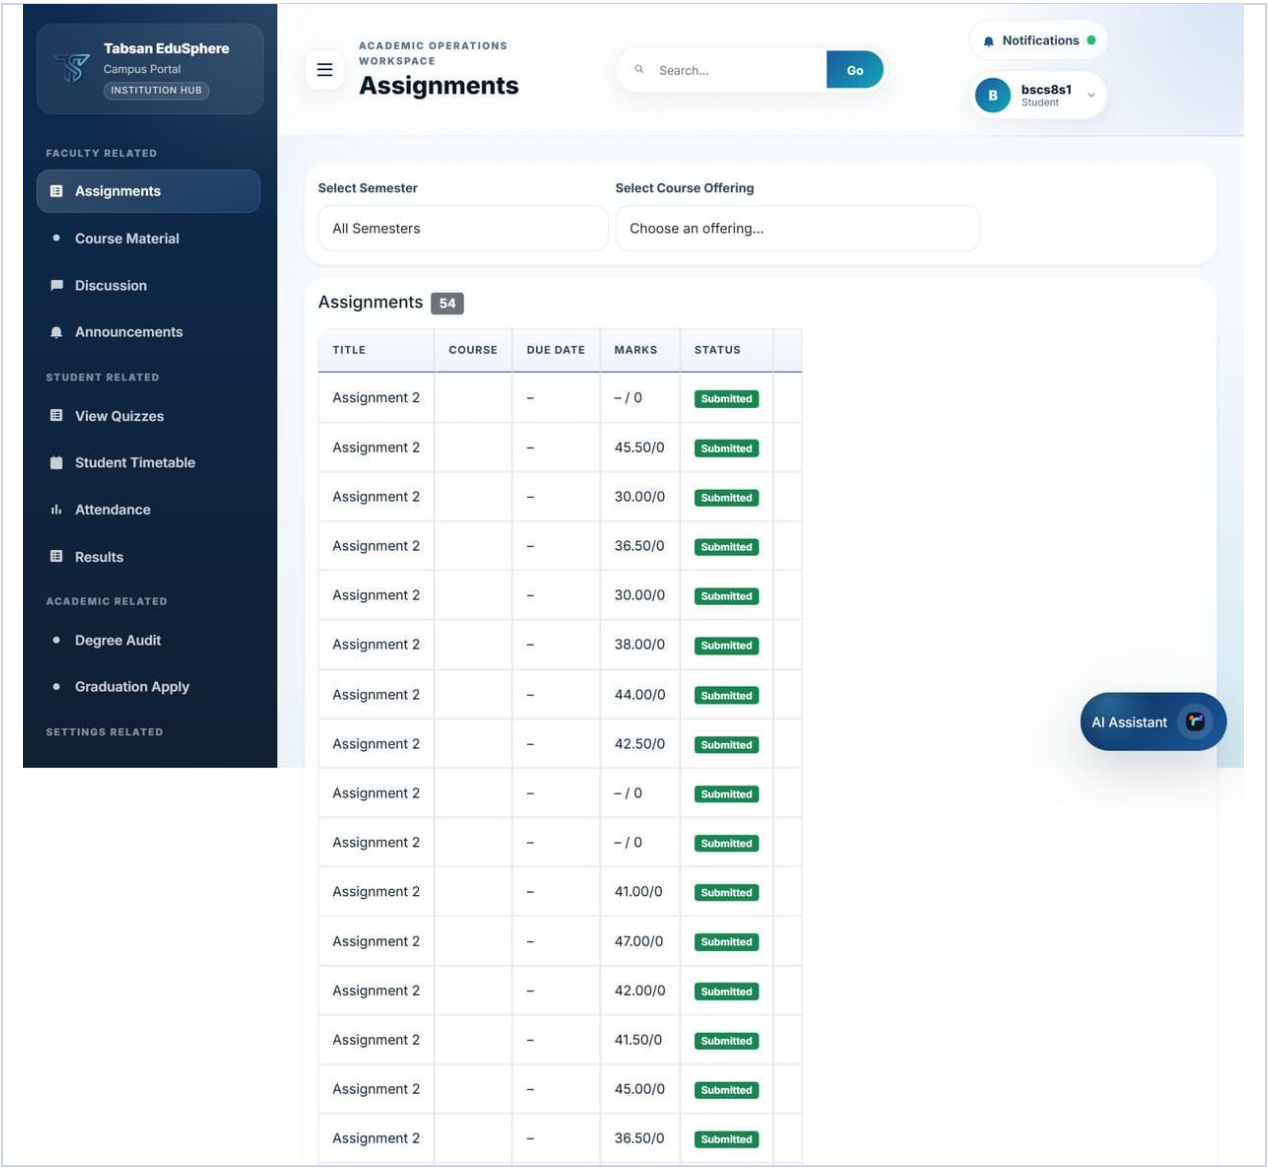

Figure 7.2 *Assignments (Student view)*

Submission statuses

Status	Meaning
Submitted	The student has handed in work; waiting for grading.
Graded	Marks and feedback are available to the student.
Rejected	The teacher returned the submission; the student should follow the feedback.

7.2 Entering attendance

Available to: SuperAdmin, Admin, Faculty

Attendance is recorded for each offering and each class date. Teachers usually record it at the end of every class. The page also shows a running summary for the offering.

Before you start

- Students must be enrolled in the offering to appear in the attendance table.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Enter Attendance**.
2. Choose the **Department**.
3. Choose the **Course** (program).
4. Choose the offering in **Select Course Offering**. The Attendance Summary and the Attendance Entry Table load.
5. In the entry table, tick **Present** for each student who attended (untick for absent) and click **Save Attendance**.
6. To load a whole class at once, click **Get Template**, fill in the CSV in a spreadsheet, and use **Import Attendance**. Tick **Strict mode** to reject the whole file if any row is invalid.

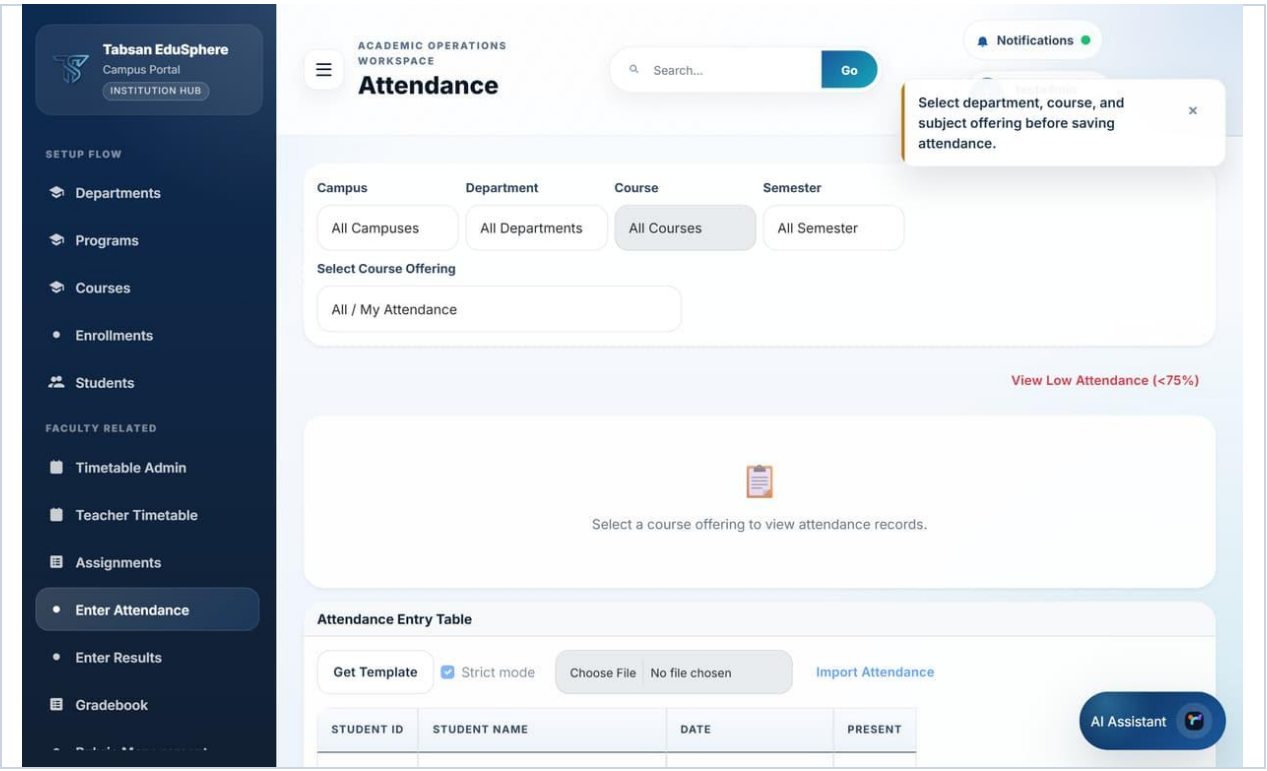

Figure 7.3 *Enter Attendance – scope filters*

© 2026 Tabsan Nexora. All rights reserved.

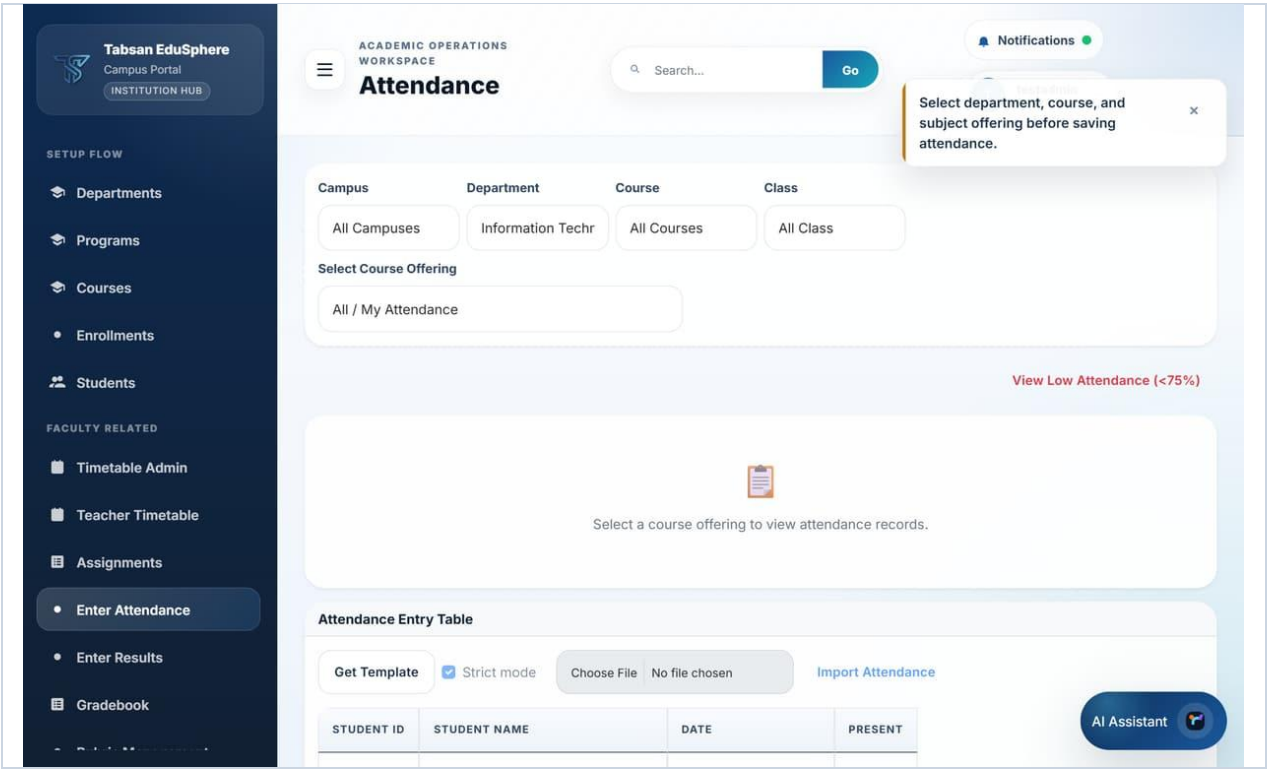

Figure 7.4 *Step 1: department selected*

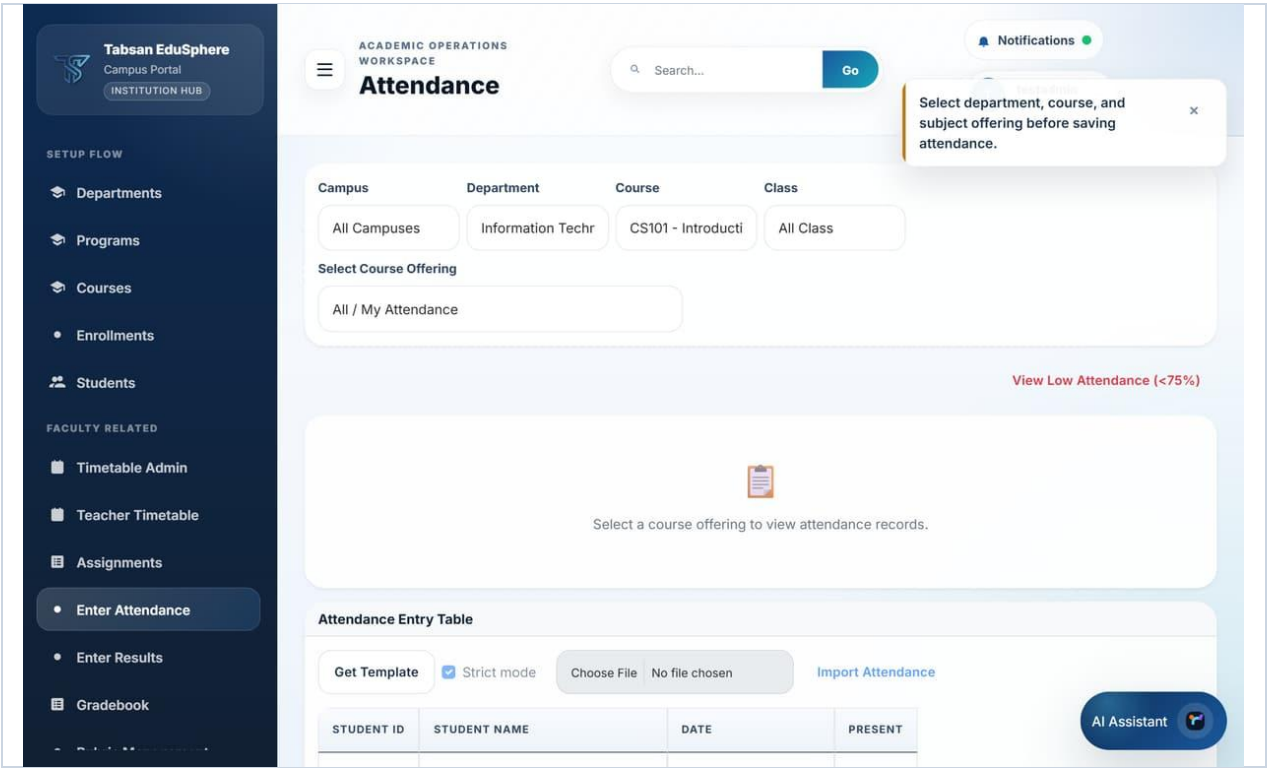

Figure 7.5 *Step 2: course selected*

© 2026 Tabsan Nexora. All rights reserved.

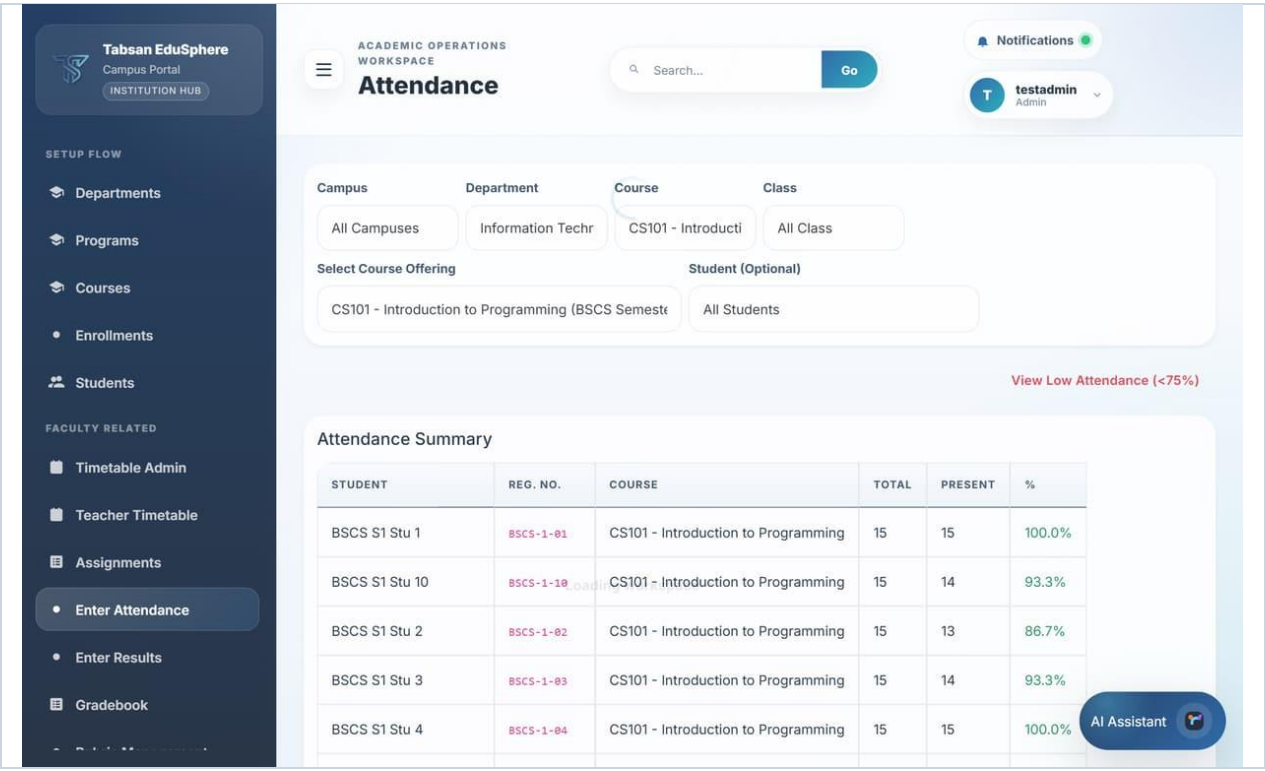

Figure 7.6 *Step 3: offering selected – attendance summary per student*

Attendance statuses

Status	Meaning
Present	Attended the class.
Late	Attended but arrived late. Counts as present in percentages.
Absent	Did not attend.
Excused	Absent with permission.

Good to know

- Click **View Low Attendance (<75%)** to list students below the attendance threshold so you can follow up early.
- Mistakes can be corrected later; corrections are recorded in the audit log.

7.3 Viewing attendance

Available to: Faculty, Student

The Attendance page shows totals and percentages. Students see one row per course with the number of classes held, the number attended and the percentage, coloured green (75% or more), amber (50–75%) or red (below 50%).

A separate **Low Attendance (<75%)** list shows any courses where the student is below the threshold.

© 2026 Tabsan Nexora. All rights reserved.

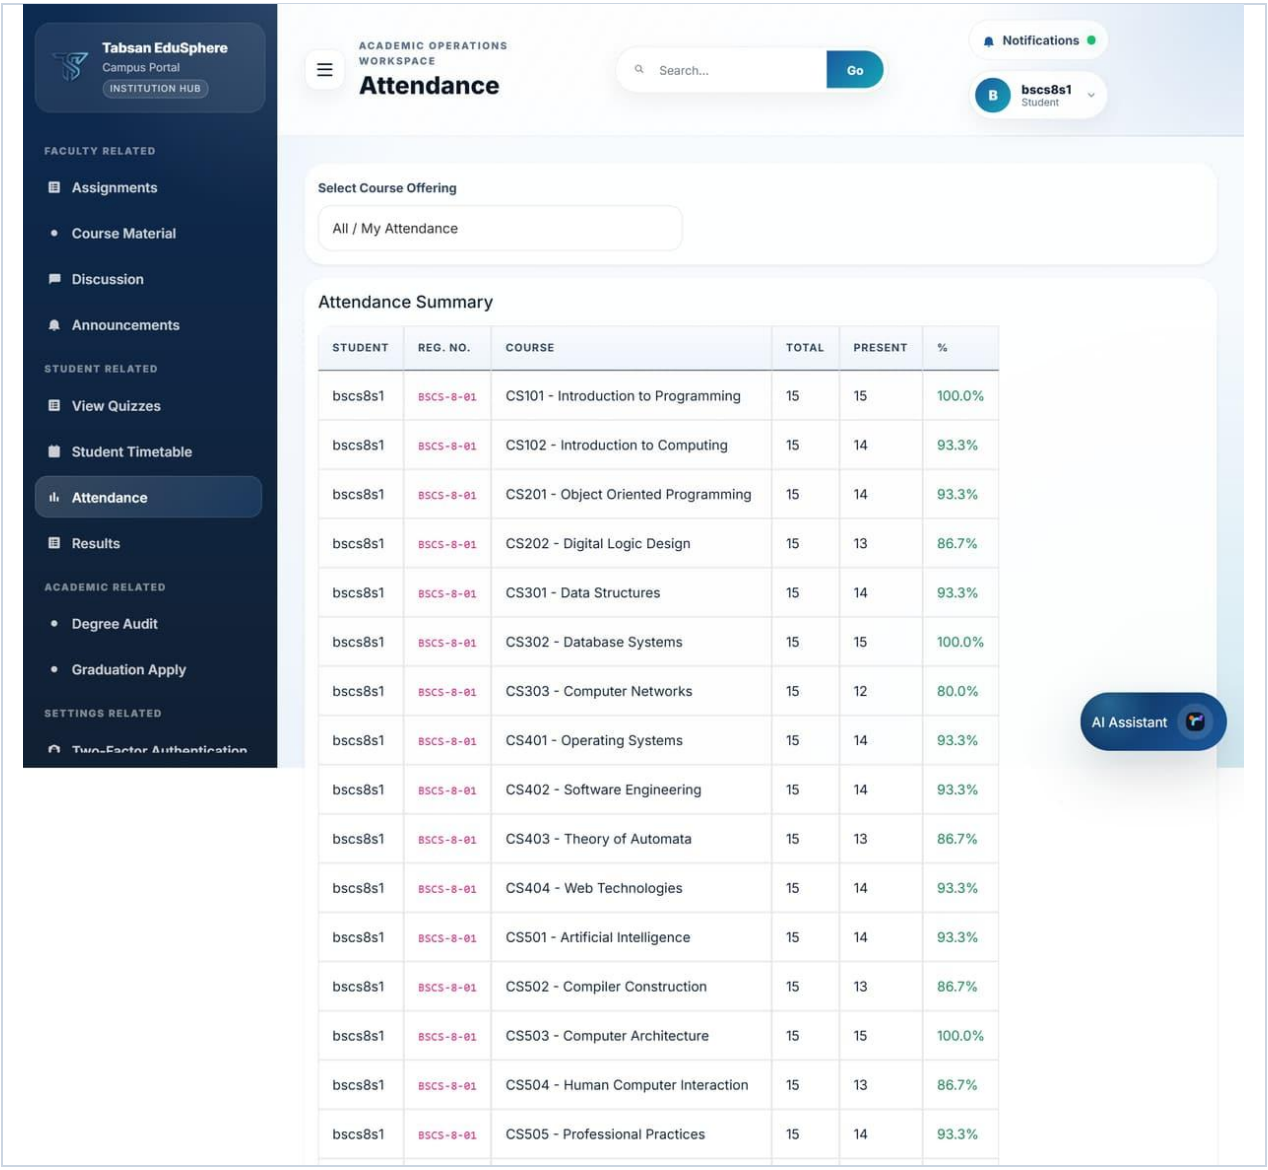

Figure 7.7 *Attendance (Student view)*

> **IMPORTANT** Many institutions require at least 75% attendance to sit final exams. Students should contact their teacher early if their percentage is low.

7.4 Entering results

Available to: SuperAdmin, Admin, Faculty

Marks are entered per subject and exam type, for example the Midterm of CS101. The page requires the department, program, subject and exam type to be chosen first, so that marks are always stored against the right assessment.

Results stay private until they are published. After publishing, students can see them immediately.

Before you start

- Students are enrolled in the offering, and Result Calculation is set up so marks can be turned into grades.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Enter Results** and choose the **Department**.
2. Choose the **Program/Course**.
3. Choose the **Subject**.
4. Choose the **Exam Type** and click **Apply**.
5. Click **+ Enter Result**, choose the **Student**, enter **Marks Obtained** and **Max Marks**, and save. Repeat for each student, or download the CSV with **Get Template**, fill it in and upload it with **Import Results**.
6. Review the Result Entry Grid. When it is correct, click **Publish All** to release the results to students.
7. Use **Export CSV** or **Export PDF** to keep a copy.

Fields and options

Field	What to enter or choose
Exam Type	The assessment: Midterm, Final, Quiz, Assignment, Practical, Theory or Internal.
Marks Obtained / Max Marks	The student's mark and the highest possible mark. The grade is calculated automatically.
strict (import)	When ticked, the whole file is rejected if any row has a problem, so you never get a half-imported mark sheet.

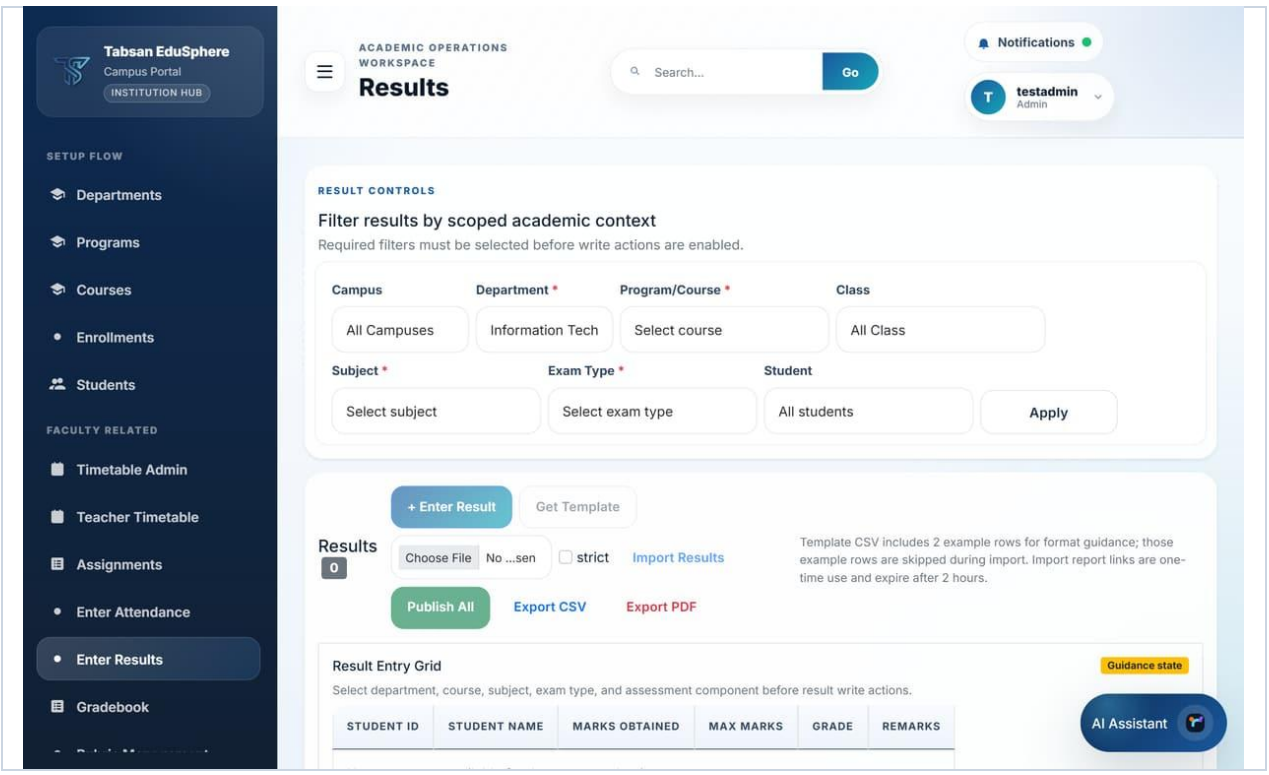

Figure 7.8 *Step 1: department*

© 2026 Tabsan Nexora. All rights reserved.

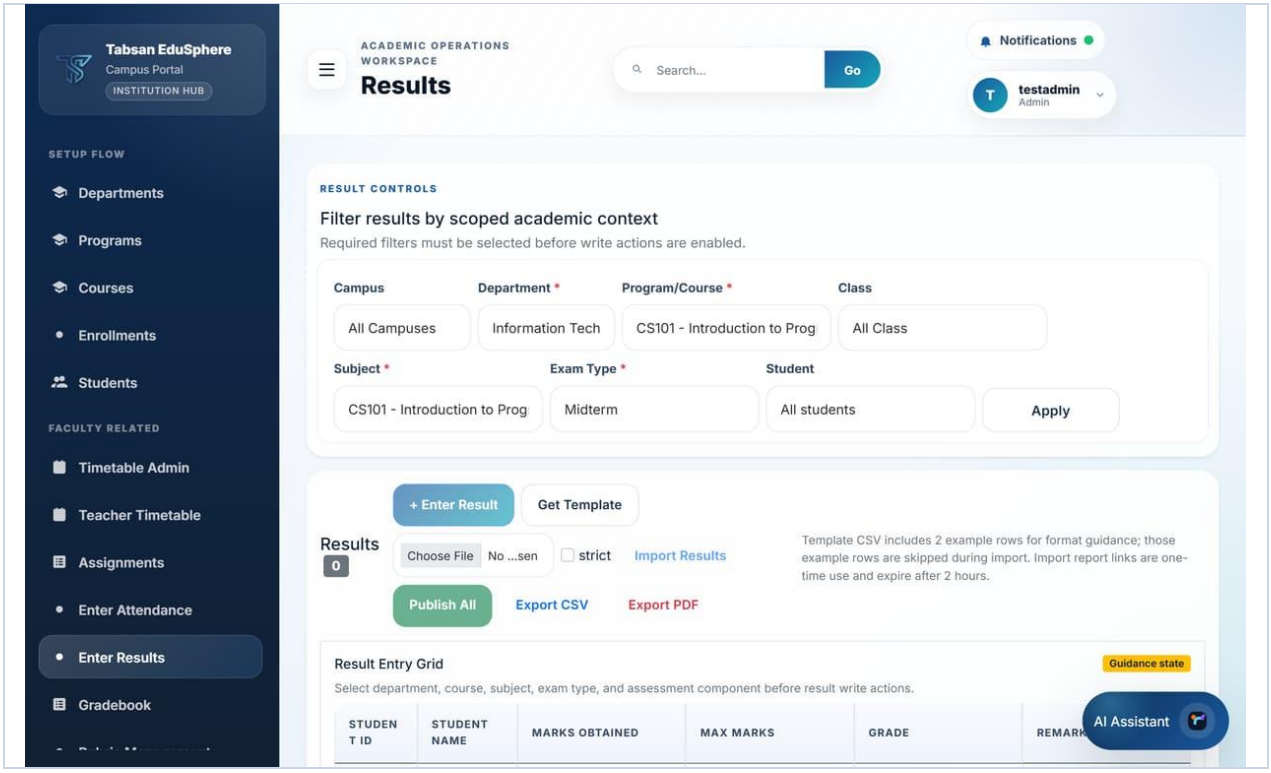

Figure 7.9 *Steps 2–4: program, subject and exam type applied; the Result Entry Grid*

What happens next

Published marks appear on the student's Results page, in the Gradebook and in result reports. The student's semester GPA and CGPA (University) or percentage (School and College) are recalculated.

To change a published mark, a teacher submits a modification request with the proposed marks and a reason; an Admin approves or rejects it. Every change is recorded in the audit log.

> **IMPORTANT** Check marks carefully before clicking Publish All. Students are notified and can see published results straight away.

7.5 Gradebook

Available to: SuperAdmin, Admin, Faculty

The Gradebook shows every student's marks for every assessment of one offering in a single grid, so a teacher can see the whole class at a glance and spot missing marks.

Choose a **Course Offering** to load the grid. You can also upload marks in bulk from a CSV file, review the preview, confirm it, and publish all marks for the offering.

© 2026 Tabsan Nexora. All rights reserved.

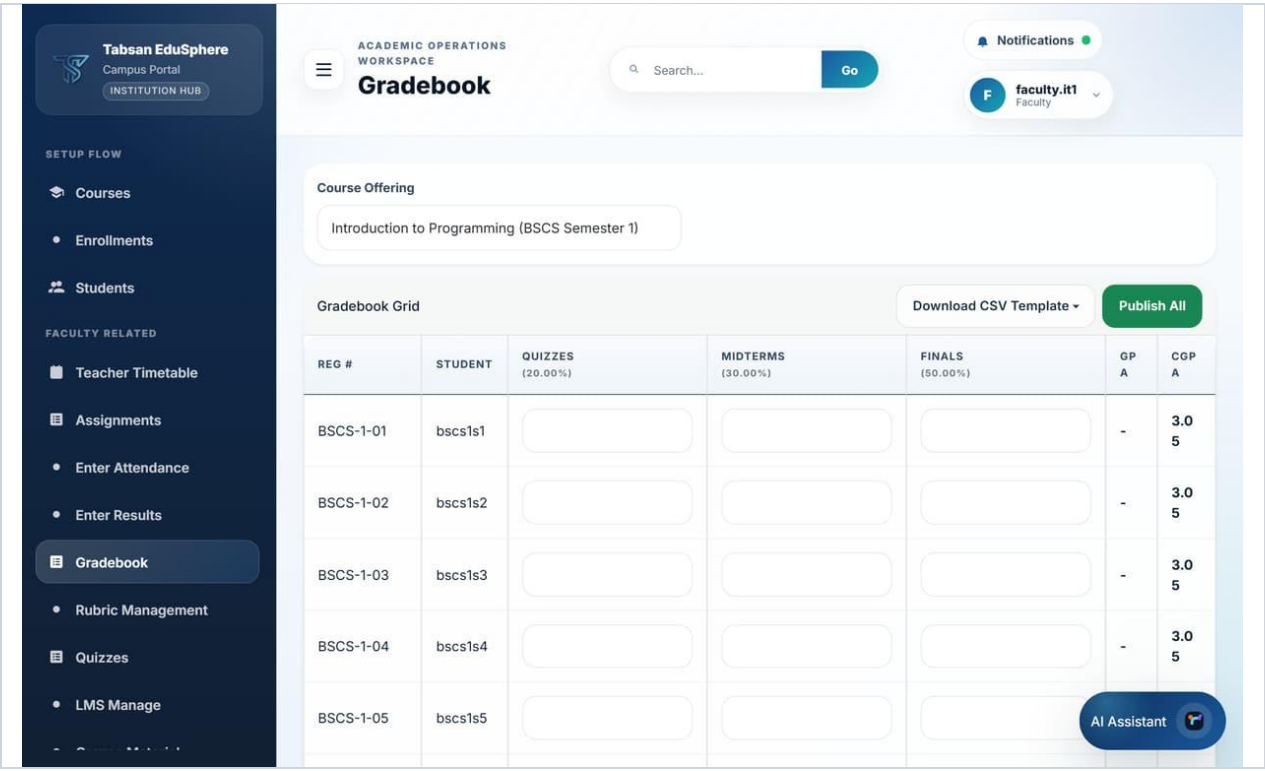

Figure 7.10 *Gradebook for a course offering*

7.6 Rubric Management

Available to: SuperAdmin, Admin, Faculty

A rubric is a marking guide: a list of criteria (for example Content, Structure, Referencing) and the performance levels for each, with points. Rubrics make grading fair and consistent and help students understand how they will be assessed.

Choose a **Course Offering**, enter a **Rubric Title**, then add the criteria and levels with their points. Rubrics are used when grading assignments.

© 2026 Tabsan Nexora. All rights reserved.

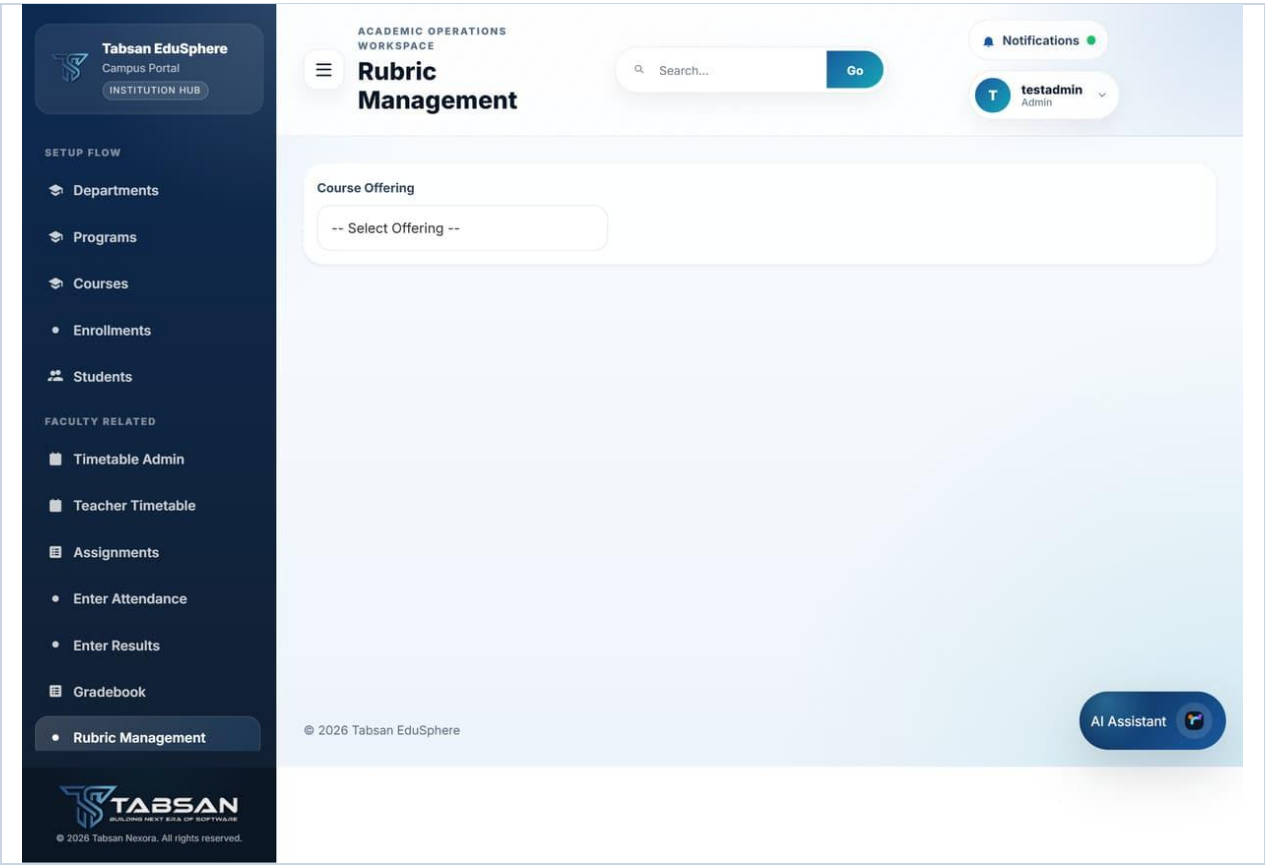

Figure 7.11 *Rubric Management*

7.7 Quizzes

Available to: SuperAdmin, Faculty; Students take quizzes in View Quizzes

Quizzes are short assessments for an offering. Teachers create them with instructions, an optional time limit and a maximum number of attempts, then publish them. Students see published quizzes in **View Quizzes**, prepare their answers and upload them as a file before the last date.

Procedure

1. Faculty: open **Quizzes** and choose the offering in **Select Course Offering**.
2. Create a quiz with a **Title**, **Instructions** (the questions or what to answer), **Time Limit (minutes)** and **Max Attempts**.
3. Click **Publish** when it is ready. Use **Deactivate** to close it early, or **Delete** to remove a quiz that was created by mistake.
4. Students: open **View Quizzes**, read the instructions, attach your answer file and click **Submit** before the last date.

© 2026 Tabsan Nexora. All rights reserved.

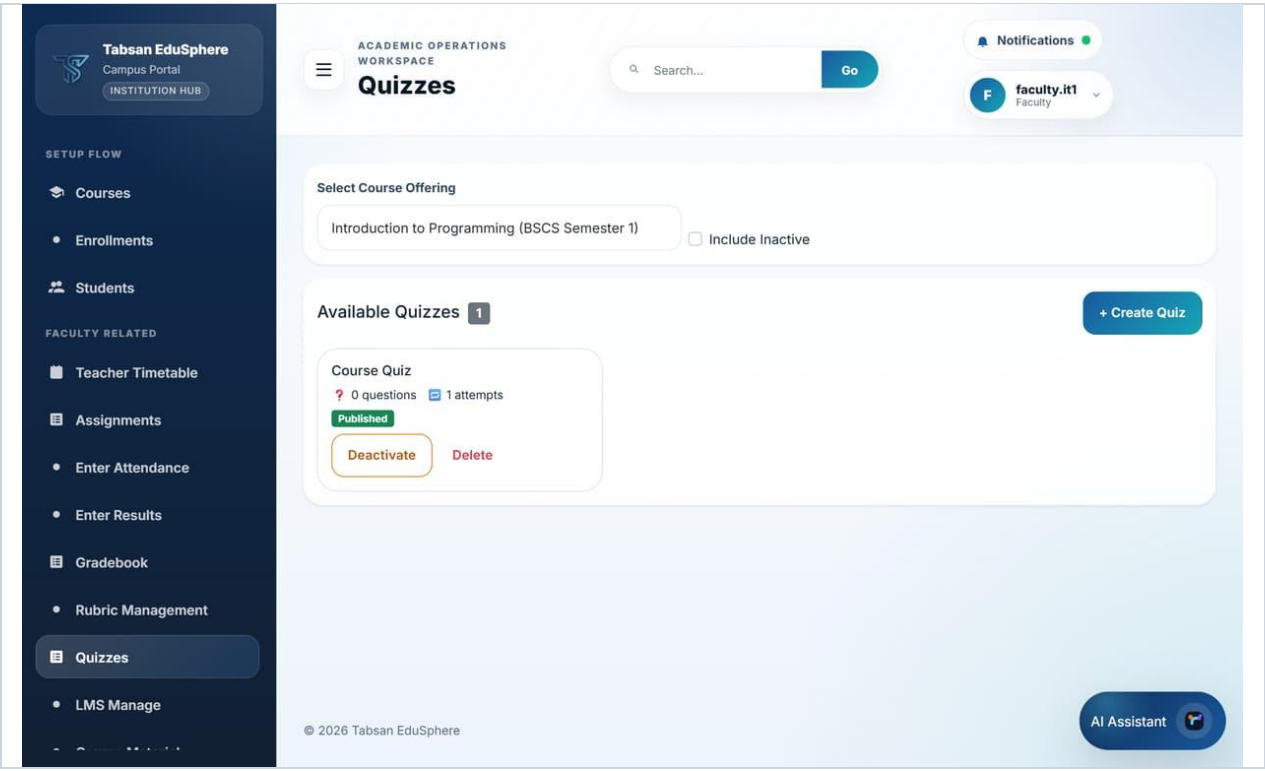

Figure 7.12 *Quizzes (Faculty)*

© 2026 Tabsan Nexora. All rights reserved.

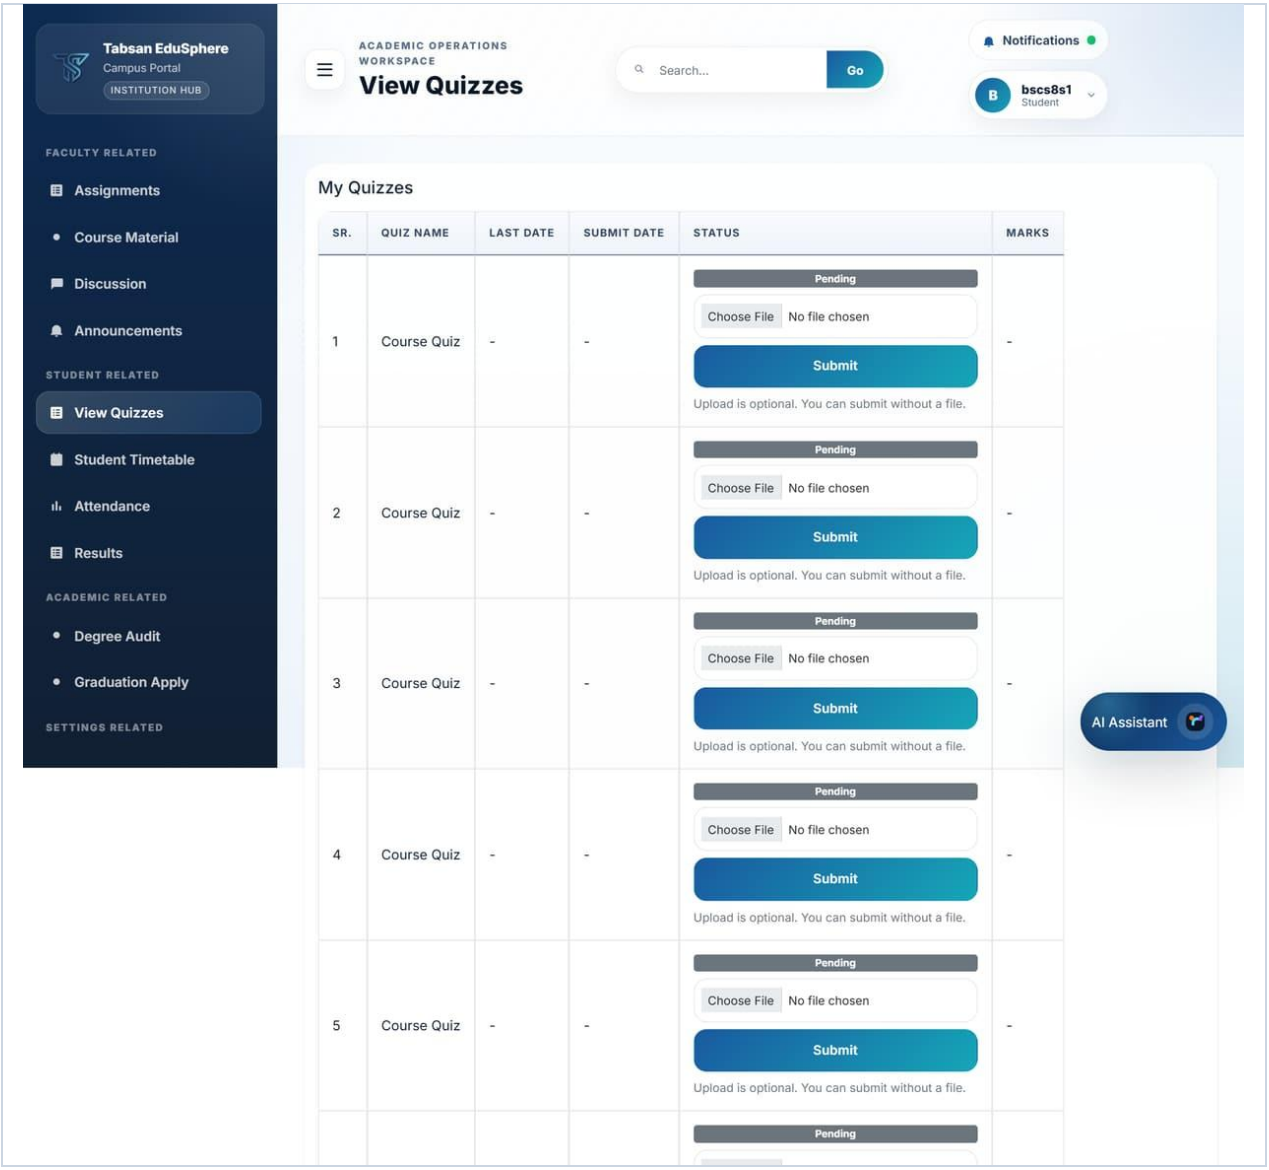

Figure 7.13 *My Quizzes (Student)*

Good to know

- Tick **Include Inactive** to see closed quizzes. Students see their marks once the quiz is graded.

7.8 LMS Manage

Available to: SuperAdmin, Admin, Faculty

LMS Manage builds online learning content for an offering, organised by week. Each module has a title, a week number and a body that can contain formatted text, links and embedded videos.

Procedure

1. Open **LMS Manage** and choose the offering.
2. Under **Add New Module**, enter the **Title** and **Week #**, and write the **Body** (HTML is allowed for headings, lists and links).
3. Click **Add Module**. Add videos to a module where needed.
4. Click **Publish** to make a module visible to students, or **Unpublish** to hide it again while you edit.

© 2026 Tabsan Nexora. All rights reserved.

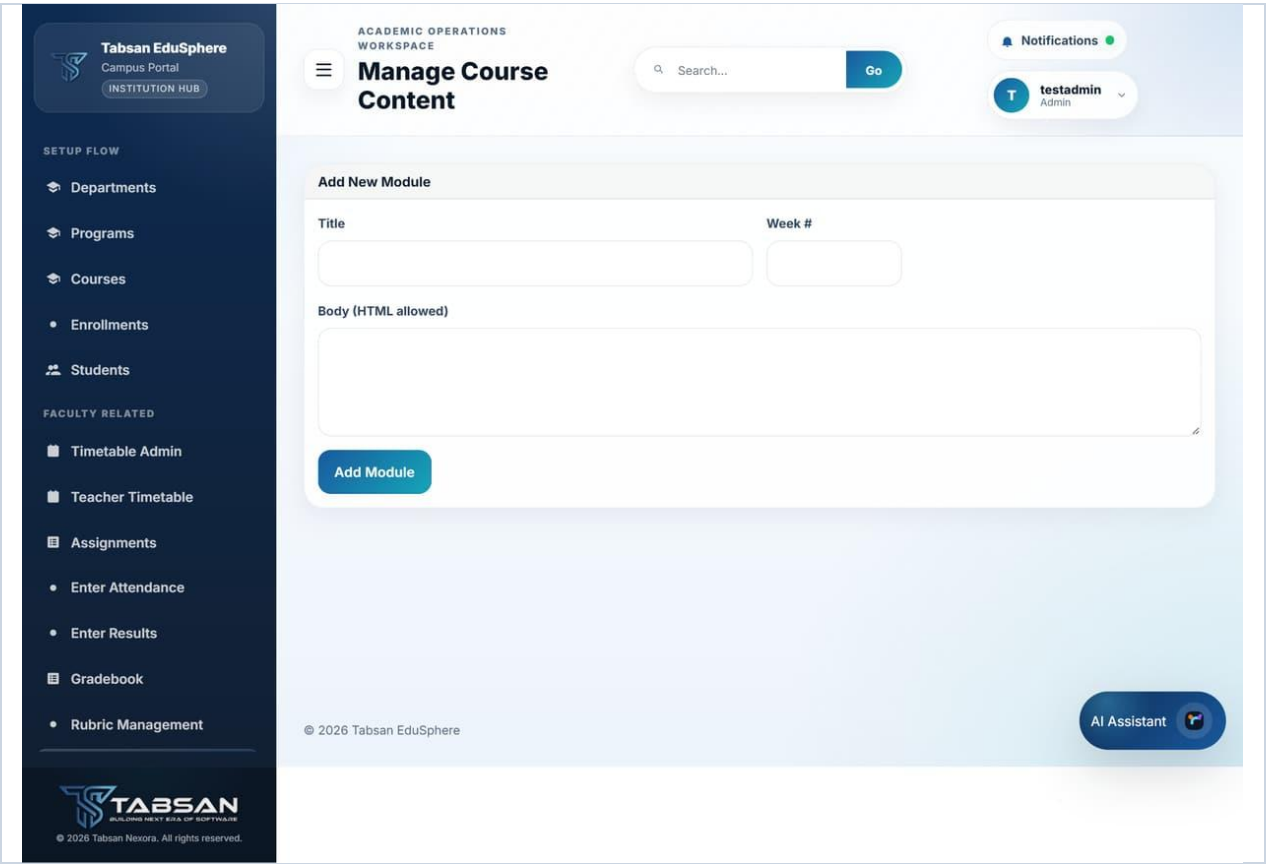

Figure 7.14 *LMS Manage*

7.9 Course Material

Available to: SuperAdmin, Admin, Faculty, Student

Course Material is a library of files and links for each subject: lecture slides, notes, past papers or useful websites. Teachers add material; students browse and download it.

Procedure

1. Open **Course Material** and set the filters (department, program, semester, subject/course), then click **Apply Filters**.
2. Click **Add Material**. Choose the **Type**, enter a **Title** and **Description**, and either upload a file or enter an **External URL**.
3. Save. The material appears in the list for that subject.
4. Untick **Active only** to see material that has been withdrawn, and use the row actions to edit or withdraw an item.

© 2026 Tabsan Nexora. All rights reserved.

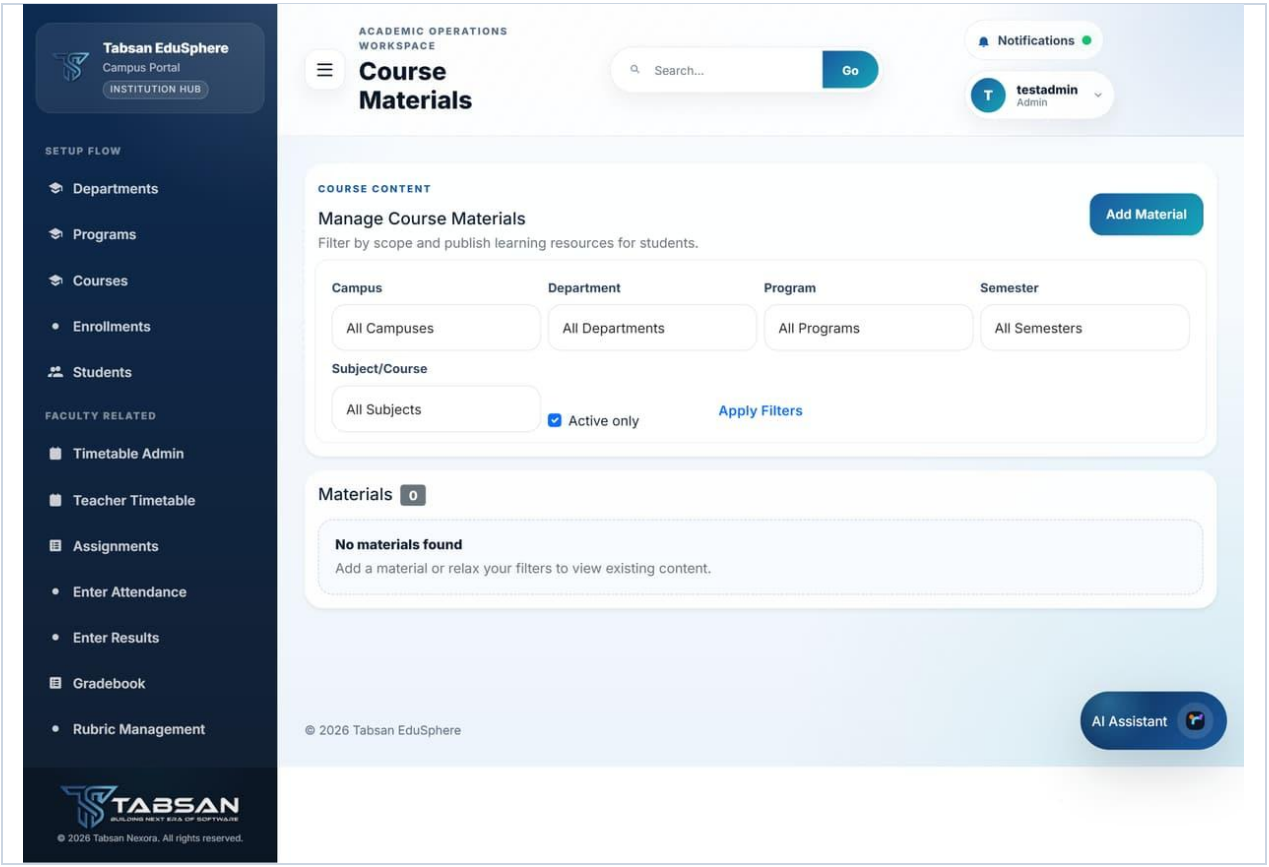

Figure 7.15 *Manage Course Materials*

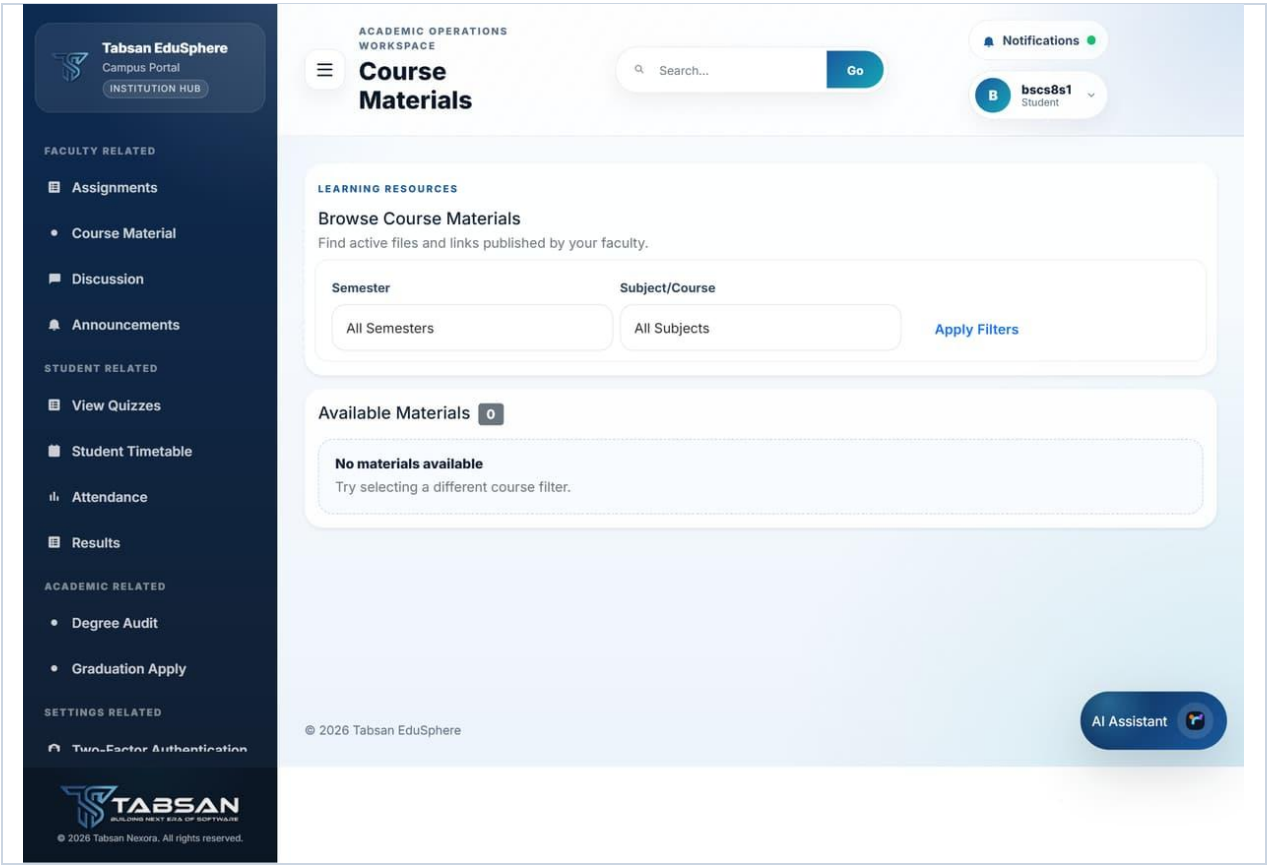

Figure 7.16 *Browse Course Materials (Student)*

© 2026 Tabsan Nexora. All rights reserved.

Good to know

- Students see the material published for the subjects of their department; inactive material is hidden from them.

7.10 Discussion

Available to: SuperAdmin, Admin, Faculty, Student

Discussion is a question-and-answer board for each offering. Students can ask questions, classmates and teachers can reply, and a teacher can mark a thread as resolved once it has been answered, which helps others find the answer later.

Procedure

1. Open **Discussion** and choose the offering.
2. Under **Start a New Thread**, type your question and click **Post**.
3. Open a thread to read the replies, add your own reply, or (teachers) mark it solved or unresolved.

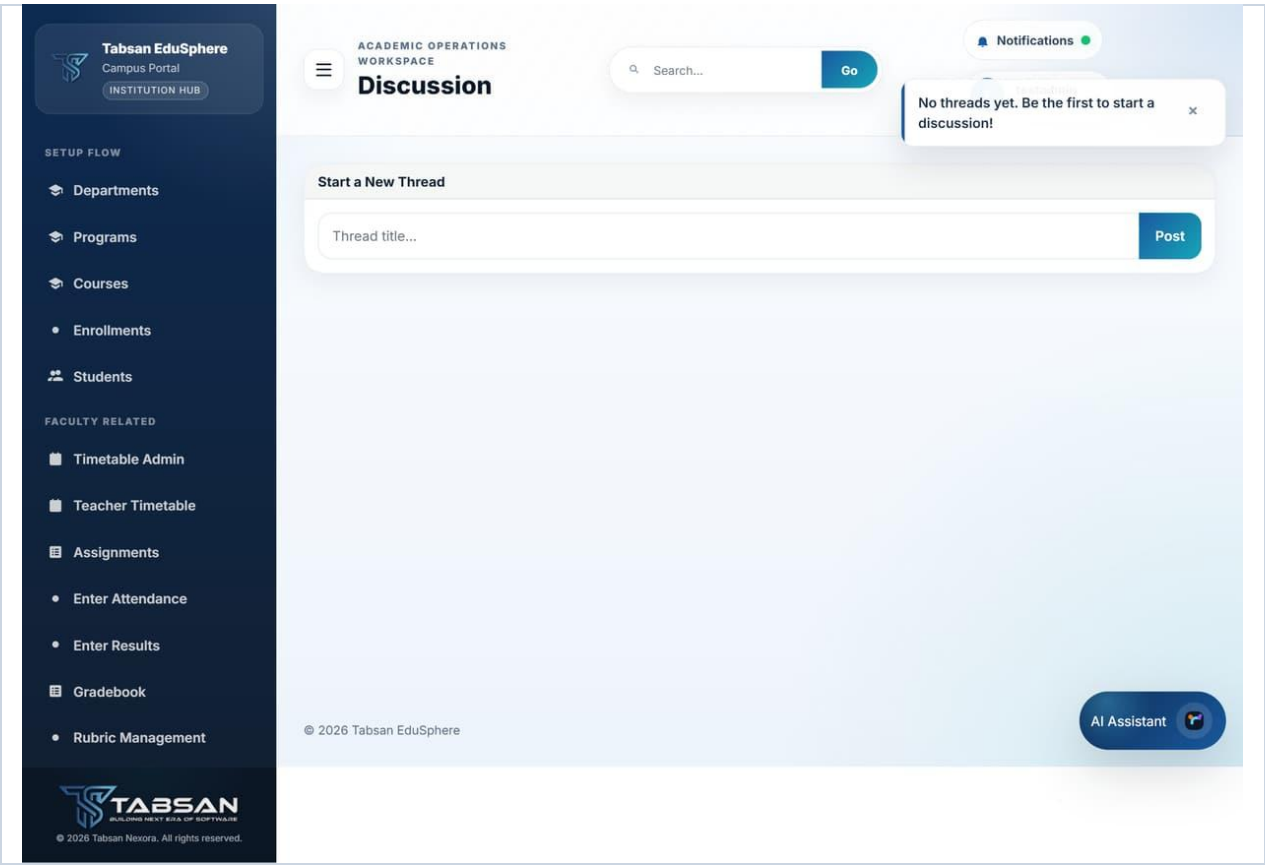

Figure 7.17 *Discussion*

7.11 Announcements

Available to: SuperAdmin, Admin, Faculty, Student

Announcements publish notices, such as a room change or an exam reminder, to a whole department or to a single course offering. Students see announcements for the courses they take.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Announcements**.
2. Choose a **Department** and, optionally, a **Course Offering**, then click **Apply** to see announcements in that scope.
3. Staff: under **Post Announcement**, enter the title and message and click **Post**. With only a department chosen, the announcement goes to every offering in that department.
4. Use **Deactivate** to hide an announcement without deleting it, or **Delete** to remove it permanently. Tick **Show inactive** to see hidden announcements.

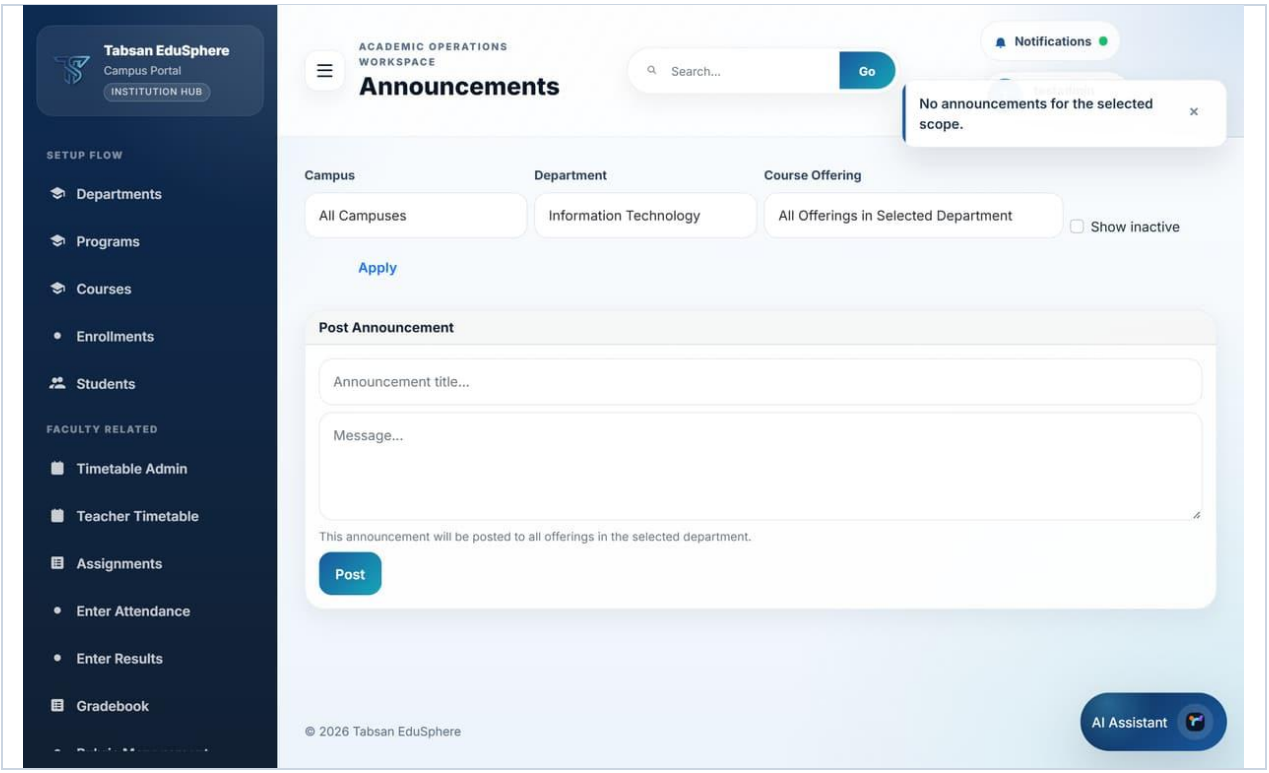

Figure 7.18 *Announcements for a department*

> **NOTE** An announcement posted to a whole department reaches every course offering in it. It is listed once with an "N offerings" label, and Deactivate or Delete applies to all of those offerings together.

© 2026 Tabsan Nexora. All rights reserved.

8 Results, Progression and Final Year Projects

This chapter covers how marks become grades, how students move from one level to the next, and how final year projects are run.

8.1 Results

Available to: SuperAdmin, Admin, Faculty, Student

The Results page shows published marks. Staff use the same filters as Enter Results to review a class. Students see only their own results, grouped by class or semester, with the mark, grade and publish date for each course.

Procedure

1. Open **Results**. Students can choose a **Class** to narrow the list.
2. Click **Export CSV** or **Export PDF** to download a copy of the results shown.
3. Students: if you believe a mark is wrong, click **Request Re-check** on that result, give a **Reason** and submit.

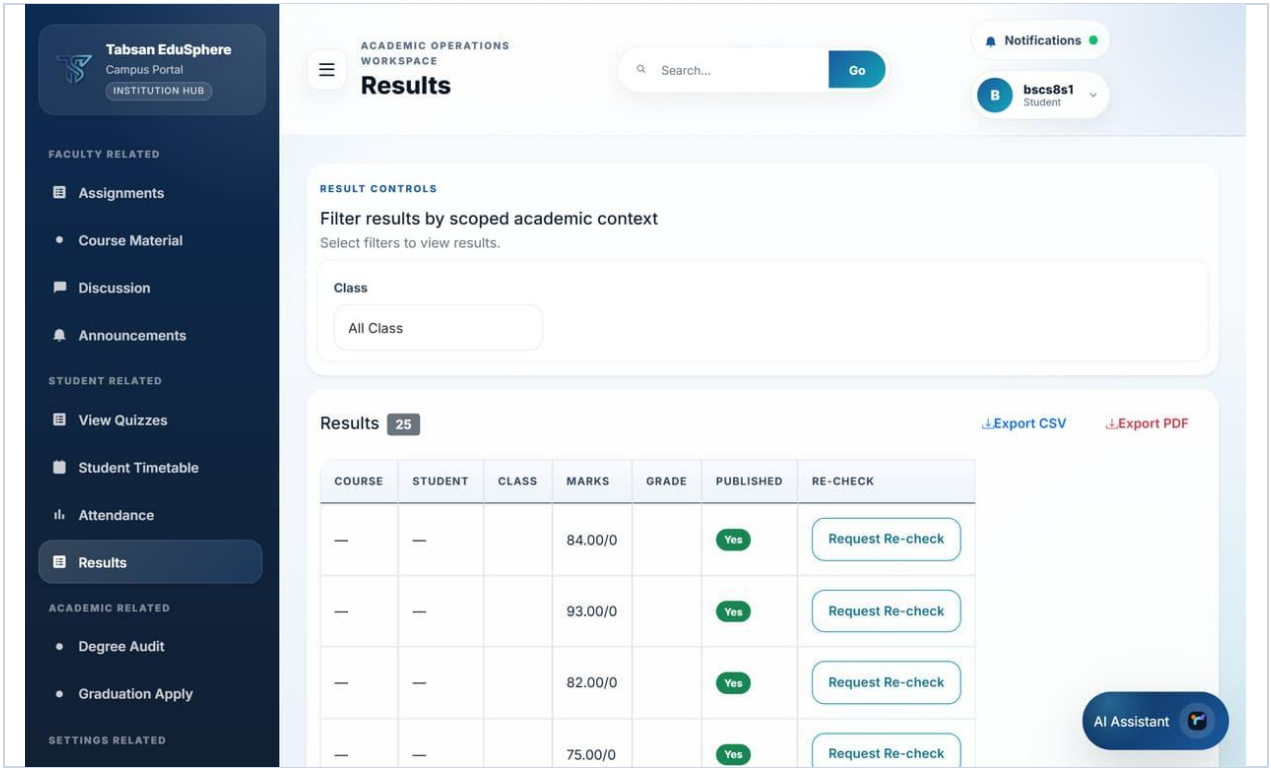

Figure 8.1 *Results (Student view)*

What happens next

The request is recorded as a change request for the administrators to review. If the mark is changed, the corrected result replaces the old one and the change is recorded in the audit log.

© 2026 Tabsan Nexora. All rights reserved.

Good to know

- Results only appear after the teacher publishes them. An empty page usually means marks have not been published yet.

8.2 Result Calculation

Available to: SuperAdmin, Admin

Result Calculation tells the portal how to turn marks into grades and grade points. It has two sections: the score-to-GPA scale, and the weighting of each assessment within a subject.

Procedure

1. In **Section 1: GPA and Score**, choose the **Institute** and add a row for each score band and its GPA value with **Add Row** (for example 85 and above = 4.0).
2. In **Section 2: Subject Score Calculation**, choose the **Course Type** or a specific **Course**, and set the **Weightage** of each **Component**, for example Midterm 30%, Final 50%, Assignments 20%.
3. Tick **Active** for the rows that should apply and click **Save**. Use **X** to remove a row.

© 2026 Tabsan Nexora. All rights reserved.

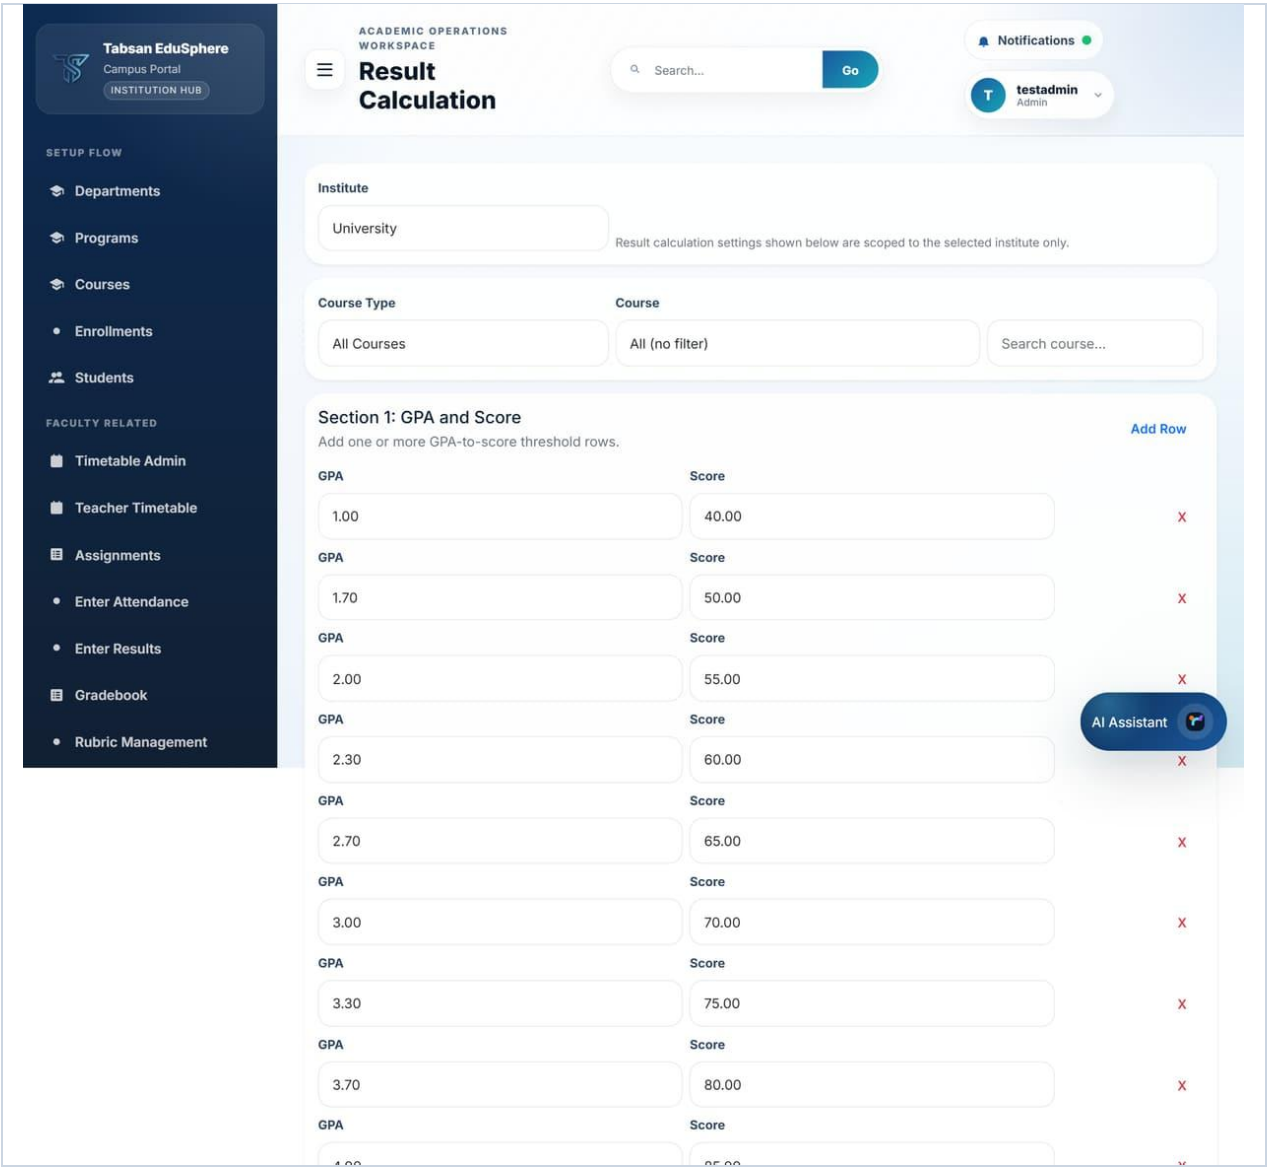

Figure 8.2 *Result Calculation*

Good to know

- Component weightings for a subject should add up to 100%.
- Change the rules before results are published for a term; changing them afterwards recalculates grades the next time results are processed.

> **NOTE** University results use GPA scales. School and College results are percentage based and do not need GPA rows.

8.3 Grading Config

Available to: SuperAdmin (edit), Admin and Faculty (view)

Grading Config sets the pass threshold, and optionally the grade bands, separately for School, College and University. The pass threshold decides whether a student is eligible for promotion to the next level.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Choose the scope (institute, department, semester, course or subject) the setting applies to.
2. Enter the **Pass Threshold** and, optionally, the **Grade Ranges JSON** that maps score ranges to letter grades.
3. Tick **Active** and click the matching button: **Save School Grading**, **Save College Grading** or **Save University Grading**.

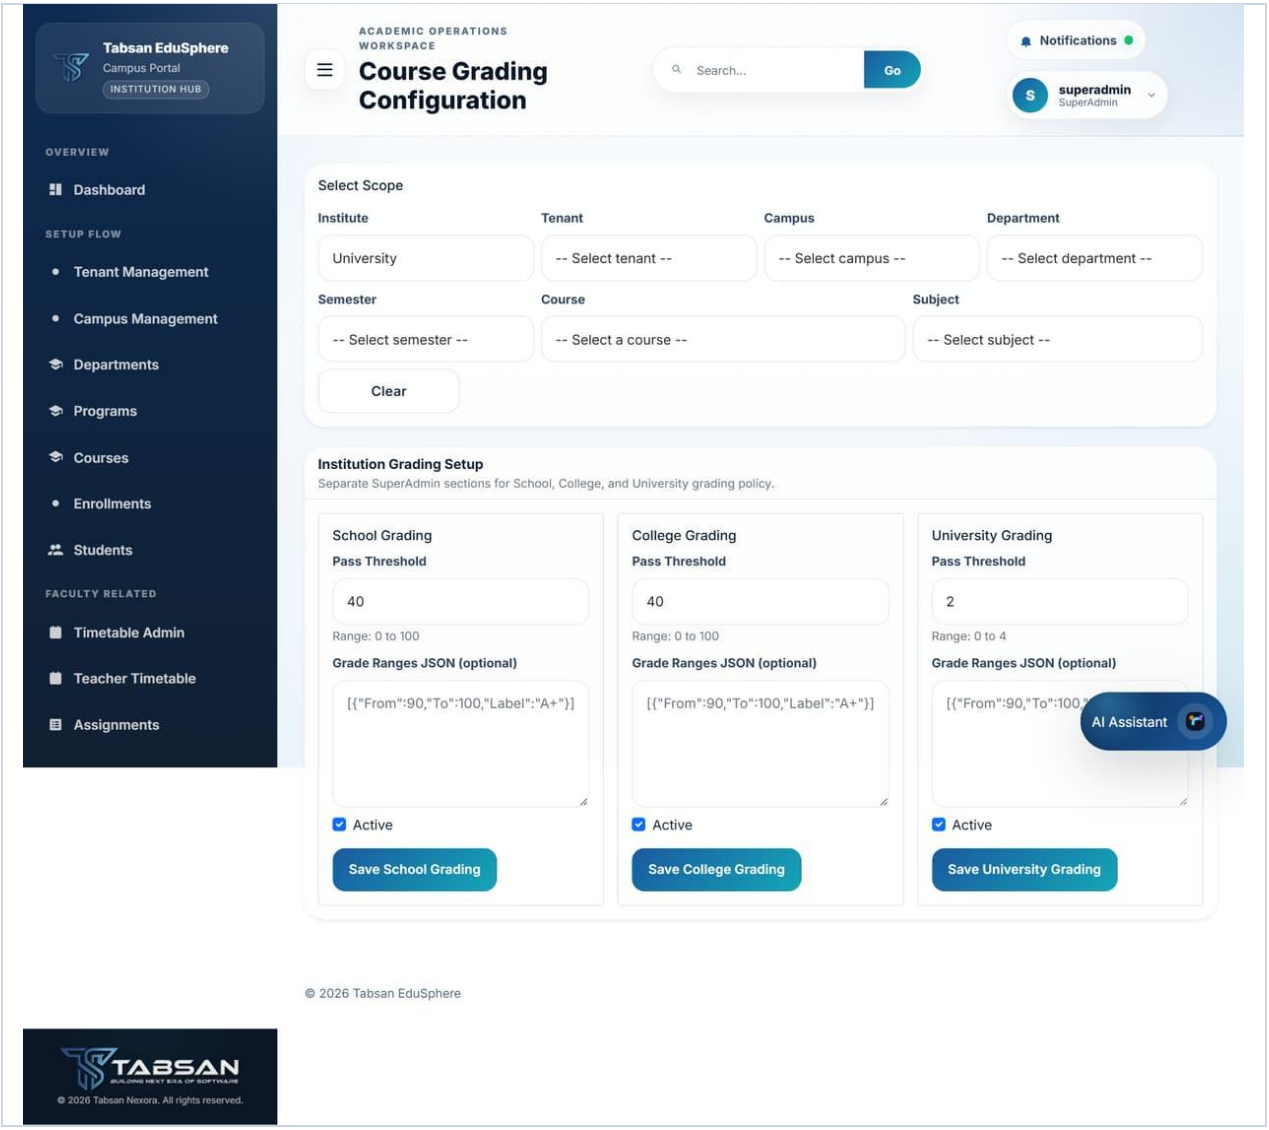

Figure 8.3 *Grading Config (SuperAdmin)*

8.4 Prerequisites

Available to: SuperAdmin, Admin

A prerequisite is a course a student must pass before they can enrol in another, for example CS101 before CS201. The page lists every course with the number of prerequisites it has.

Procedure

1. Find the course in the list.

© 2026 Tabsan Nexora. All rights reserved.

2. Click **Add Prerequisite** and choose the course that must be passed first.
3. To remove a requirement, click **Remove** next to it.

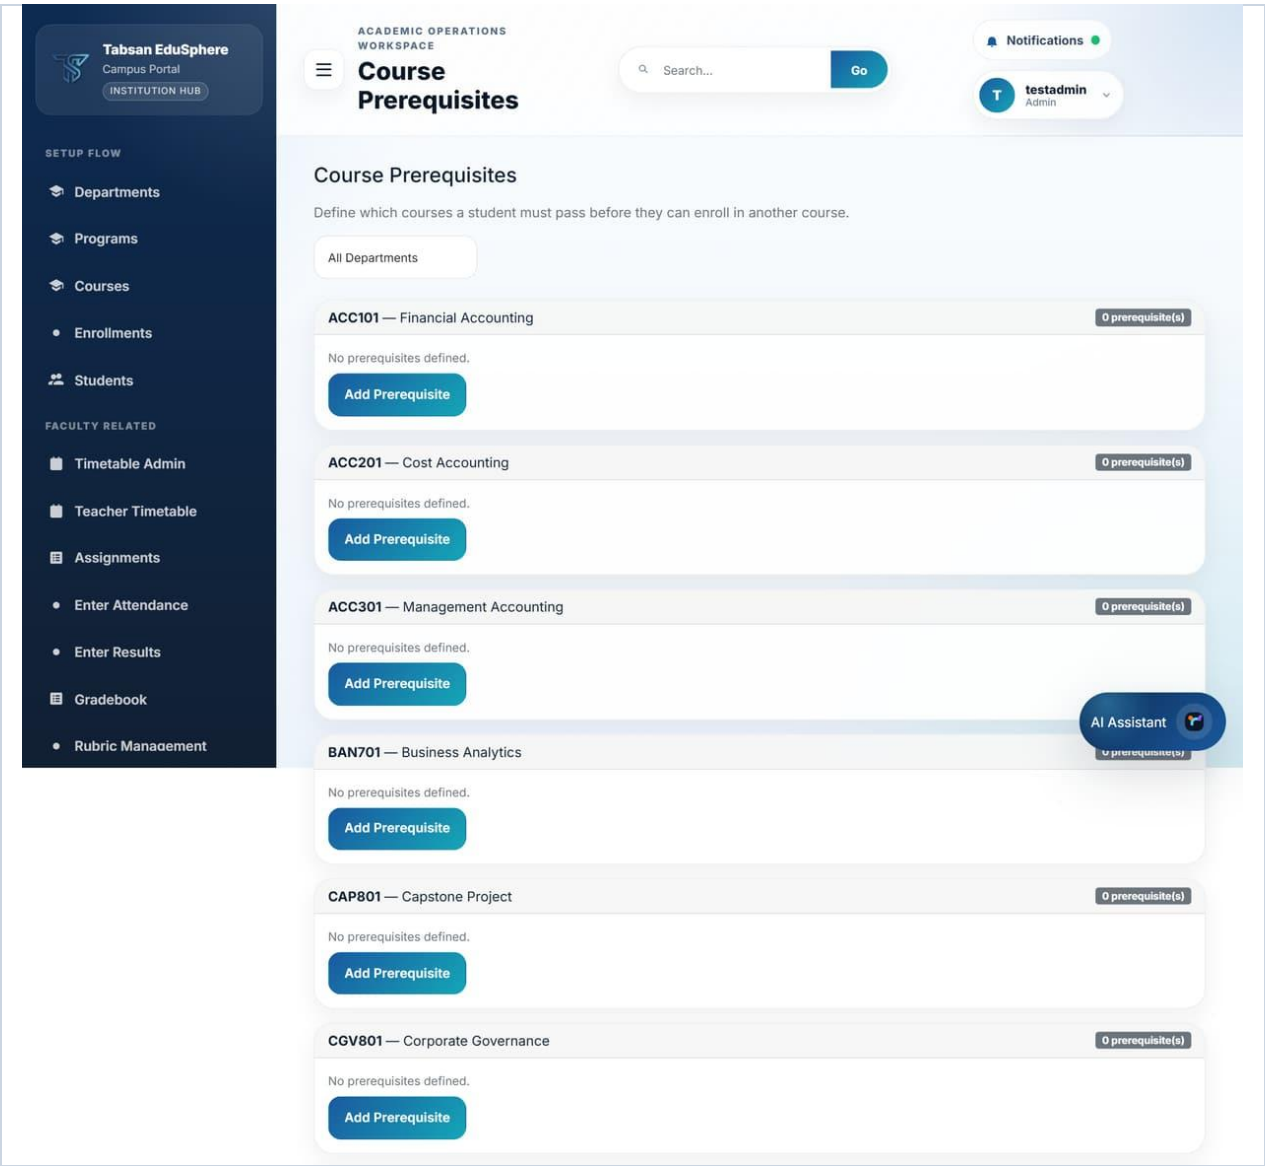

Figure 8.4 *Course Prerequisites*

What happens next

When a student, or an Admin on their behalf, tries to enrol in the course, the portal checks the student's published results and blocks the enrolment if a prerequisite has not been passed.

8.5 Student Lifecycle

Available to: SuperAdmin, Admin

Student Lifecycle moves students forward at the end of each term. **Promote** moves an eligible student to the next semester or class; **Graduate** completes the program for a student in the final level.

A student is eligible for promotion when their result for the level meets the pass threshold set in Grading Config.

© 2026 Tabsan Nexora. All rights reserved.

Before you start

- Results for the level are published, so eligibility can be calculated.

Procedure

1. Open **Student Lifecycle** and choose the **Department**.
2. Choose the **Semester** (or **Class**). The students at that level are listed with their standing.
3. Click **Promote** for each eligible student, or **Graduate** for a student in the final level.

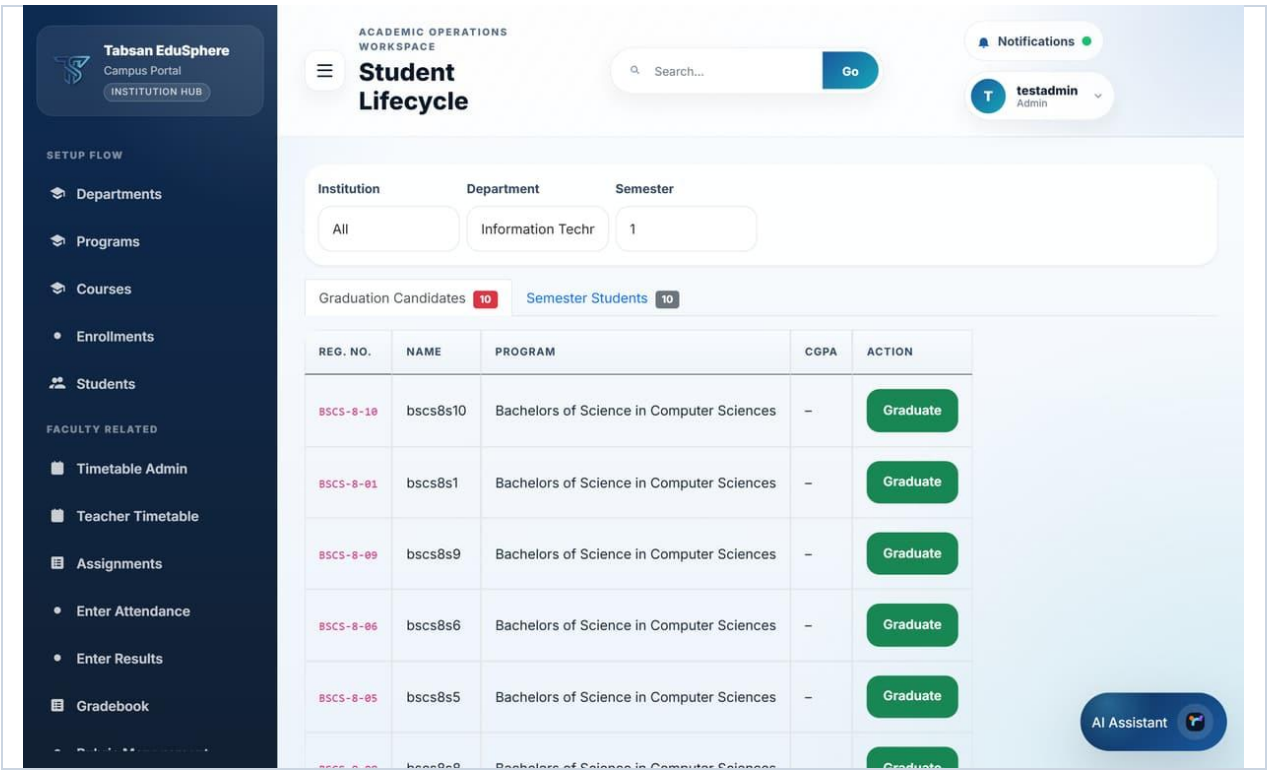

Figure 8.5 *Department selected*

© 2026 Tabsan Nexora. All rights reserved.

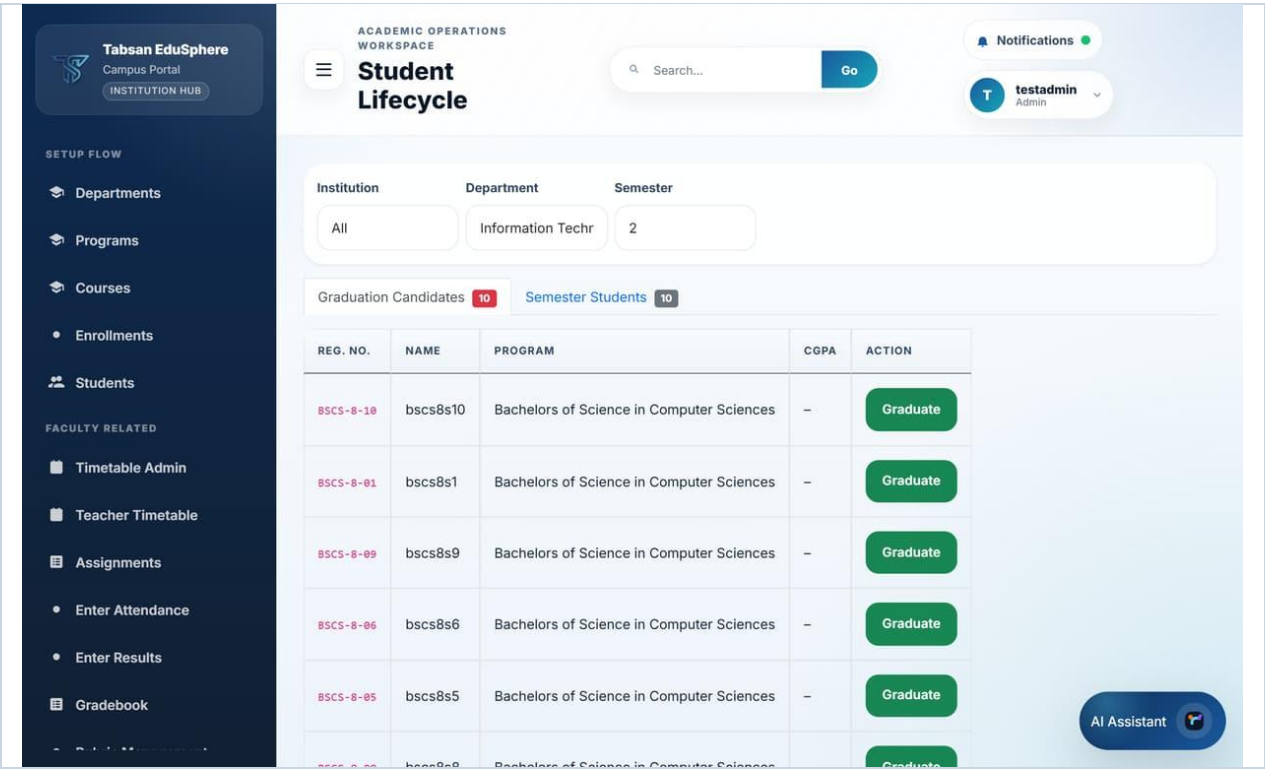

Figure 8.6 *Students in the selected semester*

What happens next

Promoted students move to the next level and appear in its lists. Graduated students change to the Graduated status and become eligible for certificates.

> **IMPORTANT** University students must have their FYP created before the final promotion, because promoting past the last semester graduates the student automatically.

8.6 Study Plan

Available to: SuperAdmin, Admin, Faculty

A study plan records the courses a student intends to take in future semesters. Plans are reviewed by an academic advisor, which helps students avoid missing prerequisites or required courses.

Procedure

1. Choose the **Department** and the **Student**, then click **Create** to start a plan.
2. Open the plan and add the courses the student intends to take. The portal can also suggest courses through its recommendations.
3. The advisor (Faculty) reviews the plan, adds advisor notes, and endorses or rejects it.

© 2026 Tabsan Nexora. All rights reserved.

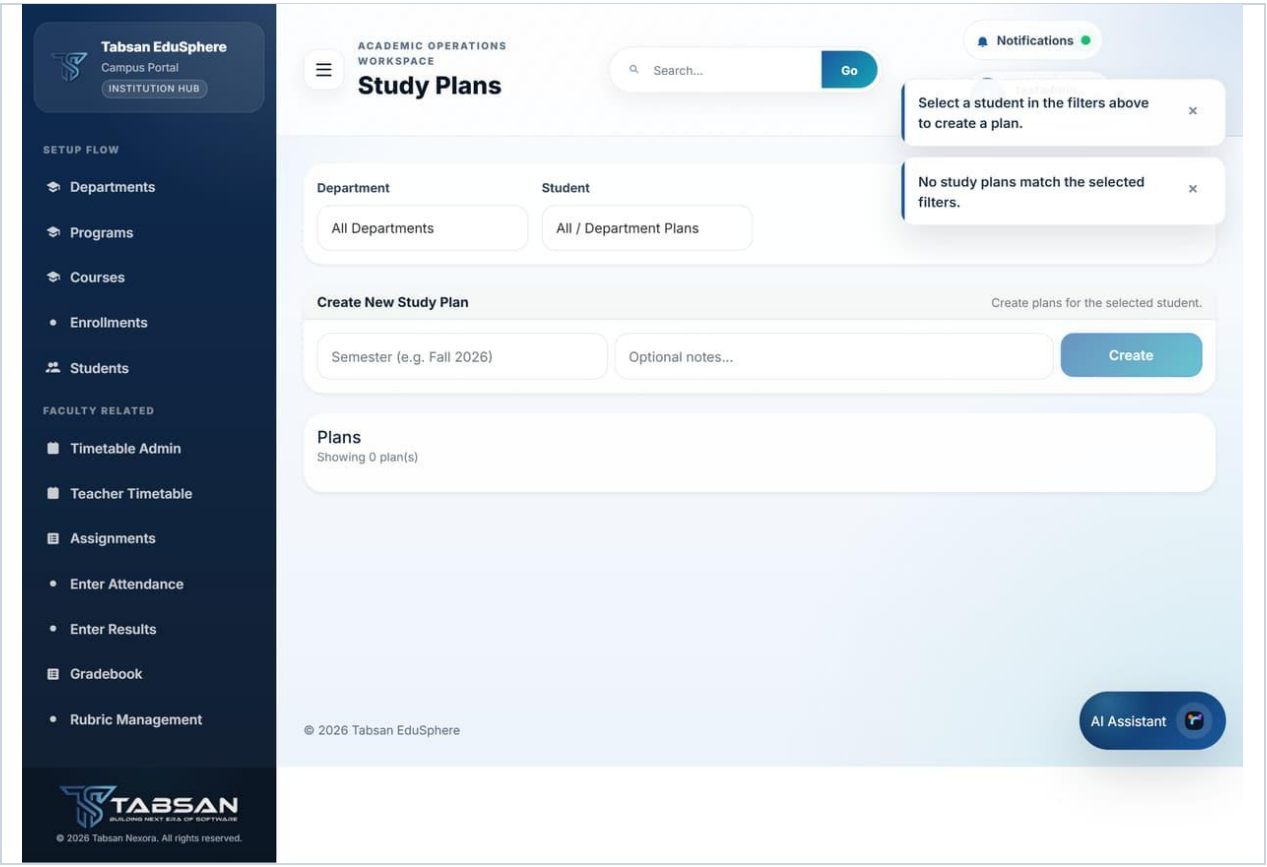

Figure 8.7 *Study Plan*

Study plan statuses

Status	Meaning
Pending	Waiting for advisor review.
Endorsed	Approved by the advisor.
Rejected	Returned with advisor notes; update and resubmit.

8.7 Final Year Projects (FYP)

Available to: SuperAdmin, Faculty

FYP tracks final year projects for University students in their last semester: the project title, the student, the supervisor, the department, the status and the final result. Supervisors also schedule meetings, which appear under **Upcoming Meetings**.

Procedure

1. A project is registered with **+ Create Project** (or proposed by the student), giving the **Title**, **Description**, **Department** and **Student**.
2. The project is reviewed and approved or rejected. An Admin or SuperAdmin assigns the **Supervisor**.
3. During the semester the supervisor holds meetings and tracks progress.
4. When the work is finished, completion is requested and approved, then the supervisor clicks **Enter Result** to record the FYP result and marks the project **Complete**.

© 2026 Tabsan Nexora. All rights reserved.

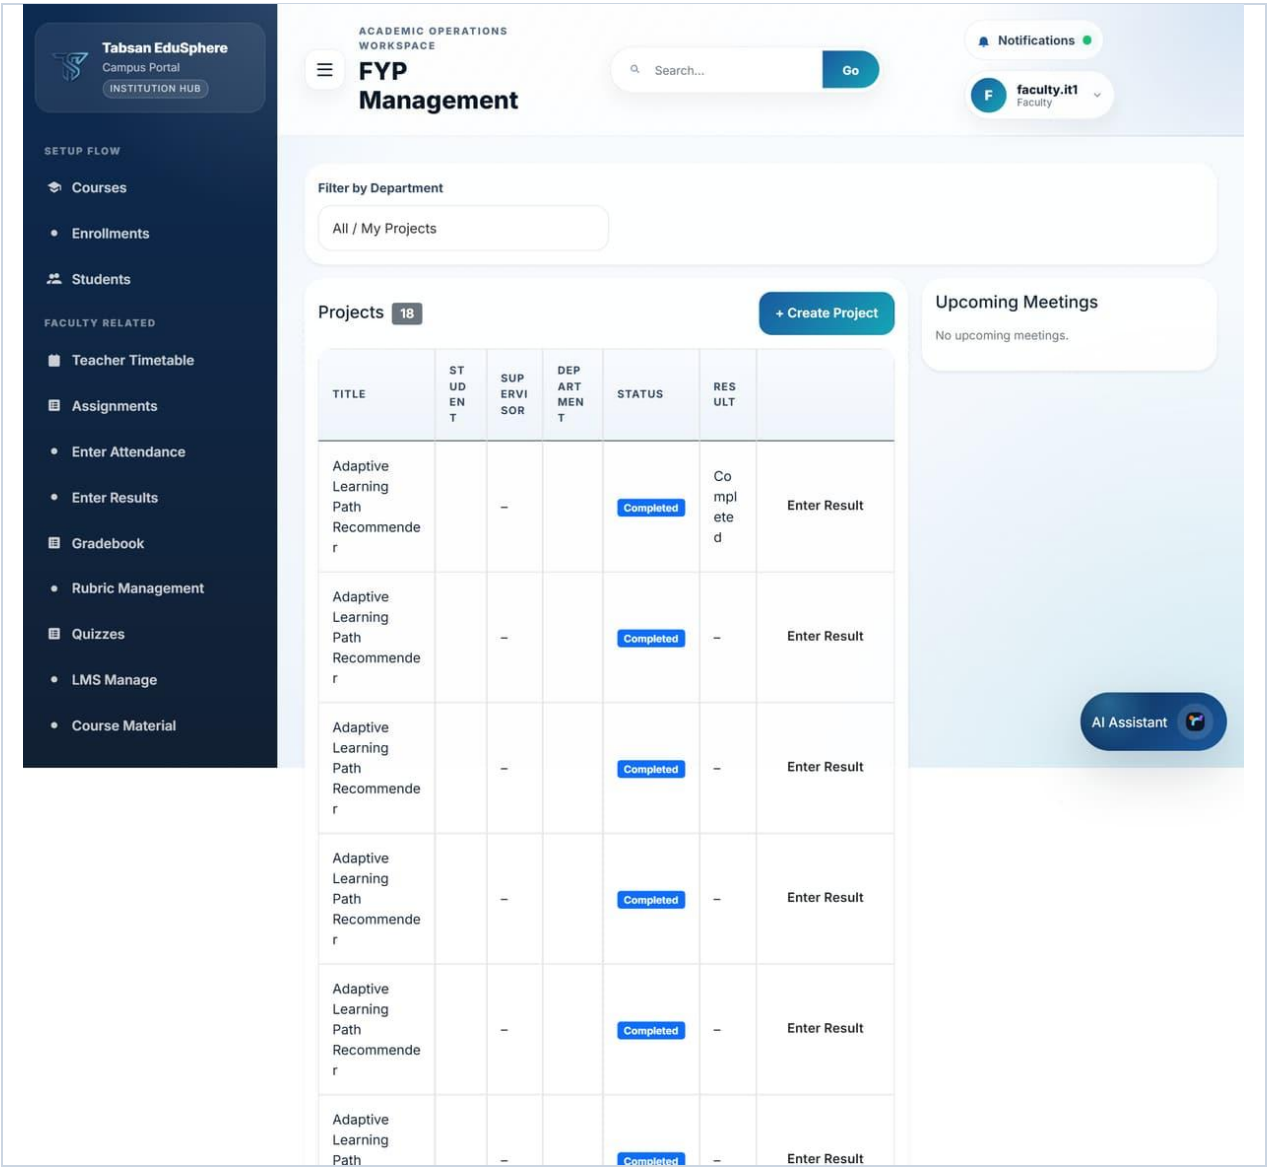

Figure 8.8 *FYP (Faculty view)*

FYP statuses

Status	Meaning
Proposed	Submitted for approval.
Under Review	Being reviewed by the department.
Approved	Accepted; work can start.
In Progress	Work is under way with a supervisor.
Completed	Finished and graded. Required before graduation.
Rejected	Not accepted; a new proposal is needed.

© 2026 Tabsan Nexora. All rights reserved.

9 Graduation and Certificates

Graduation applies to University programs. The portal checks each student against the program's degree rule, takes the application through a three-stage approval, and then makes certificates available.

9.1 Degree Rules

Available to: SuperAdmin (edit), Admin and Faculty (view)

A degree rule sets what a University program requires before a student can graduate. Without a rule, the degree audit for that program reports "No degree rule has been configured".

Procedure

1. Choose the **Academic Program**.
2. Enter the minimum total, core and elective credits and the minimum GPA.
3. Click **Create Rule**. Existing rules are listed below, with **Delete** to remove one.

Fields and options

Field	What to enter or choose
Min Total Credits	The total credit hours the student must complete.
Min Core Credits / Min Elective Credits	How many of those credits must come from core courses and from electives.
Min GPA	The lowest CGPA allowed for graduation, for example 2.00.

© 2026 Tabsan Nexora. All rights reserved.

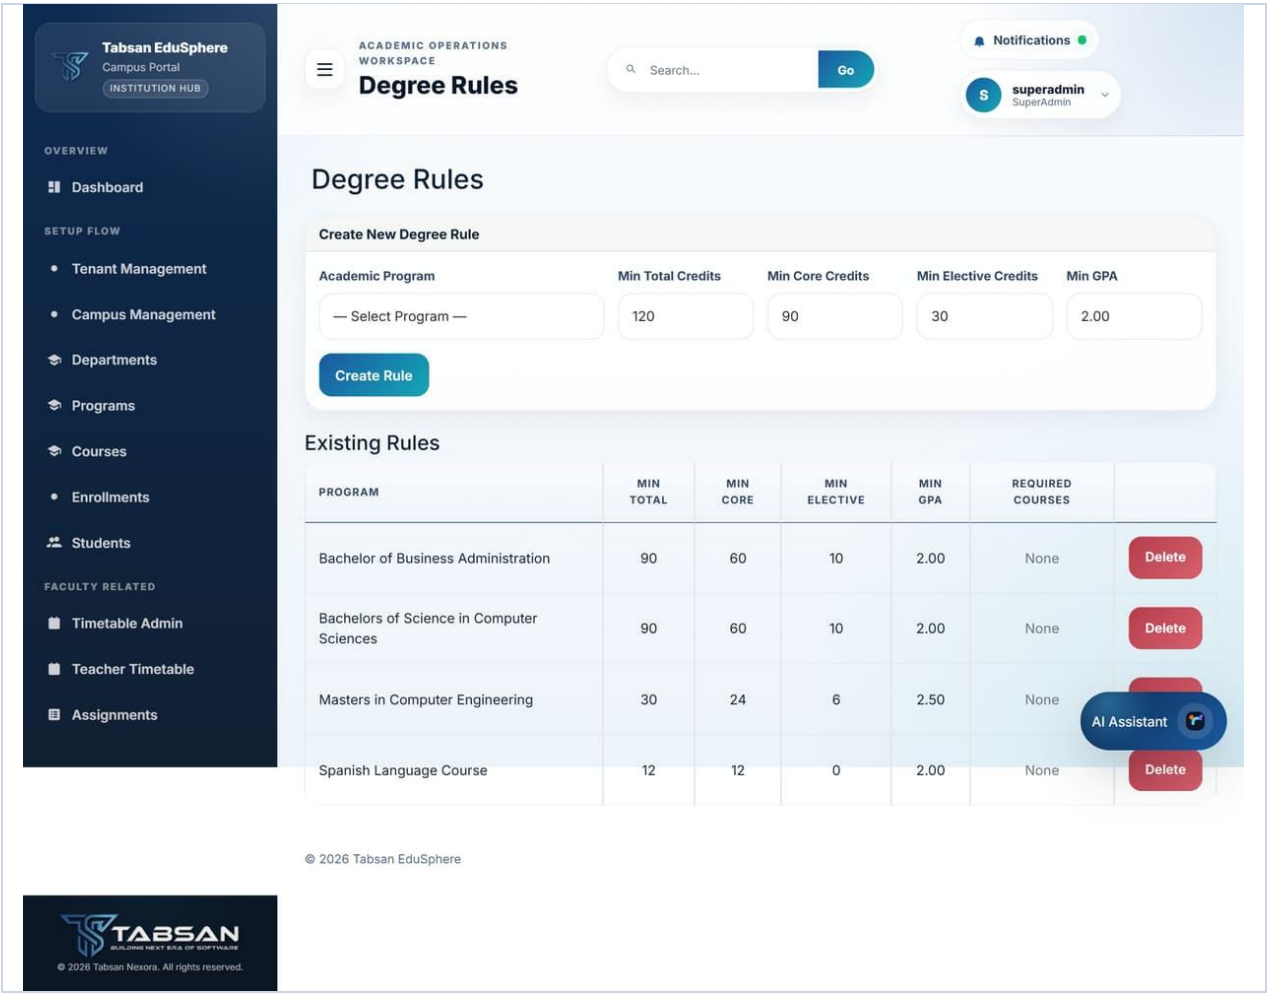

Figure 9.1 *Degree Rules*

9.2 Degree Audit

Available to: SuperAdmin, Admin, Faculty, Student

Degree Audit compares a student's completed courses with the program's degree rule and shows what is still missing. Staff choose a **Student** and click **Load Audit**. Students see their own audit straight away.

The audit lists completed courses with their credits, type (core or elective) and grade points, and an **Unmet Requirements** box such as "Total credits: 84/90 required".

© 2026 Tabsan Nexora. All rights reserved.

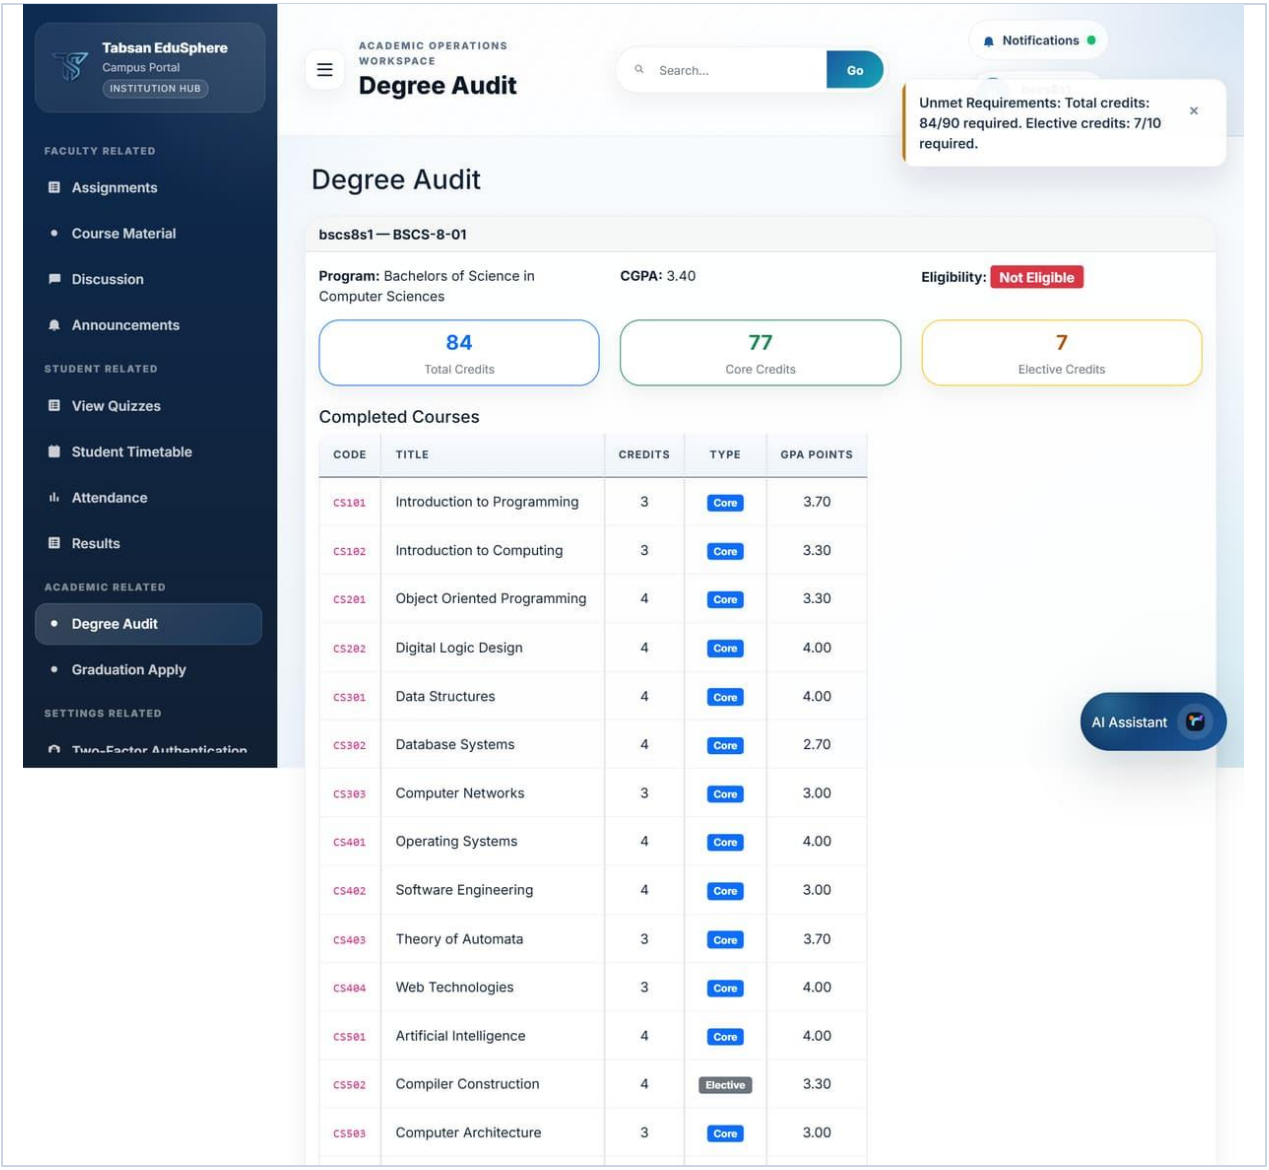

Figure 9.2 *Degree Audit (Student view)*

Good to know

- Students should check their degree audit at the start of the final year, so any missing courses can still be taken.

9.3 Graduation Eligibility

Available to: SuperAdmin, Admin, Faculty

Graduation Eligibility lists students with their credits earned, CGPA, unmet requirements and eligibility status, so staff can see who is ready to graduate. Click **View Audit** for the detail behind a student's status. Faculty see the students of their own departments.

© 2026 Tabsan Nexora. All rights reserved.

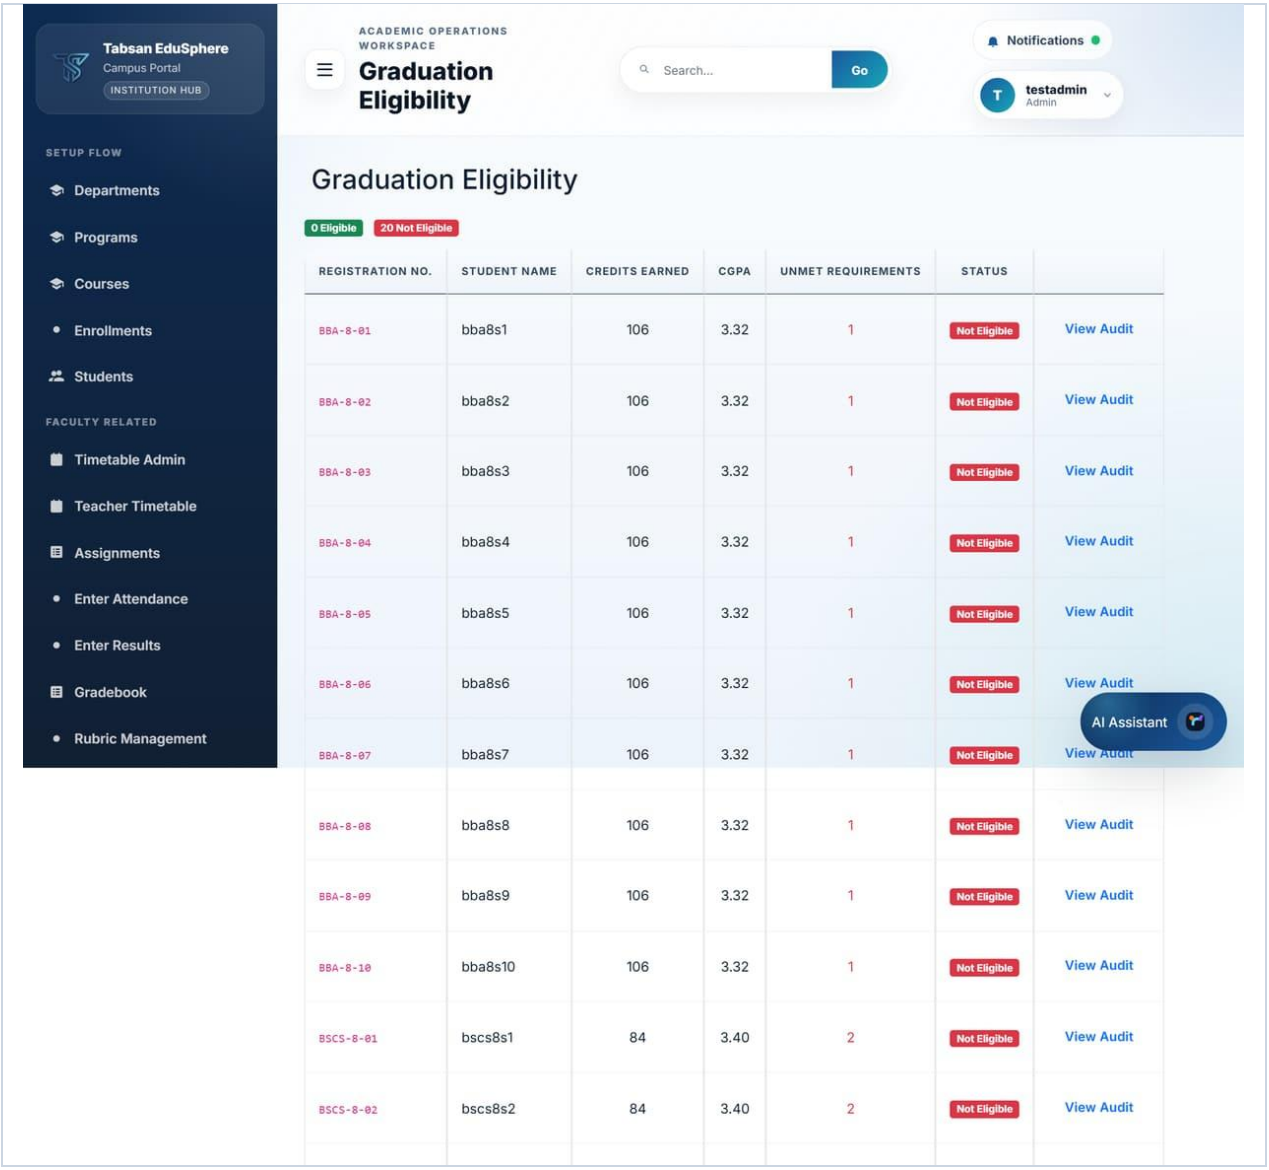

Figure 9.3 *Graduation Eligibility*

9.4 Applying for graduation (Students)

Available to: Student

An active University student in the final semester with a completed FYP can apply for graduation from the portal.

Before you start

- Your degree audit shows no unmet requirements, and your FYP status is Completed.

Procedure

1. Open **Graduation Apply**.
2. Optionally add a **Personal Note** for the reviewers.
3. Click **Submit Application**. Your application and its current stage are shown on the same page.

© 2026 Tabsan Nexora. All rights reserved.

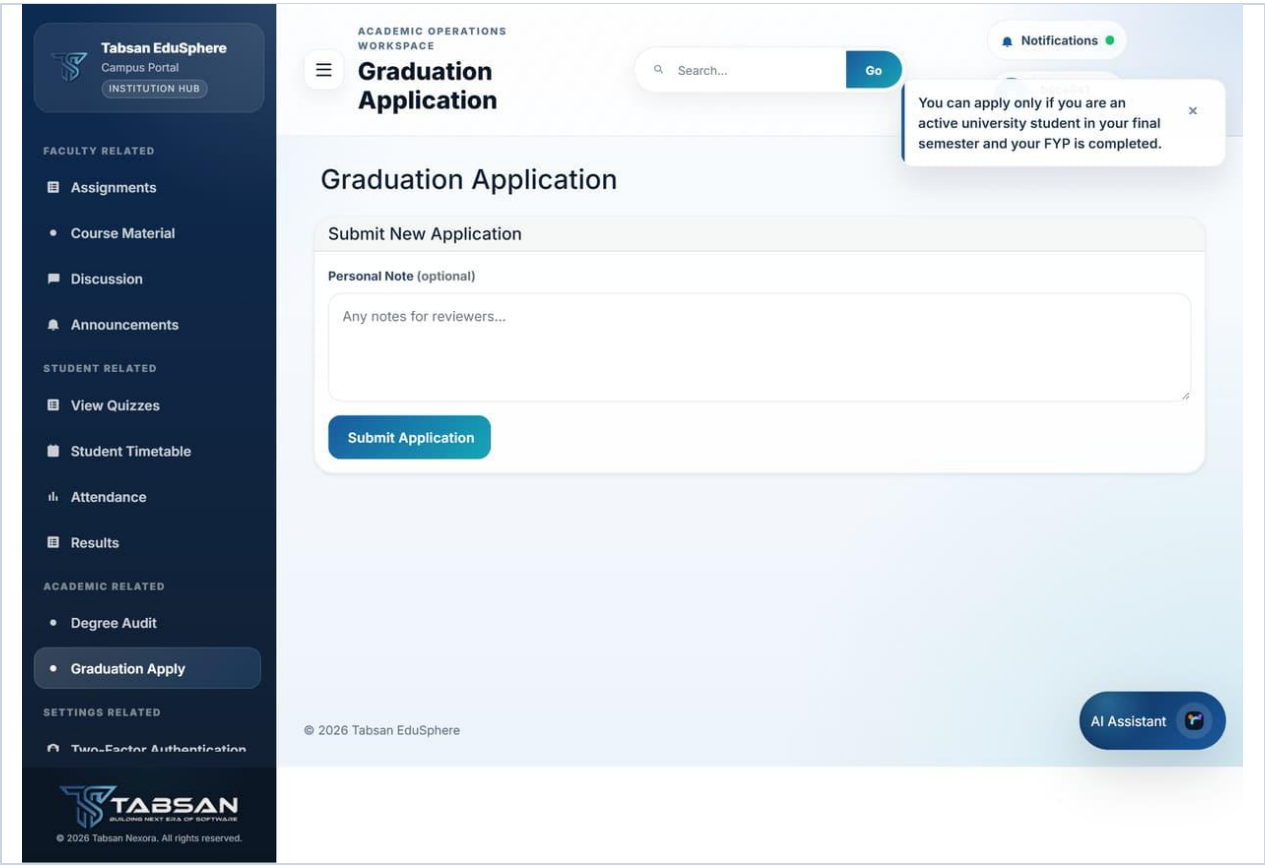

Figure 9.4 *Graduation Application (Student)*

9.5 Graduation Applications

Available to: SuperAdmin, Admin, Faculty

Applications are approved in three stages: first by Faculty, then by an Admin, and finally by a SuperAdmin. Any of these approvers can reject an application at their stage.

Procedure

1. Open **Graduation Applications**.
2. Filter by **Status** and **Department** and click **Filter**.
3. Click **View** on an application, review the student's audit, and approve or reject it.

© 2026 Tabsan Nexora. All rights reserved.

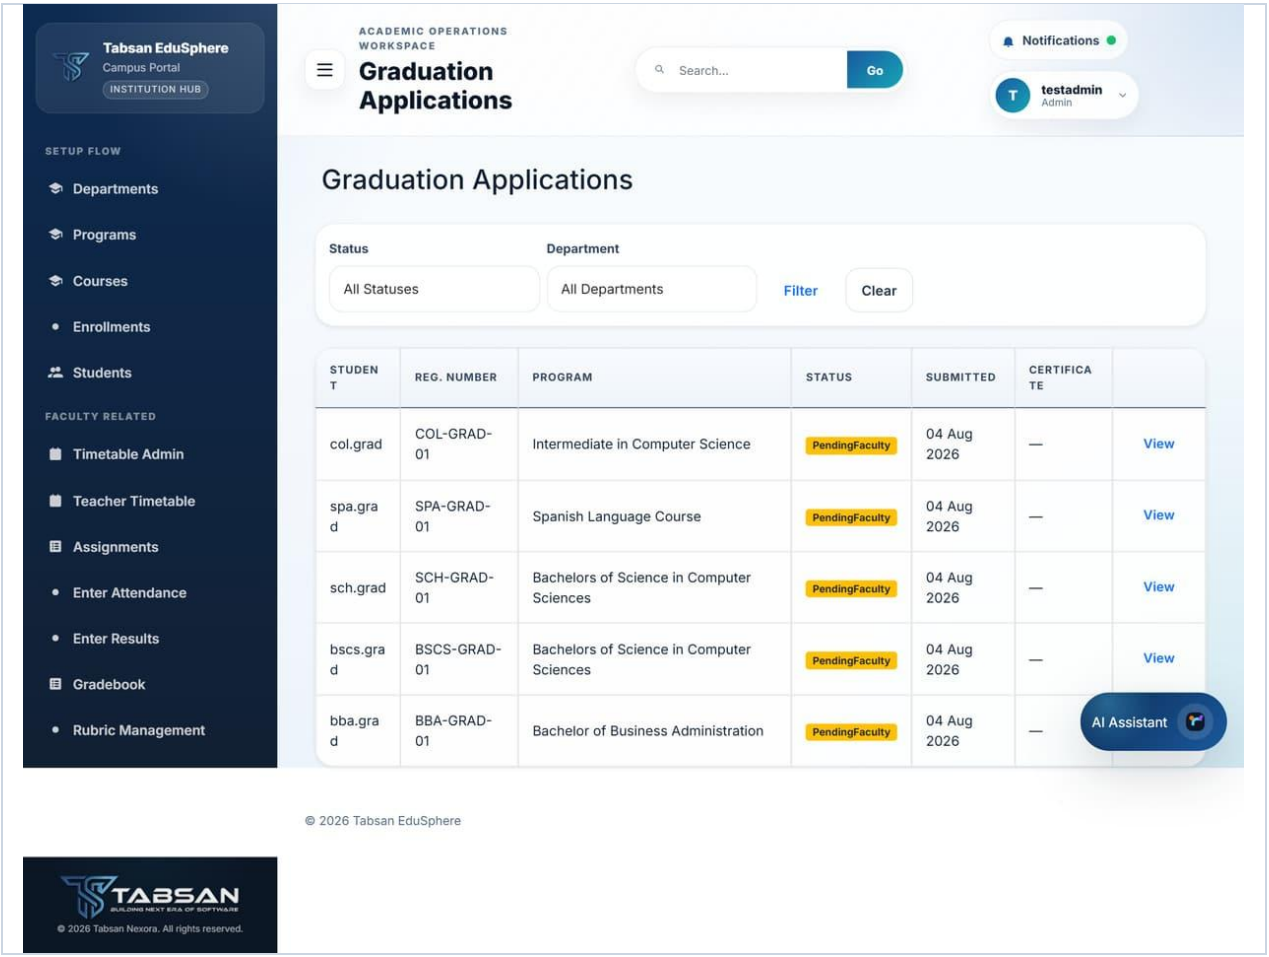

Figure 9.5 *Graduation Applications*

Application statuses

Status	Meaning
Pending Faculty	Waiting for a Faculty approver.
Pending Admin	Approved by Faculty; waiting for an Admin.
Pending Final Approval	Approved by an Admin; waiting for the SuperAdmin.
Approved	Graduation approved; the certificate becomes available.
Rejected	Not approved. The student can see the outcome on their application and should speak to their department.

9.6 Generate Certificates

Available to: SuperAdmin, Admin, Faculty

Generate Certificates produces official documents for students: degree certificates and transcripts for University graduates, and completion certificates and report cards for School and College students. Files are named with the registration number and document type.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Generate Certificates** and filter by institution, department, course and class; use **Search Students** to find a student, then click **Apply**.
2. In the student's row, choose the document type and click **Generate**. The generated files are listed under Certificates for download.
3. Under **Certificate Templates**, use **Download Default** to get the standard layout, or **Import Template** to upload your institution's own design.

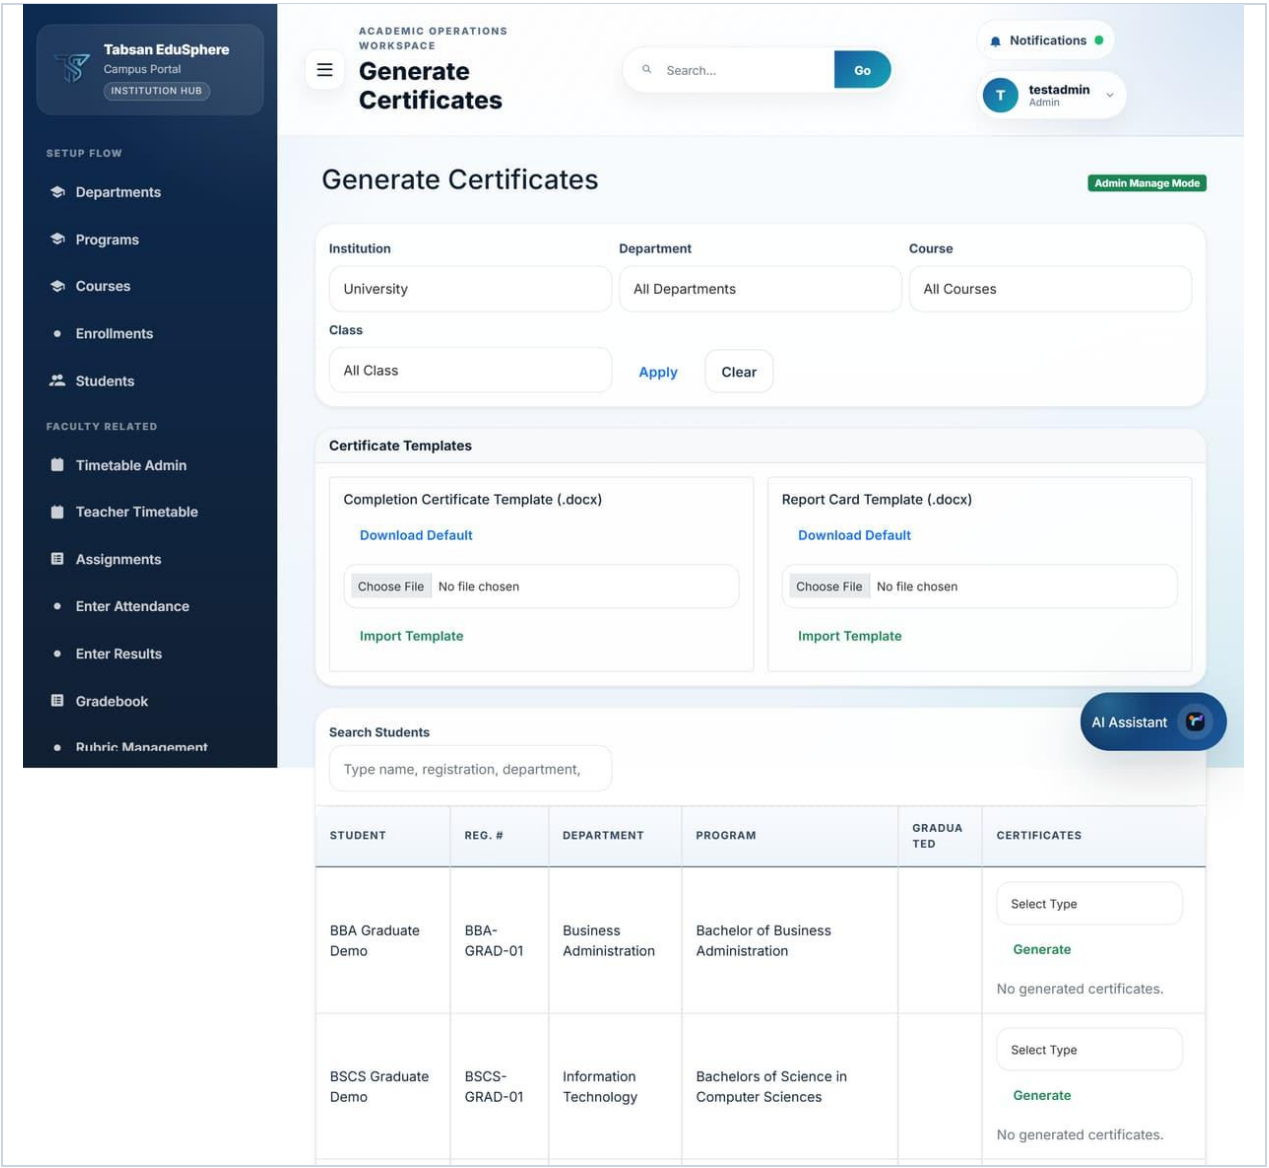

Figure 9.6 *Generate Certificates*

Good to know

- Degree certificates are available only for University graduates. School completion certificates require Class 10, and College ones require Class 11 and 12 results.

© 2026 Tabsan Nexora. All rights reserved.

10 Reports and Analytics

Reports produce lists and summaries you can view on screen and download, while Analytics shows trends as charts.

10.1 Report Center

Available to: SuperAdmin, Admin, Faculty, Finance

Report Center lists the reports your role may run, as cards. Finance users see only the Payment Summary; students do not have reports.

Report	What it shows
Attendance Summary	Attendance totals and percentages by offering and student.
Enrollment Summary	Enrolment counts by department, program and semester.
FYP Status Report	Final year projects with supervisor, status and result.
GPA & CGPA Report	Semester GPA and CGPA per student (University only).
Low Attendance Warning	Students below the attendance threshold (default 75%).
Payment Summary	Fee receipts by status and amount.
Result Summary	Marks and grades by subject and exam type.
Semester Results	Results for a whole semester or class.
Student Transcript	A student's full academic record.

Procedure

1. Open **Report Center** and click a report card.
2. Choose the filters (for example **Department** and **Program**) and click **Filter**. Some reports need a particular filter: Semester Results needs a semester, and Student Transcript needs a student.
3. Review the results on screen. A summary line shows the number of records and key totals.
4. Click **Excel**, **CSV** or **PDF** to download the report in that format.

© 2026 Tabsan Nexora. All rights reserved.

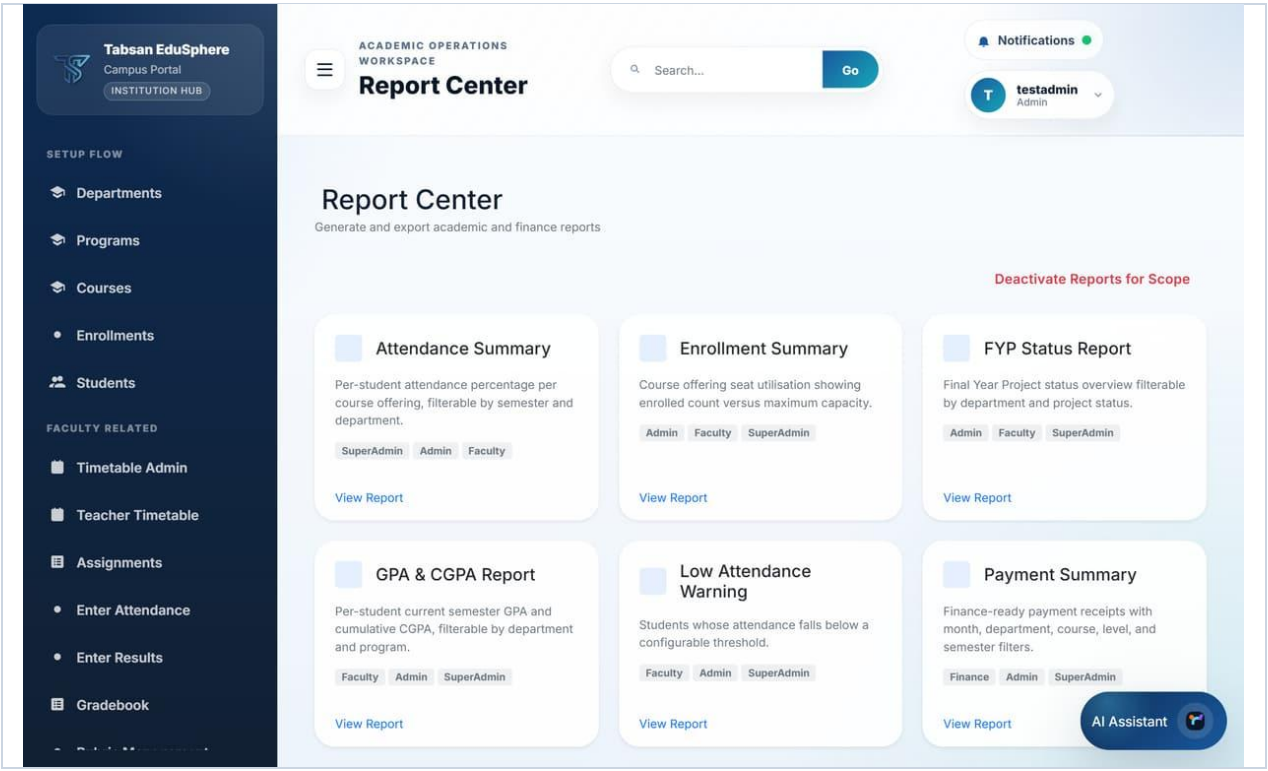

Figure 10.1 *Report Center*

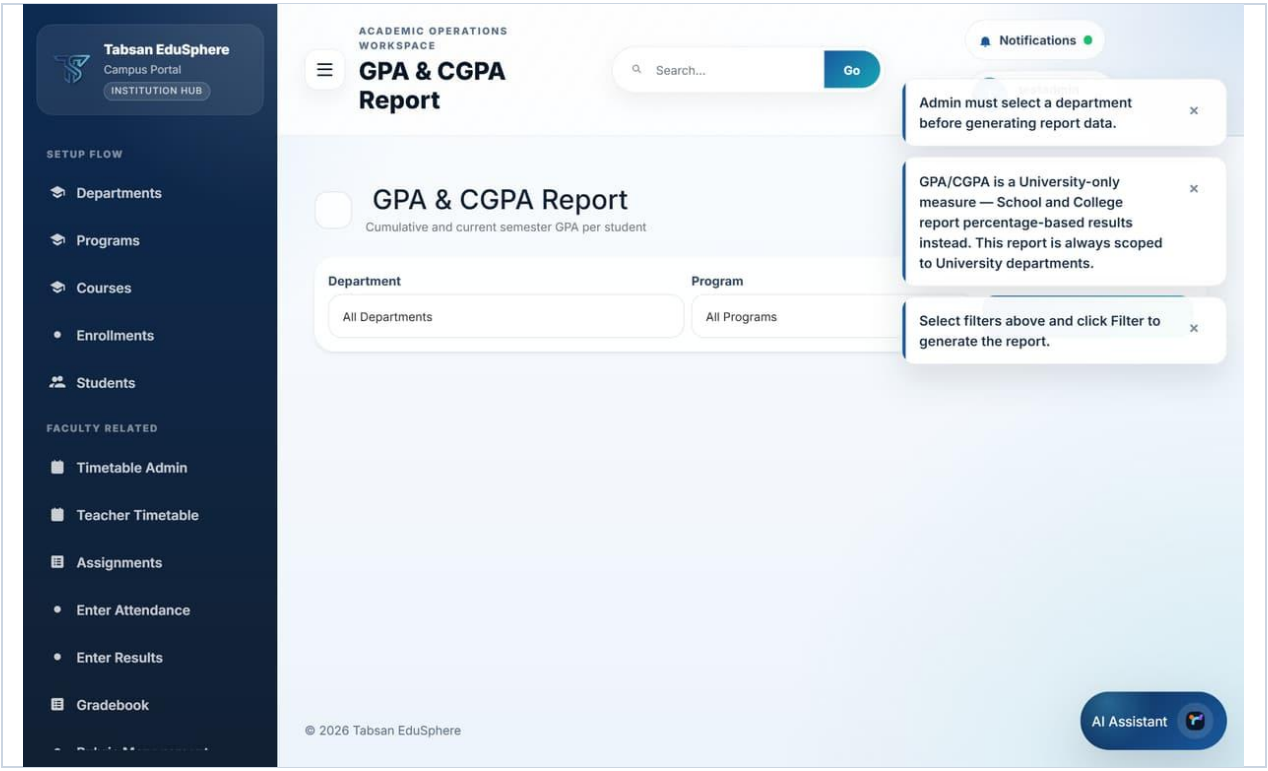

Figure 10.2 *Report filters*

© 2026 Tabsan Nexora. All rights reserved.

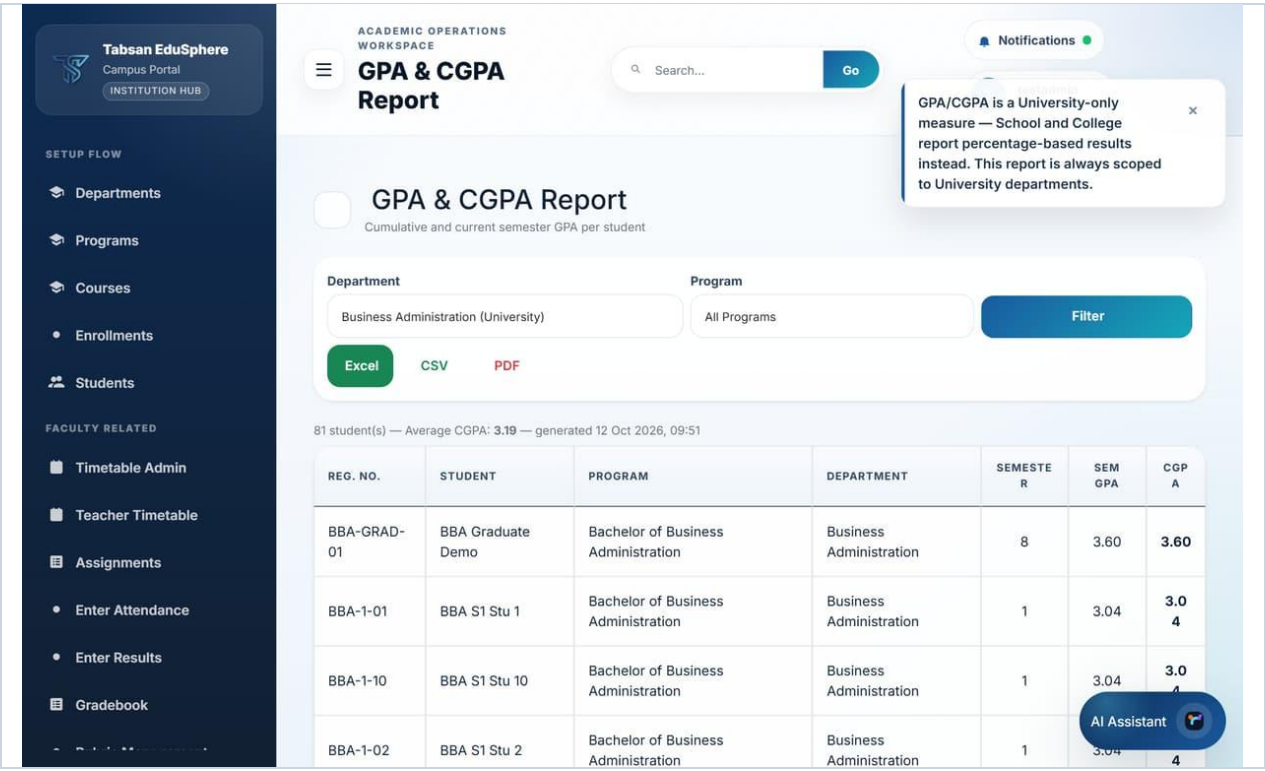

Figure 10.3 *GPA & CGPA Report generated, with export buttons*

Good to know

- Excel is best for further analysis, CSV for importing into other systems, and PDF for printing or sharing.
- Reports reflect published data only; unpublished marks are not included.

> **NOTE** Admins must choose a department before a report generates. SuperAdmin can switch reports off for a tenant or campus with Deactivate Reports for Scope.

10.2 Analytics

Available to: SuperAdmin, Admin, Faculty, Finance

Analytics gives an overview of performance, attendance and assignments, with headline figures (for example average marks and overall attendance) and charts of trends over time, plus a student table you can sort and review.

Procedure

1. Open **Analytics**.
2. Choose the institute, campus, department, course and semester/class you are interested in, and click **Apply Filters**.
3. Read the headline cards and charts. Click **Reset** to clear the filters.

© 2026 Tabsan Nexora. All rights reserved.

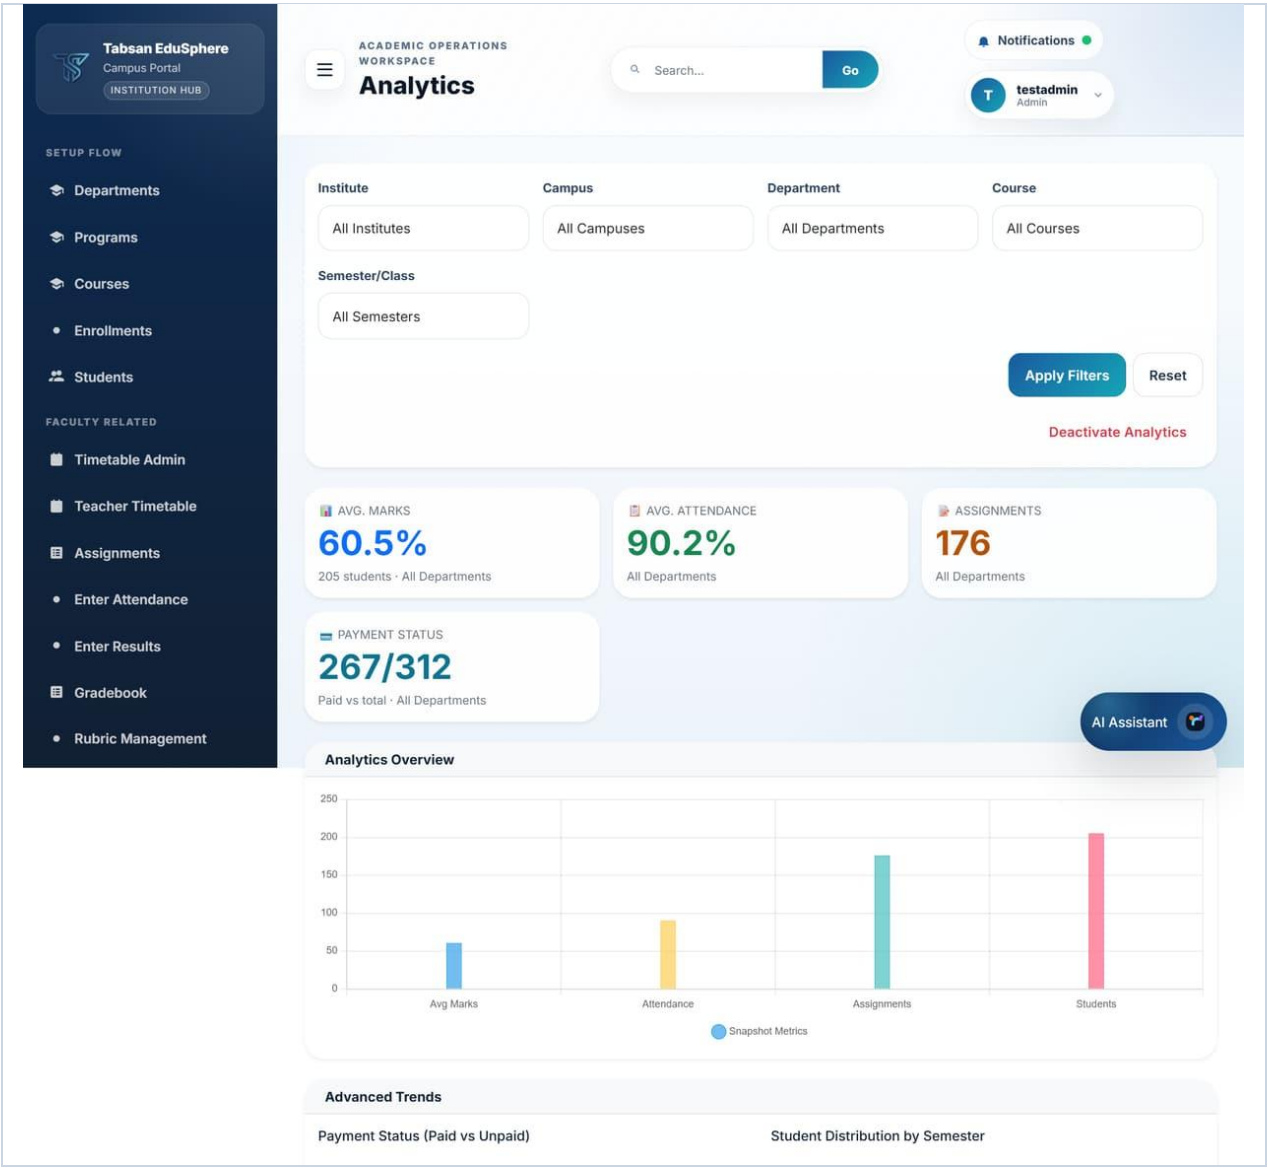

Figure 10.4 *Analytics overview*

© 2026 Tabsan Nexora. All rights reserved.

11 Finance

Finance covers fee receipts: issuing them to students, recording payment and keeping the totals accurate.

11.1 Fee receipts (Payments)

Available to: SuperAdmin, Admin, Finance

Payments manages fee receipts from creation to confirmation. Each receipt belongs to one student and has an amount, a receipt number, a description and a due date. The list shows all receipts with their status, and can be filtered by student and paged with **Previous** and **Next**.

Procedure

1. Open **Payments**.
2. Under **Create Fee Receipt**, choose the **Student**, enter the **Amount**, **Receipt No**, **Description** and **Due Date**.
3. Click **Create**. The receipt starts as Pending.
4. When payment has been received, click **Confirm** on the receipt. It changes to Paid.
5. If a receipt was issued in error, click **Cancel**.
6. For many receipts at once, click **Export Template**, fill in the CSV and upload it with **Import CSV**.

Fields and options

Field	What to enter or choose
Student	The student the fee is for.
Amount	The amount due, in your institution's currency.
Receipt No	Your reference number, for example RCP-2026-0101. Use a unique number for each receipt.
Description	What the fee is for, for example "Semester 3 tuition fee".
Due Date	The date by which the student should pay.

© 2026 Tabsan Nexora. All rights reserved.

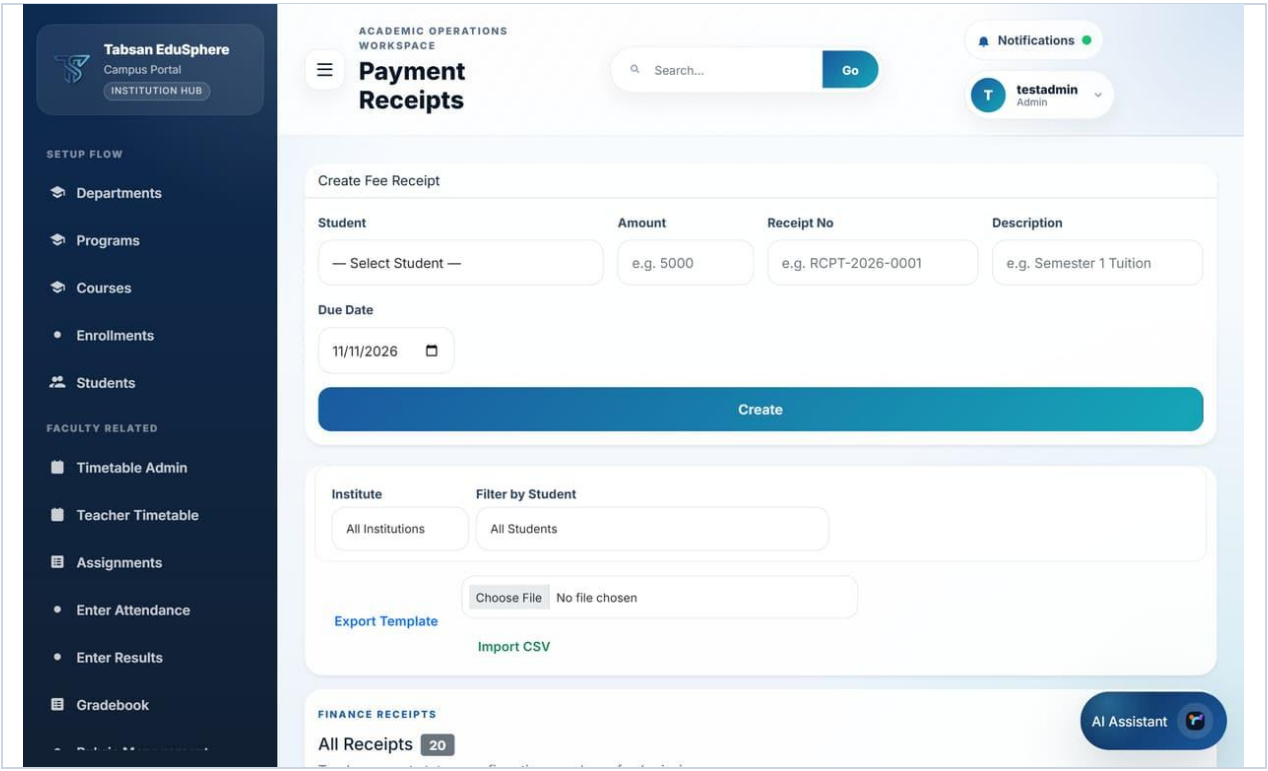

Figure 11.1 *Payments – all receipts*

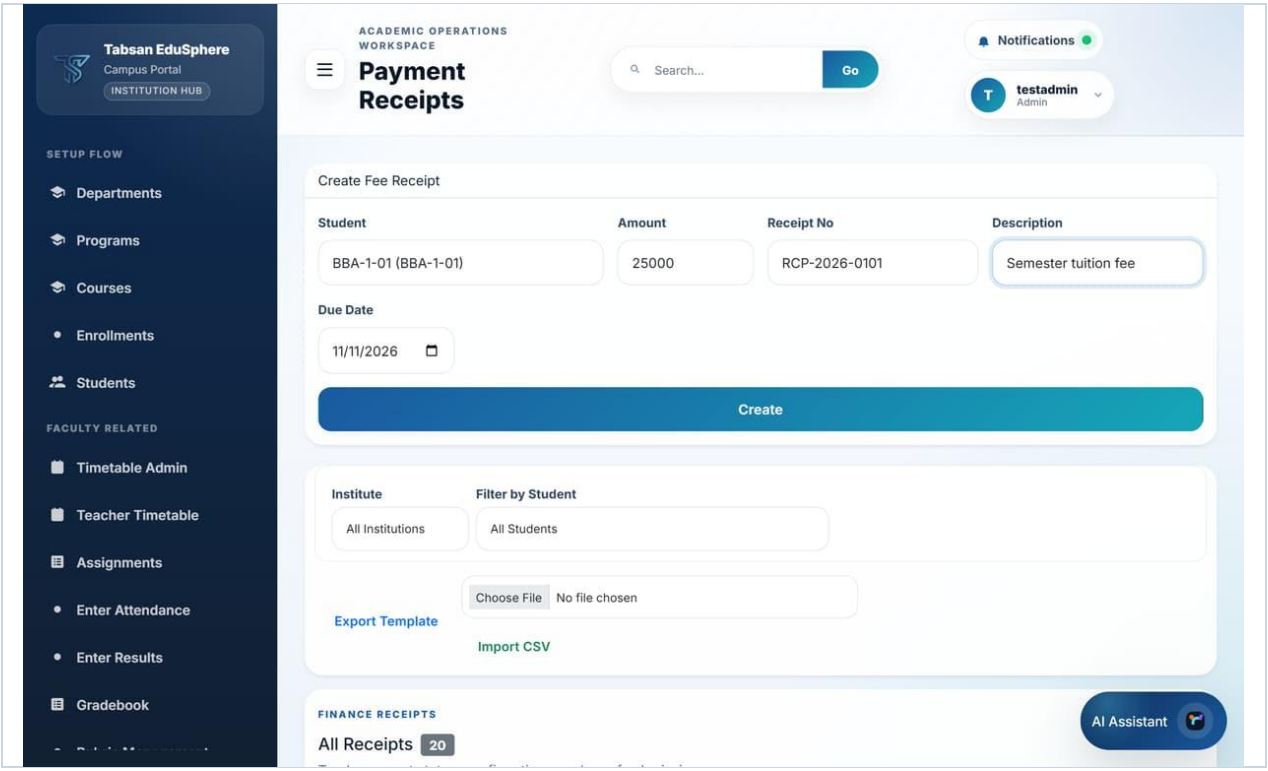

Figure 11.2 *Create Fee Receipt form completed*

Receipt statuses

Status	Meaning
Pending	Issued and waiting for payment.
Submitted	The student has reported payment and supplied proof; waiting for Finance to confirm.

© 2026 Tabsan Nexora. All rights reserved.

Status	Meaning
Paid	Payment confirmed by Finance or an Admin. Cannot be cancelled.
Cancelled	Withdrawn. Hidden from the student's own list but kept for audit.

TIP Use Filter by Student to see one student's payment history, and Report Center > Payment Summary for totals.

© 2026 Tabsan Nexora. All rights reserved.

12 Users, Communication and Personal Settings

This chapter covers creating accounts, keeping your own details and password up to date, notifications, the helpdesk and the look of the portal.

12.1 User Import and creating users

Available to: SuperAdmin, Admin

User Import creates accounts for students, faculty, admins and finance staff, either one at a time with a form or many at once from a CSV file. Every new account starts with the username as its temporary password and must choose a new password at first sign-in.

For students, the import also creates the student's academic profile (registration number, program and department), so they can use the student portal straight away.

Procedure

1. Open **User Import**.
2. Bulk: download **faculty-admin-import-template.csv** or **students-import-template.csv**, fill it in a spreadsheet (Username, Email and Role are required), save it as CSV, choose it in **CSV File** and click **Upload and Import**. Review the import report.
3. Single user: in **Create Single User**, enter the **Username**, **Email**, **Full Name** and **Role**. For a Faculty member choose the **Department**; for a Student choose the **Department** and **Program** and, optionally, a **Registration No.** (it defaults to the username). Mobile number, address and profile photo are optional.
4. Click **Create User**. A message confirms the account was created, or explains why it was not (for example, the username already exists).

Fields and options

Field	What to enter or choose
Username	The sign-in name. Must be unique. Also the temporary password.
Email	Used for notifications and password resets.
Role	Admin, Faculty, Student or Finance. SuperAdmin accounts cannot be created here.
Department (Faculty / Student)	The department the person belongs to.
Program (Student)	The program the student is admitted to. Choose a program of the selected department.
Registration No. (Student)	Optional. The student's registration number; if left blank, the username in capitals is used. Must be unique.
Campus Assignments	Optional. For staff who work on more than one campus: campus IDs separated by a | character.

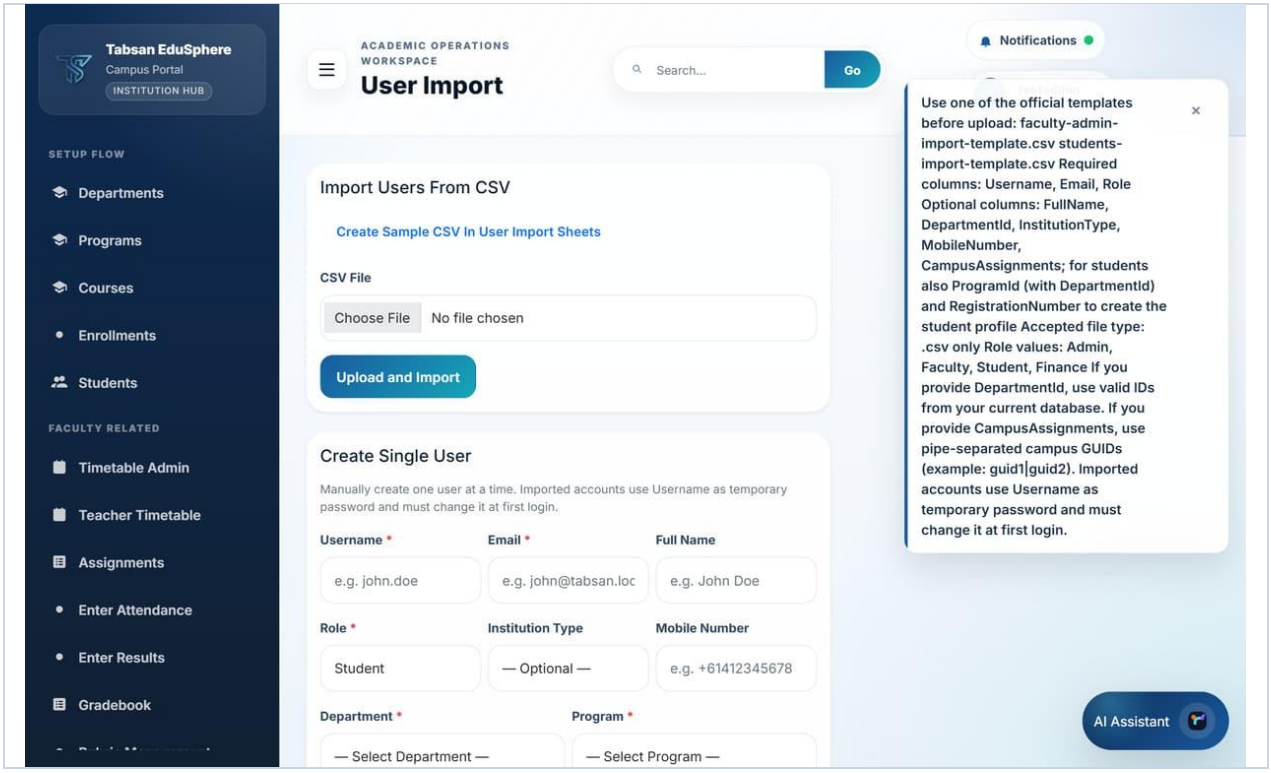

Figure 12.1 *User Import*

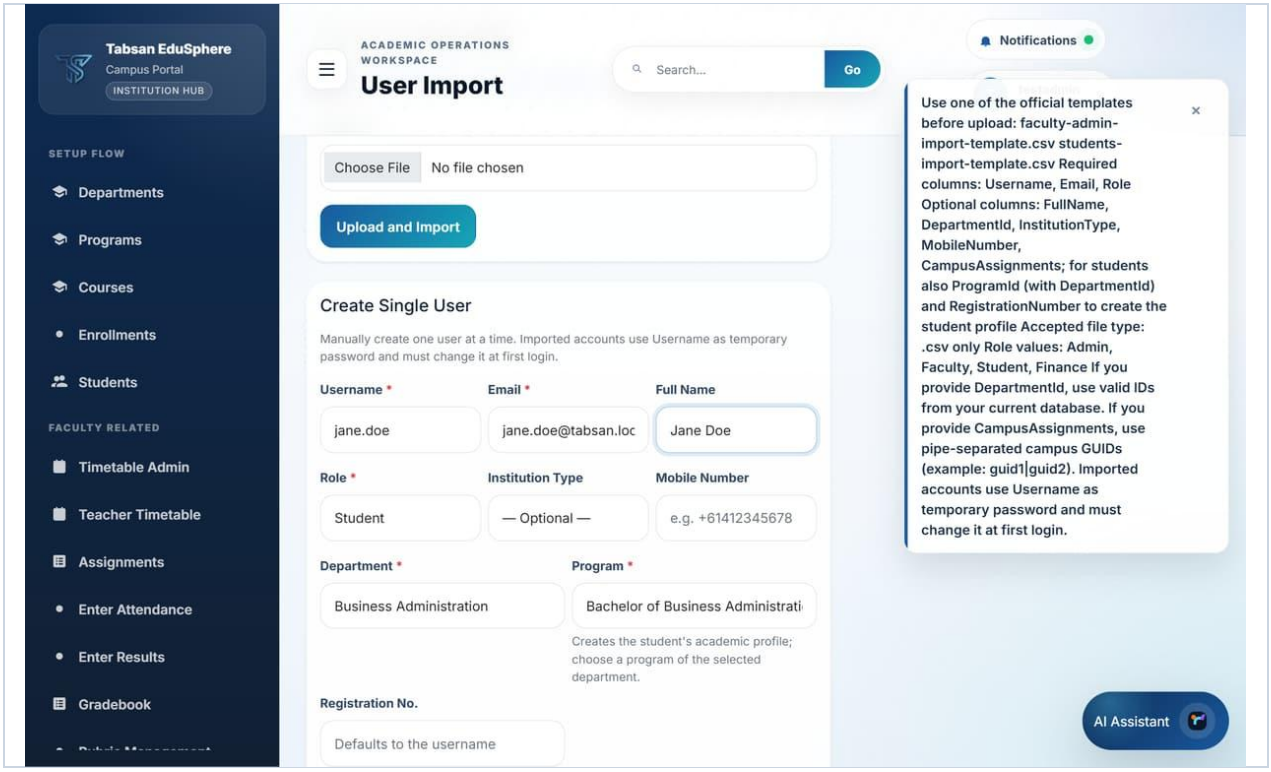

Figure 12.2 *Create Single User form for a student, with Department and Program*

What happens next

The import report shows how many rows were imported, how many were skipped as duplicates, and the reason for any errors, row by row. Fix the rows with errors and import just those rows again.

© 2026 Tabsan Nexora. All rights reserved.

> **TIP** In the students CSV template, fill DepartmentId and ProgramId (and optionally RegistrationNumber) to create each student profile during a bulk import.

12.2 User Settings

Available to: SuperAdmin, Admin, Faculty, Student, Finance

Every user can keep their own details up to date: email, mobile number, address and profile photo. This is also where you change your password.

Admins see an extra user directory on the left. They can search for a user in their scope, edit the user's name and contact details, and reset the user's password to the default when someone is locked out.

Procedure

1. Open **User Settings** from the sidebar or the profile menu.
2. Update your **Email**, **Mobile** or **Address** and click **Save Details**.
3. To change your profile picture, choose an image and click **Upload Photo** (JPG or PNG, up to 2 MB).
4. To change your password, enter your **Current password**, a **New password** and **Confirm new password**, then click **Change Password**.

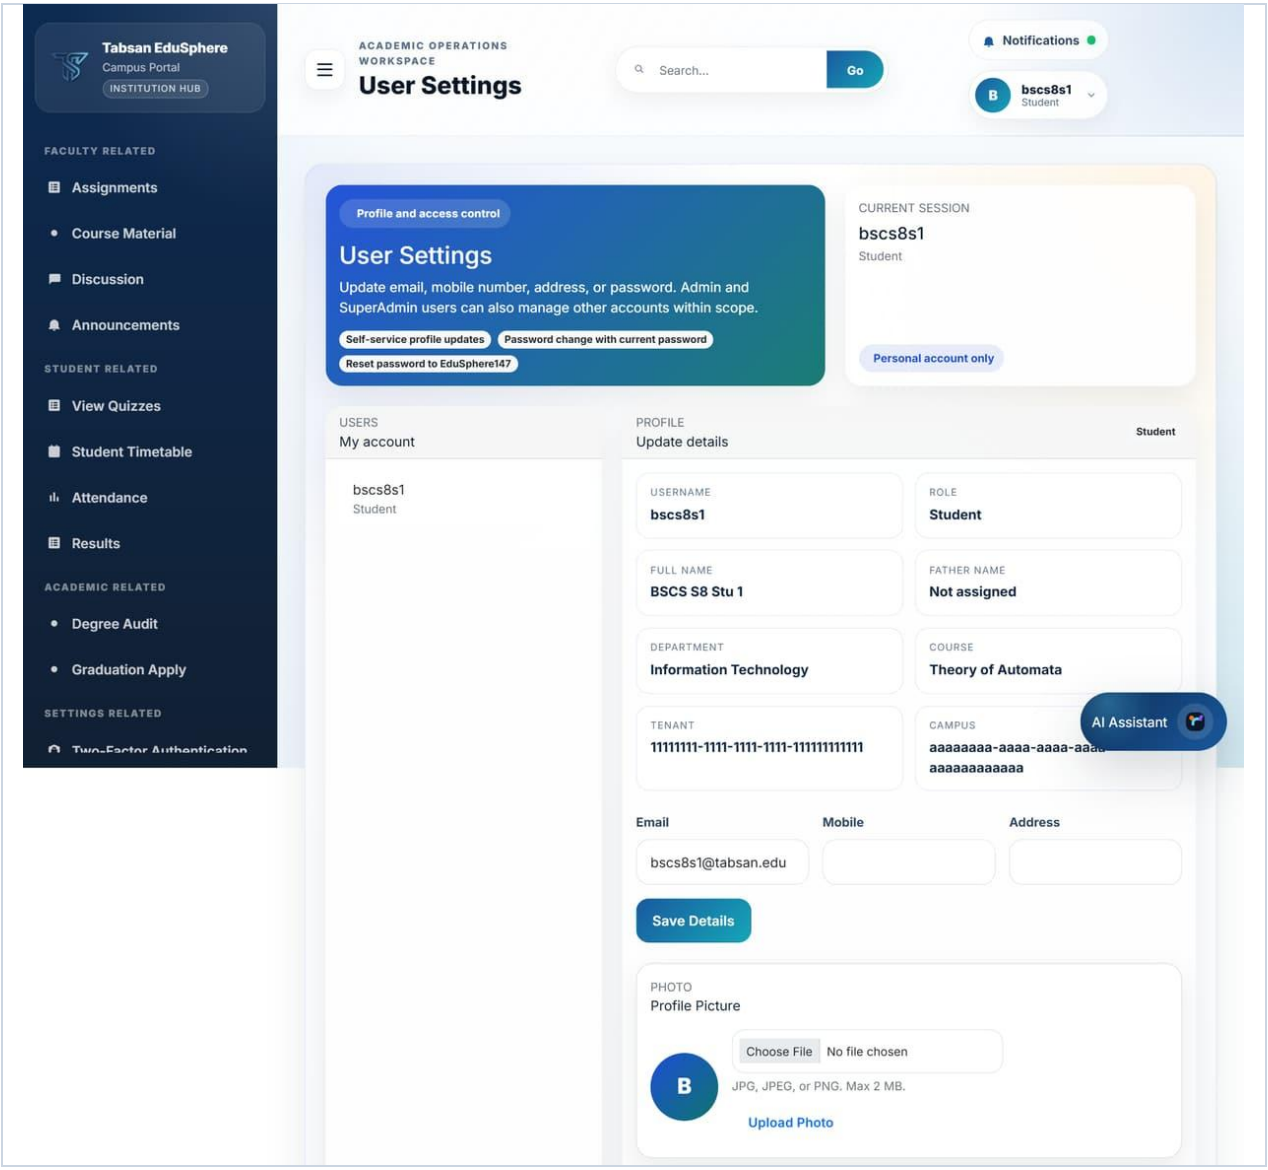

Figure 12.3 *User Settings (Student view)*

© 2026 Tabsan Nexora. All rights reserved.

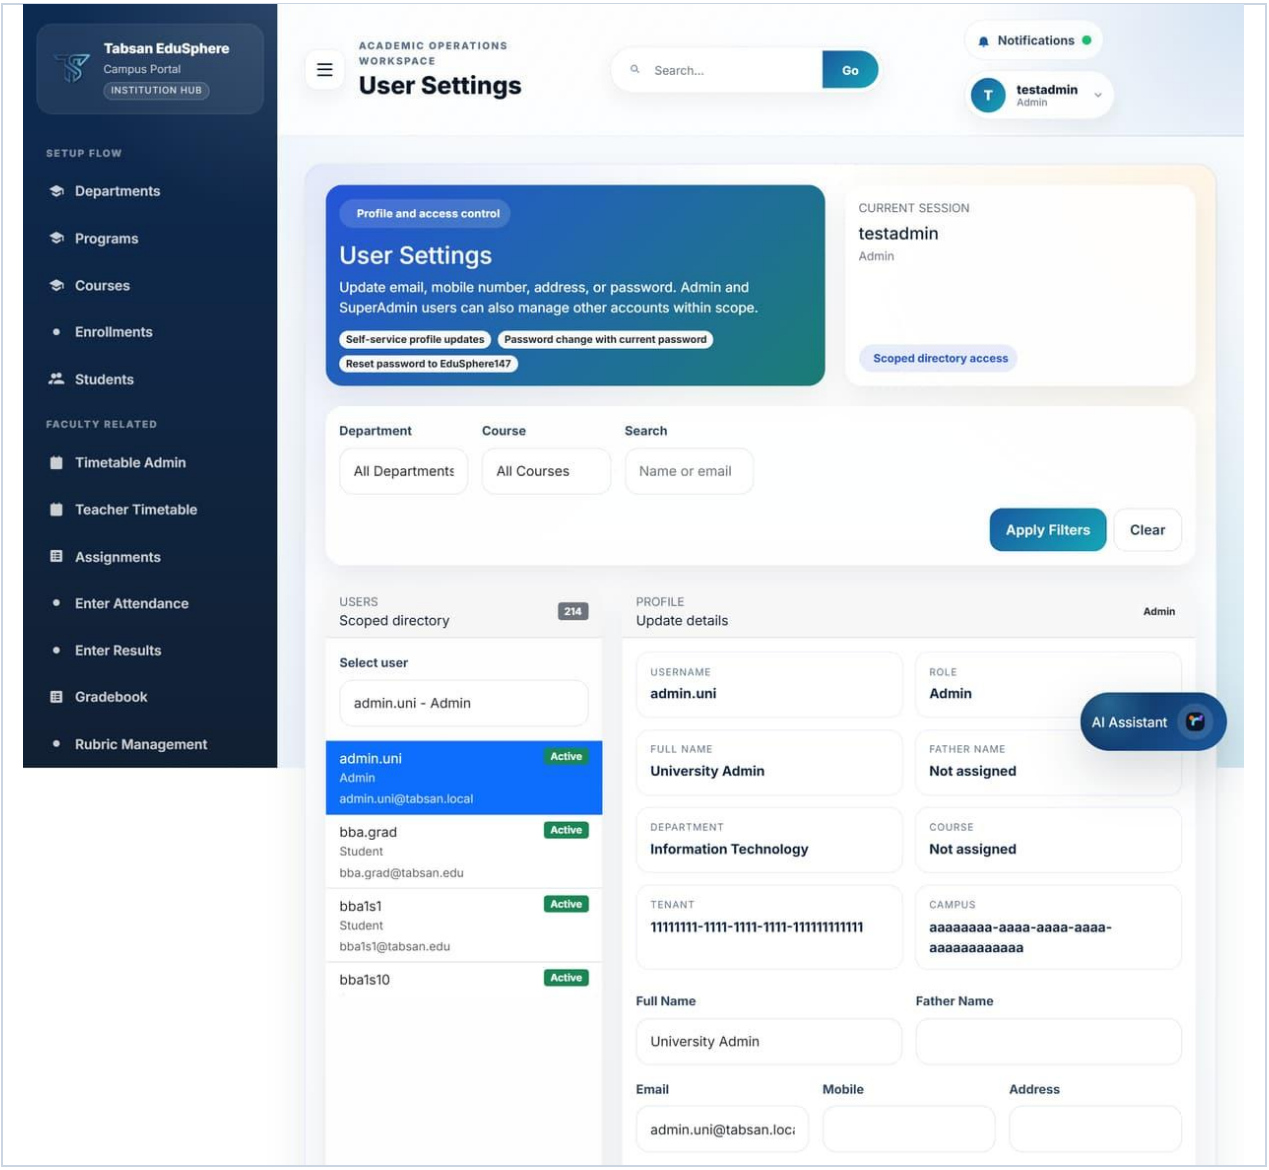

Figure 12.4 *User Settings with the user directory (Admin view)*

Good to know

- A new password must be at least 8 characters and different from your current one.
- Admins: after **Reset Password**, tell the user their temporary password; they must change it at their next sign-in.

12.3 Two-Factor Authentication

Available to: SuperAdmin, Admin, Faculty, Student, Finance

Two-factor authentication (2FA) protects your account even if someone learns your password. After you enable it, signing in needs both your password and a 6-digit code from an authenticator app on your phone, such as Microsoft Authenticator, Google Authenticator or Authy. The code changes every 30 seconds.

Before you start

- Install an authenticator app on your phone.

© 2026 Tabsan Nexora. All rights reserved.

Procedure

1. Open **Two-Factor Authentication** from the profile menu.
2. Click **Start 2FA Setup**. A QR code and a manual key appear.
3. In your authenticator app, add an account and scan the QR code (or type the manual key).
4. Enter the 6-digit code shown in the app to verify and enable 2FA.
5. Write down the recovery codes shown and keep them somewhere safe. Each can be used once instead of a code if you lose your phone.
6. To turn 2FA off later, return to this page, enter a current code and disable it. The old secret is deleted, so setting it up again needs a new QR code.

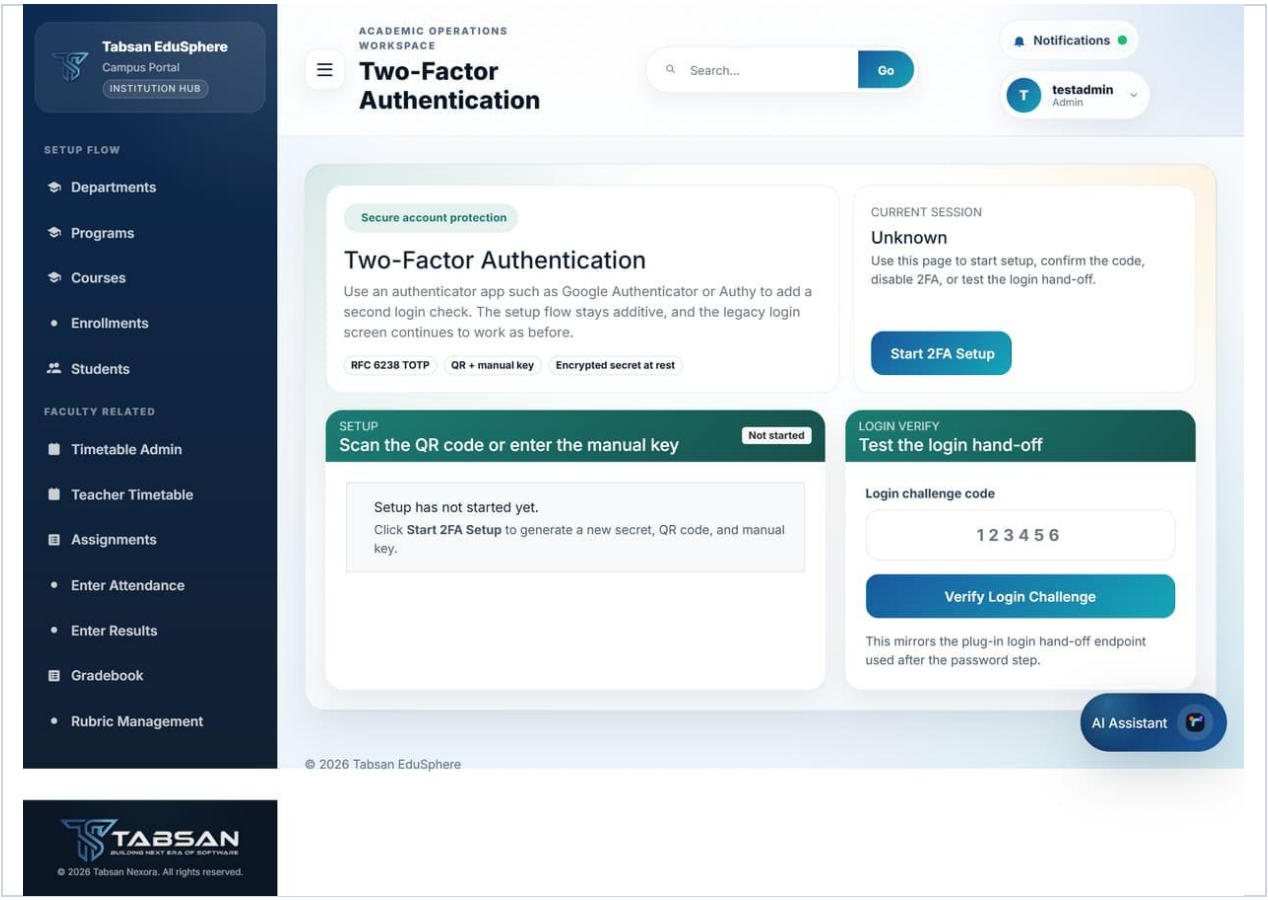

Figure 12.5 *Two-Factor Authentication*

> **IMPORTANT** If you lose your phone and your recovery codes, an administrator must reset two-factor authentication for you.

12.4 Notifications

Available to: SuperAdmin, Admin, Faculty, Student, Finance

© 2026 Tabsan Nexora. All rights reserved.

The notification inbox collects messages from the portal, such as new announcements, published results, graduation decisions and replies to your helpdesk tickets. A green dot on the **Notifications** button means you have unread items.

Click a notification to mark it as read, or click **Mark All Read** to clear the indicator.

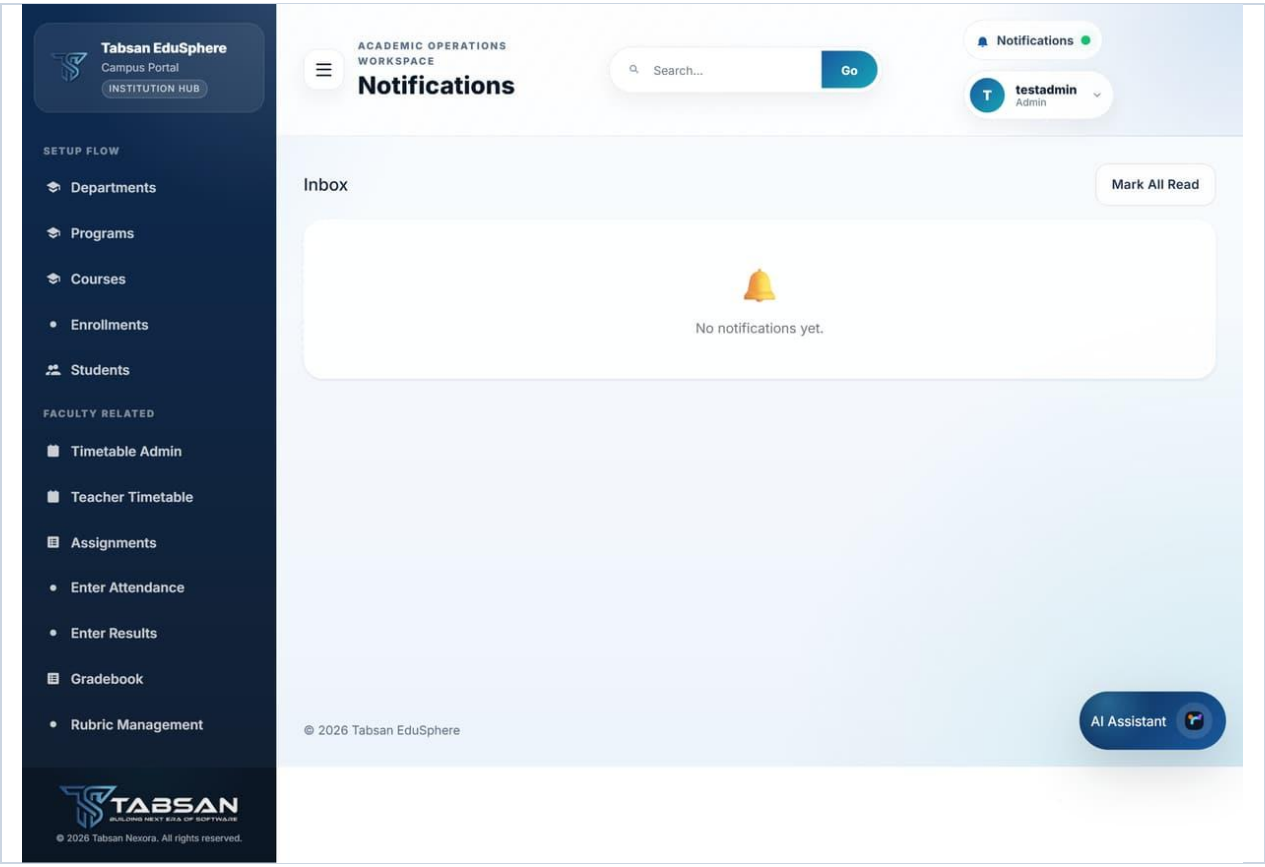

Figure 12.6 *Notifications inbox*

12.5 Helpdesk

Available to: SuperAdmin, Admin, Faculty, Student, Finance

Helpdesk is the place to ask the institution for help, for example about a timetable clash, a missing mark or a sign-in problem. Each request is a ticket that staff answer and track until it is resolved. All messages in a ticket are kept together.

Procedure

1. Open **Helpdesk**. Use the status tabs (All, Open, InProgress, Resolved, Closed) to filter your tickets.
2. Click **New Ticket**.
3. Choose the **Department** (optional) and **Category**, enter a short **Subject** and the **Details**, and click **Submit Ticket**.
4. Open a ticket with **View** to read replies and respond.

© 2026 Tabsan Nexora. All rights reserved.

Fields and options

Field	What to enter or choose
Category	Academic (courses, marks, timetables), Technical (sign-in or portal problems) or Administrative (fees, documents, records).
Subject	A one-line summary, for example "CS201 midterm mark missing".
Details	Include what you were doing, what you expected and what happened. Screenshots help.

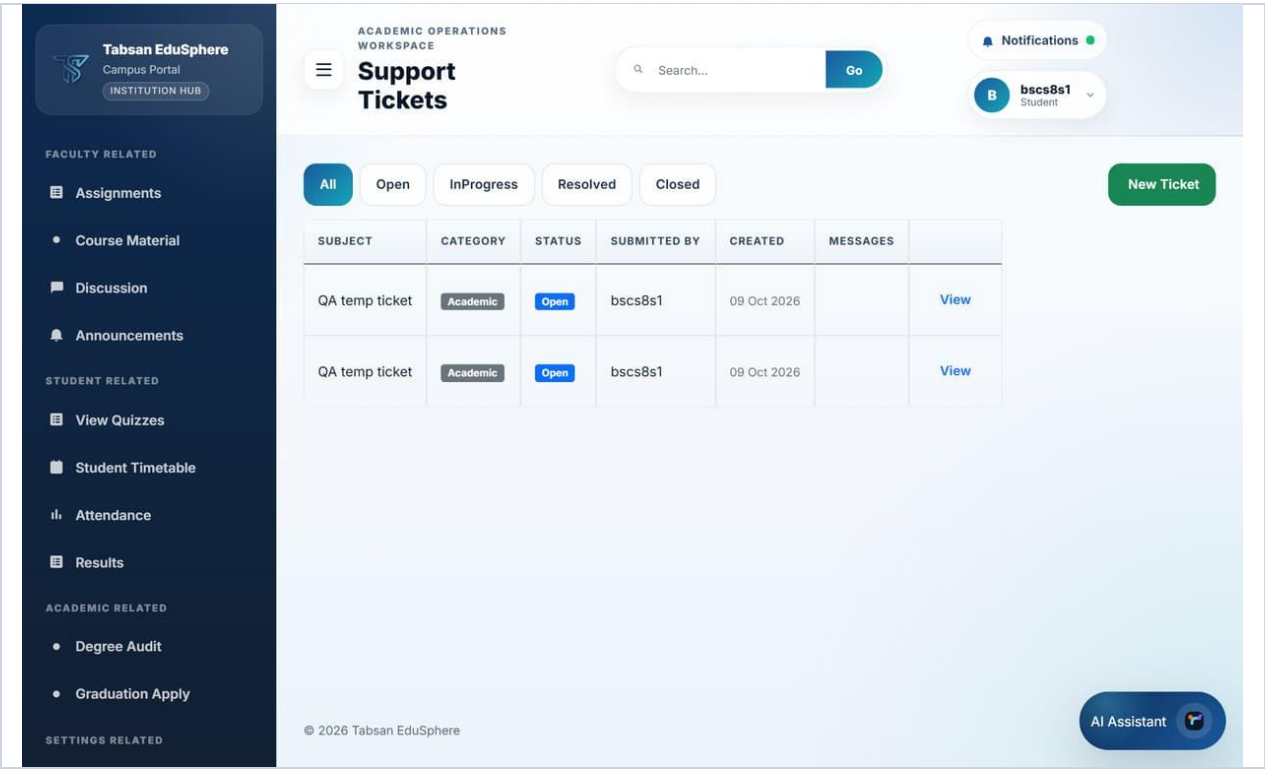

Figure 12.7 *Helpdesk ticket queue*

© 2026 Tabsan Nexora. All rights reserved.

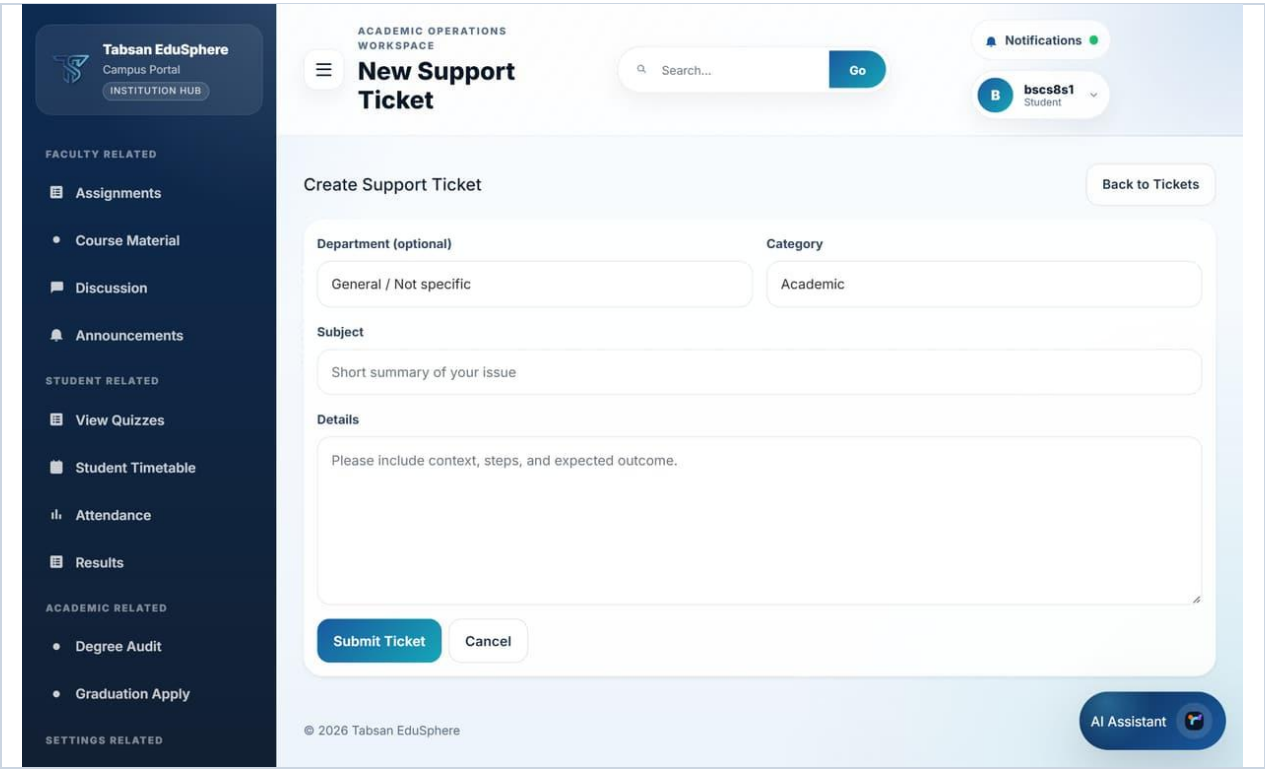

Figure 12.8 *New Support Ticket form*

Ticket statuses

Status	Meaning
Open	New; waiting for staff.
In Progress	A staff member is working on it.
Resolved	Staff believe the issue is fixed. Reply if it is not.
Closed	Finished. Open a new ticket for a new issue.

12.6 Theme Settings

Available to: SuperAdmin, Admin, Faculty, Student, Finance

Theme Settings changes the colours of the portal for your own account, for example a dark theme for evening use. Click a theme to preview it on the page, then click **Save Theme**. **Reset Preview** returns to your saved theme, and you can go back to **Default** at any time.

Every theme keeps text readable. The dark themes (Midnight Dark, Deep Navy, Graphite Pro and Slate Grey) switch pages, tables, forms, menus and pop-ups to dark backgrounds with light text, and the coloured themes keep dark text on light backgrounds.

© 2026 Tabsan Nexora. All rights reserved.

13 SuperAdmin Administration

The pages in this chapter are available only to SuperAdmin users. They control the whole installation, so changes here affect every user.

13.1 Dashboard

Available to: SuperAdmin

The SuperAdmin Dashboard explains the workspace modes and holds the API connection settings (API Base URL, access token and default department). These settings connect the portal to its back-end service. Change them only on instruction from your technical team.

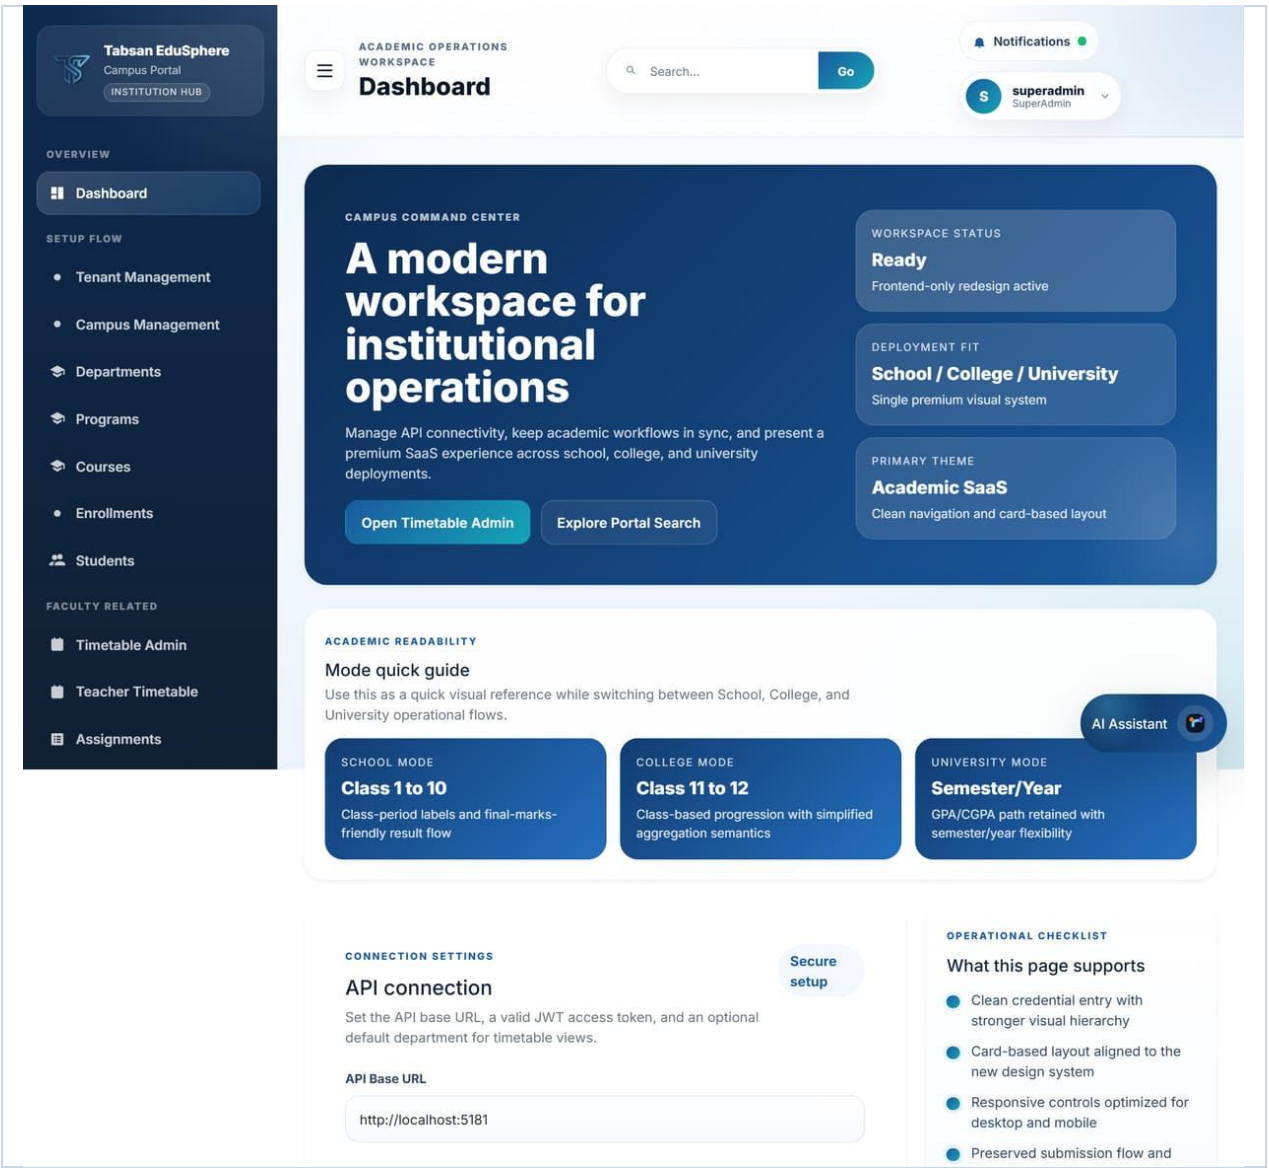

Figure 13.1 *SuperAdmin Dashboard*

13.2 Tenant and Campus Management

Available to: SuperAdmin

© 2026 Tabsan Nexora. All rights reserved.

A tenant is a separate institution in the installation, for example the University, the College and the School, each with its own users and data. Each tenant has one or more campuses.

Procedure

1. In **Tenant Management**, enter a **Code** and **Name** and click **Create Tenant**.
2. Click **Manage Campuses**, choose the tenant, enter the campus **Code** and **Name**, and click **Create**.
3. Use **Save** to rename, and **Deactivate** for tenants or campuses no longer in use. Deactivated items are hidden from all filters.

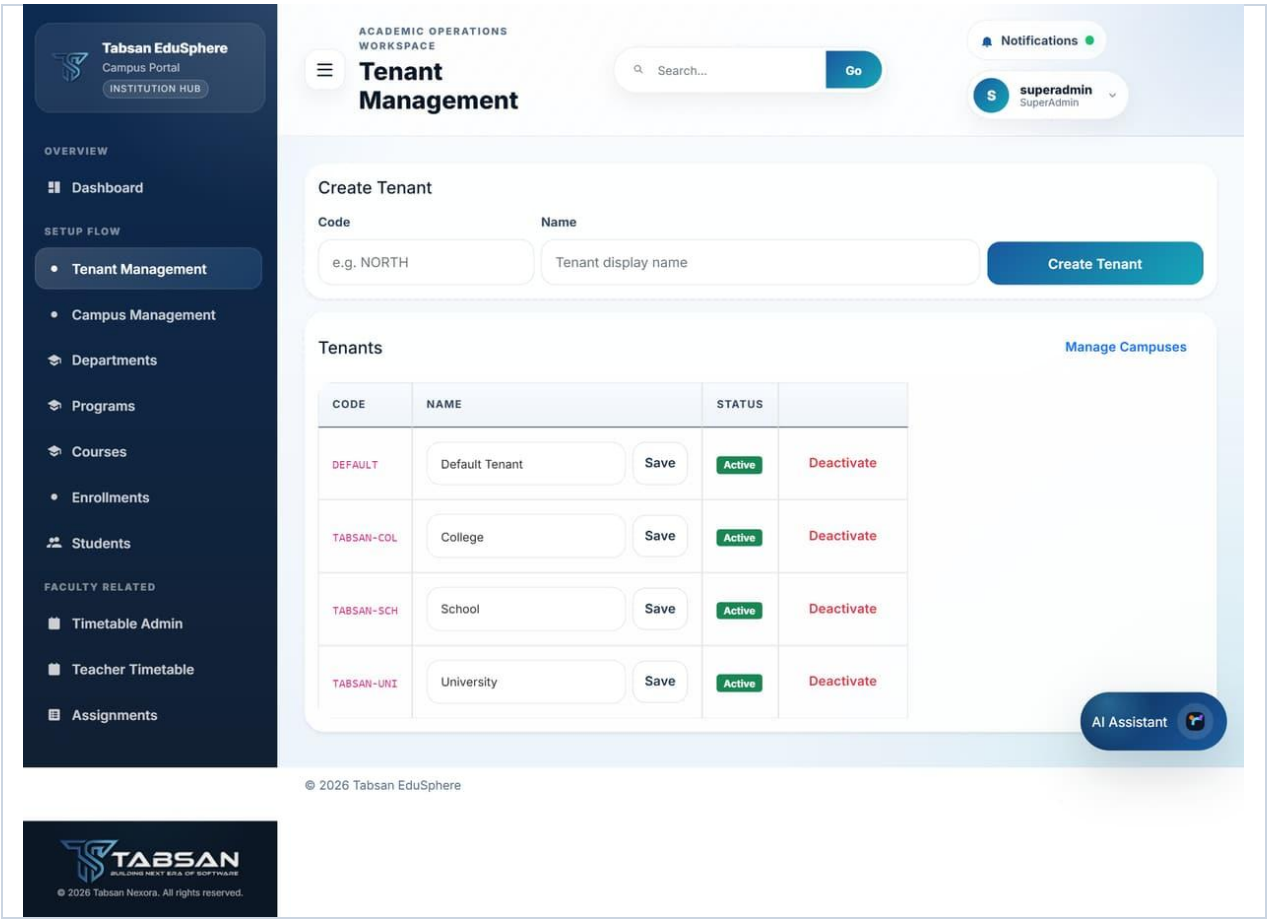

Figure 13.2 *Tenant Management*

© 2026 Tabsan Nexora. All rights reserved.

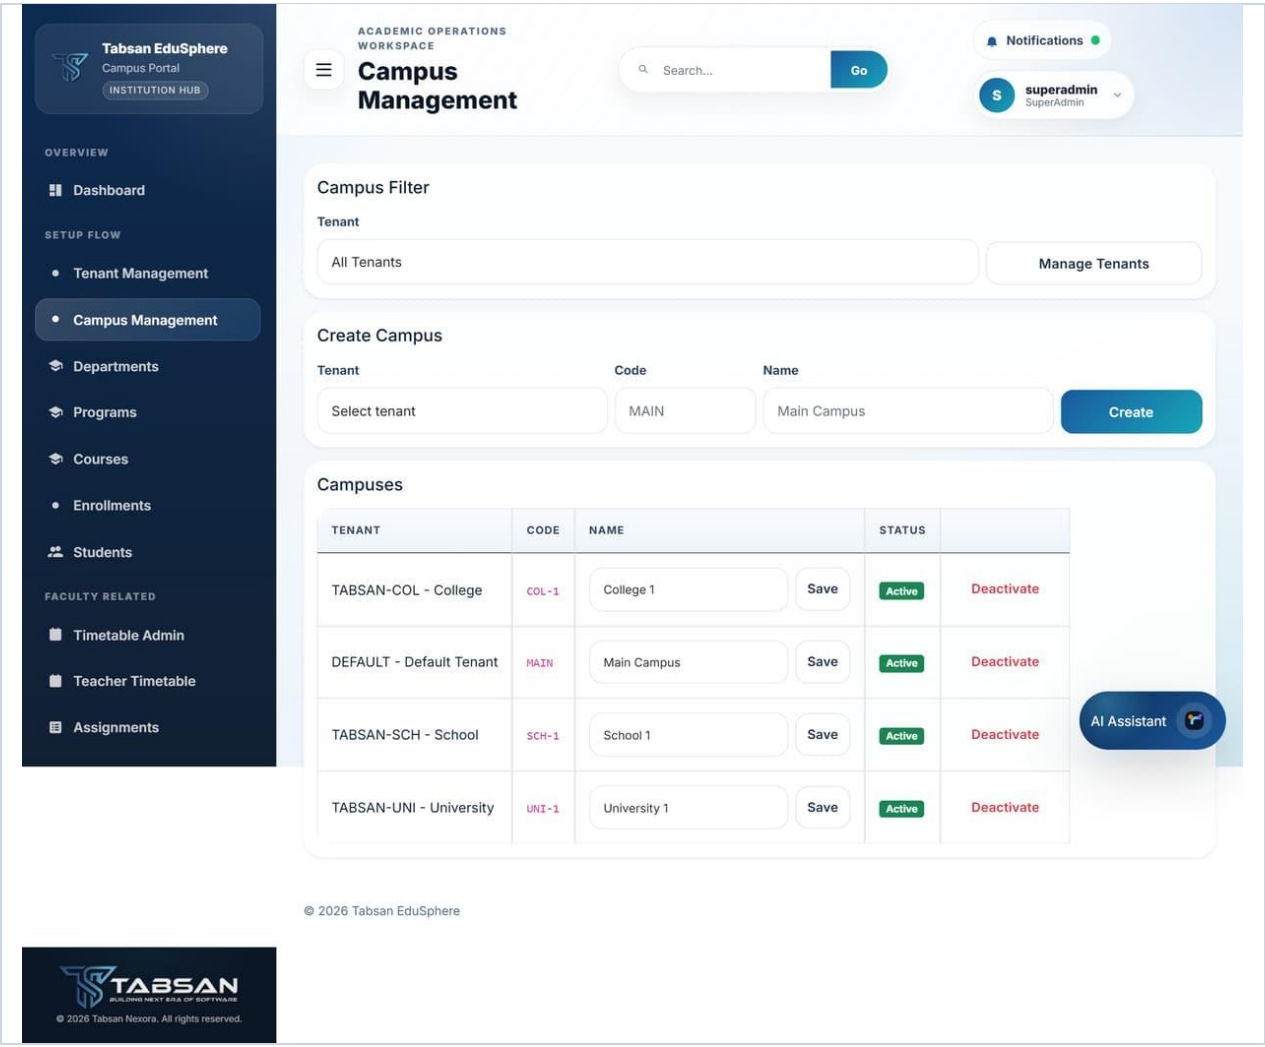

Figure 13.3 *Campus Management*

13.3 Admin Users

Available to: SuperAdmin

Admin Users creates Admin accounts and decides which departments each Admin manages. An Admin sees and manages only the departments assigned to them.

Procedure

1. Enter the **Username**, **Email** and a **Temporary Password**, and optionally an **Institution Type**.
2. Tick the **Initial Department Assignments** (use **Select All** or **Clear** to speed this up) and click **Create Admin**.
3. To change an existing Admin, search for and select them, update their details and department assignments, and click **Save Changes**.

© 2026 Tabsan Nexora. All rights reserved.

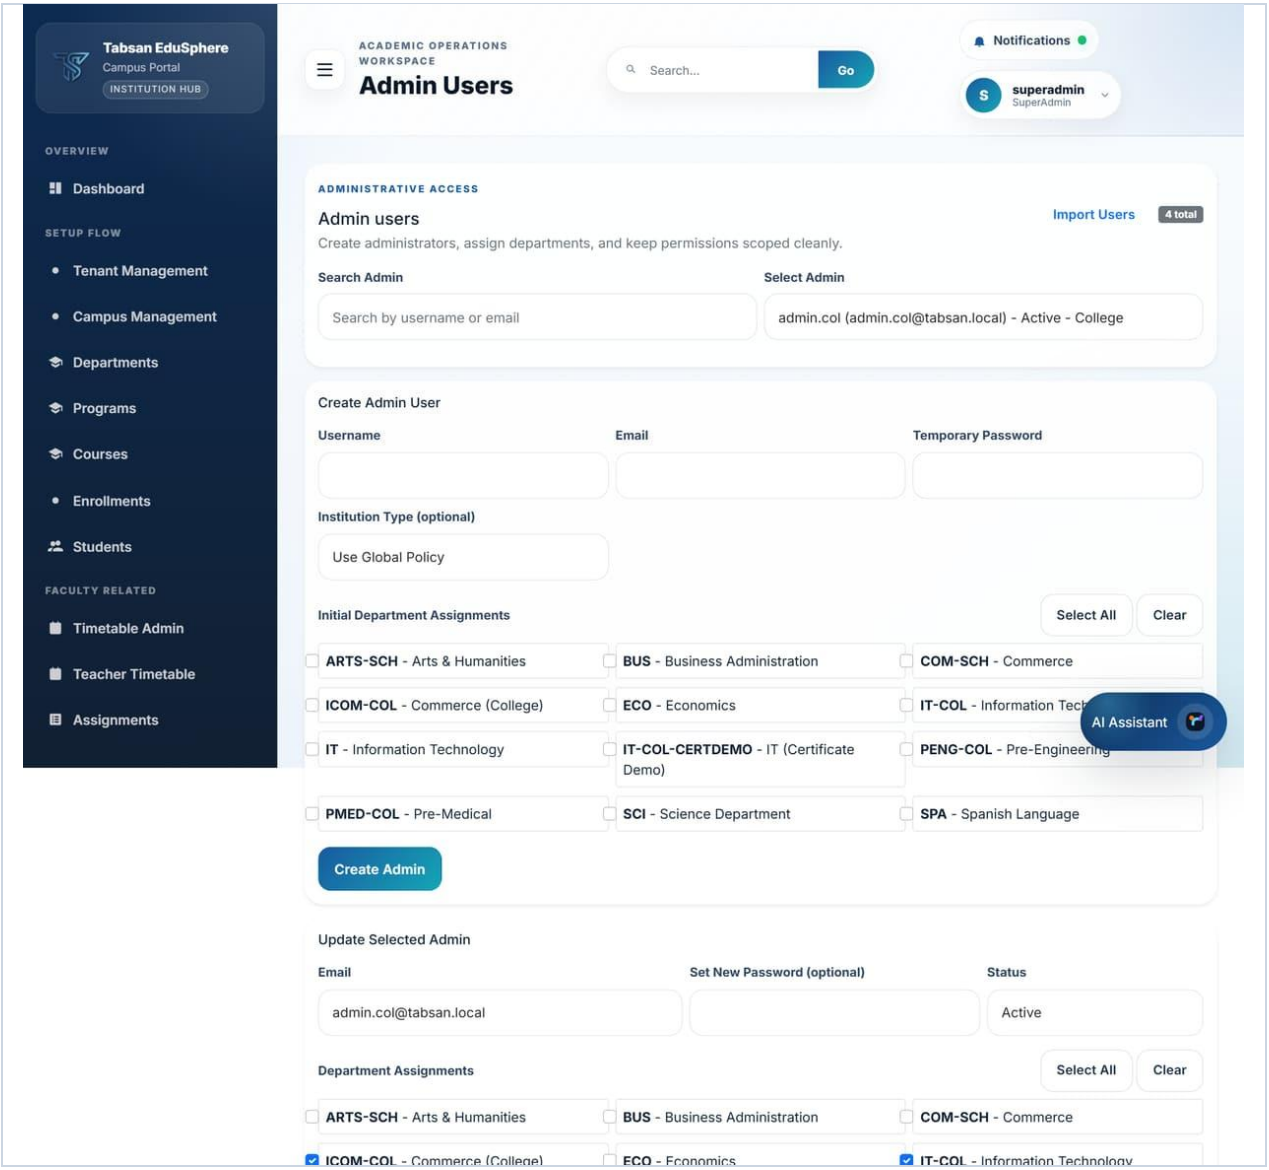

Figure 13.4 *Admin Users*

13.4 Module Composition

Available to: SuperAdmin

Module Composition shows the module registry (17 modules, such as Attendance, Results, Reports and FYP), whether each is active, whether your role can use it, and the dashboard widgets for your role. Deactivate a module to hide its features for everyone. Modules allowed by the license are activated automatically when the license is uploaded.

© 2026 Tabsan Nexora. All rights reserved.

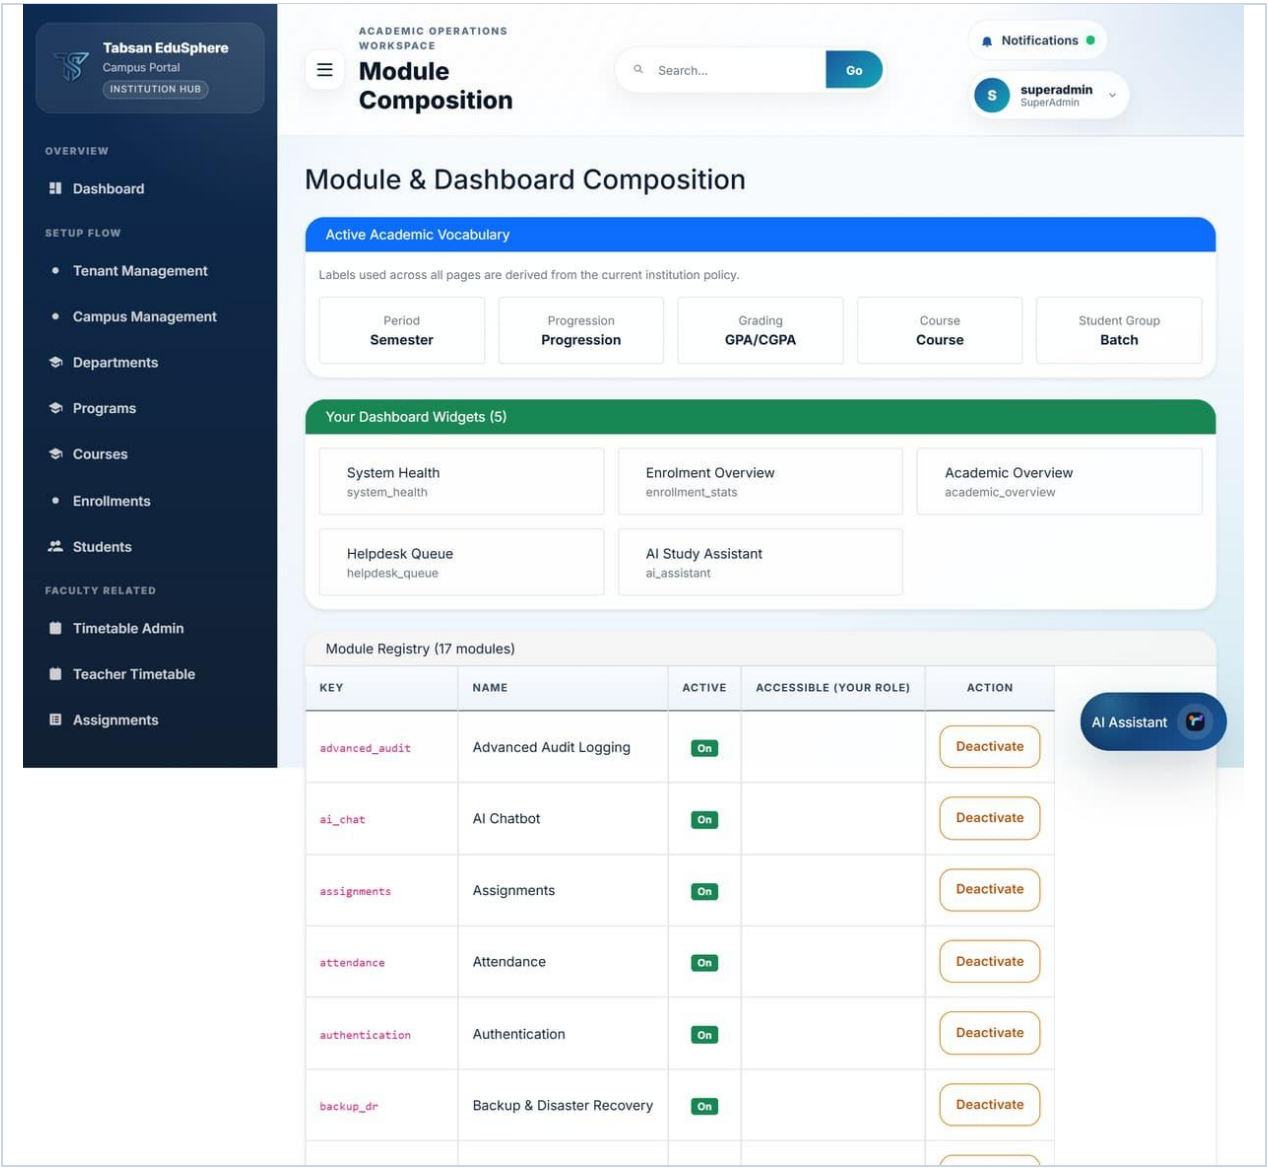

Figure 13.5 *Module Composition*

13.5 Sidebar Settings

Available to: SuperAdmin

Sidebar Settings controls which menu items Admin, Faculty and Student users see. Each row is a menu with its purpose and a switch for each role. SuperAdmin always keeps full access, and menus marked System cannot be switched off. Appendix A shows the default settings.

© 2026 Tabsan Nexora. All rights reserved.

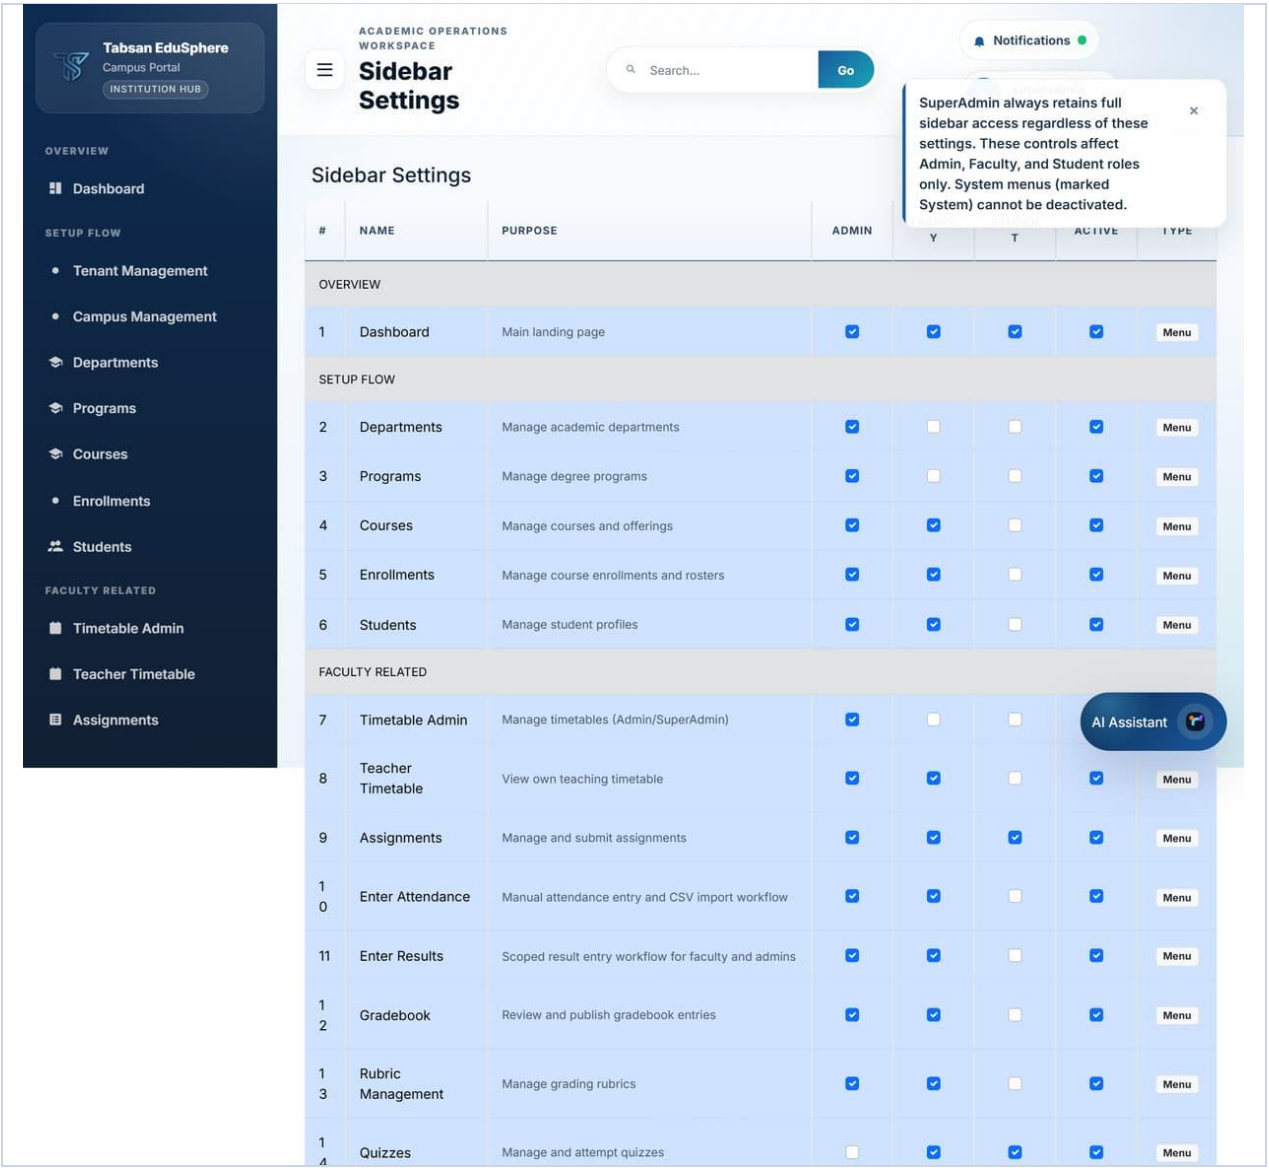

Figure 13.6 *Sidebar Settings*

13.6 Report Settings

Available to: SuperAdmin

Report Settings lists the report definitions (nine by default). Here you can create a new definition, switch a report on or off, and choose which roles may run it. Report Center then shows each user only the reports allowed for their role.

© 2026 Tabsan Nexora. All rights reserved.

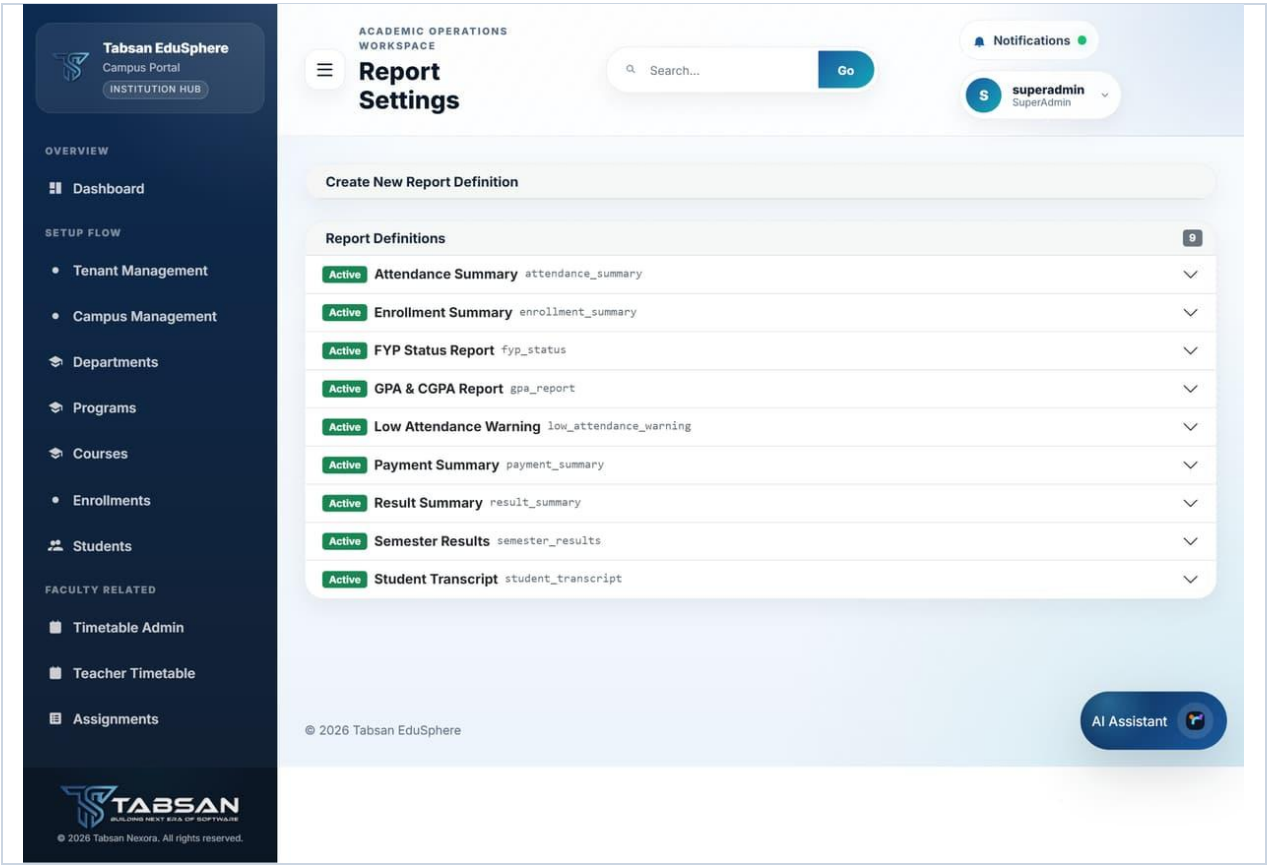

Figure 13.7 *Report Settings*

13.7 Dashboard Settings (Branding)

Available to: SuperAdmin

Dashboard Settings controls how the portal presents your institution.

Procedure

1. Update the fields you want to change.
2. Click **Save Branding**. The changes apply to all users at their next page load.

Fields and options

Field	What to enter or choose
University / Institution Name	Shown in the sidebar and on generated documents.
Portal Subtitle	The line under the name, for example "Campus Portal".
Footer Text	Text shown at the bottom of every page.
Portal Logo	Upload your institution's logo (shown in the sidebar). If none is uploaded, the Tabsan emblem is used.
Privacy Policy URL / Text	A link to, or the text of, your privacy policy.
Font Family / Font Size	The portal's main font and base text size.

© 2026 Tabsan Nexora. All rights reserved.

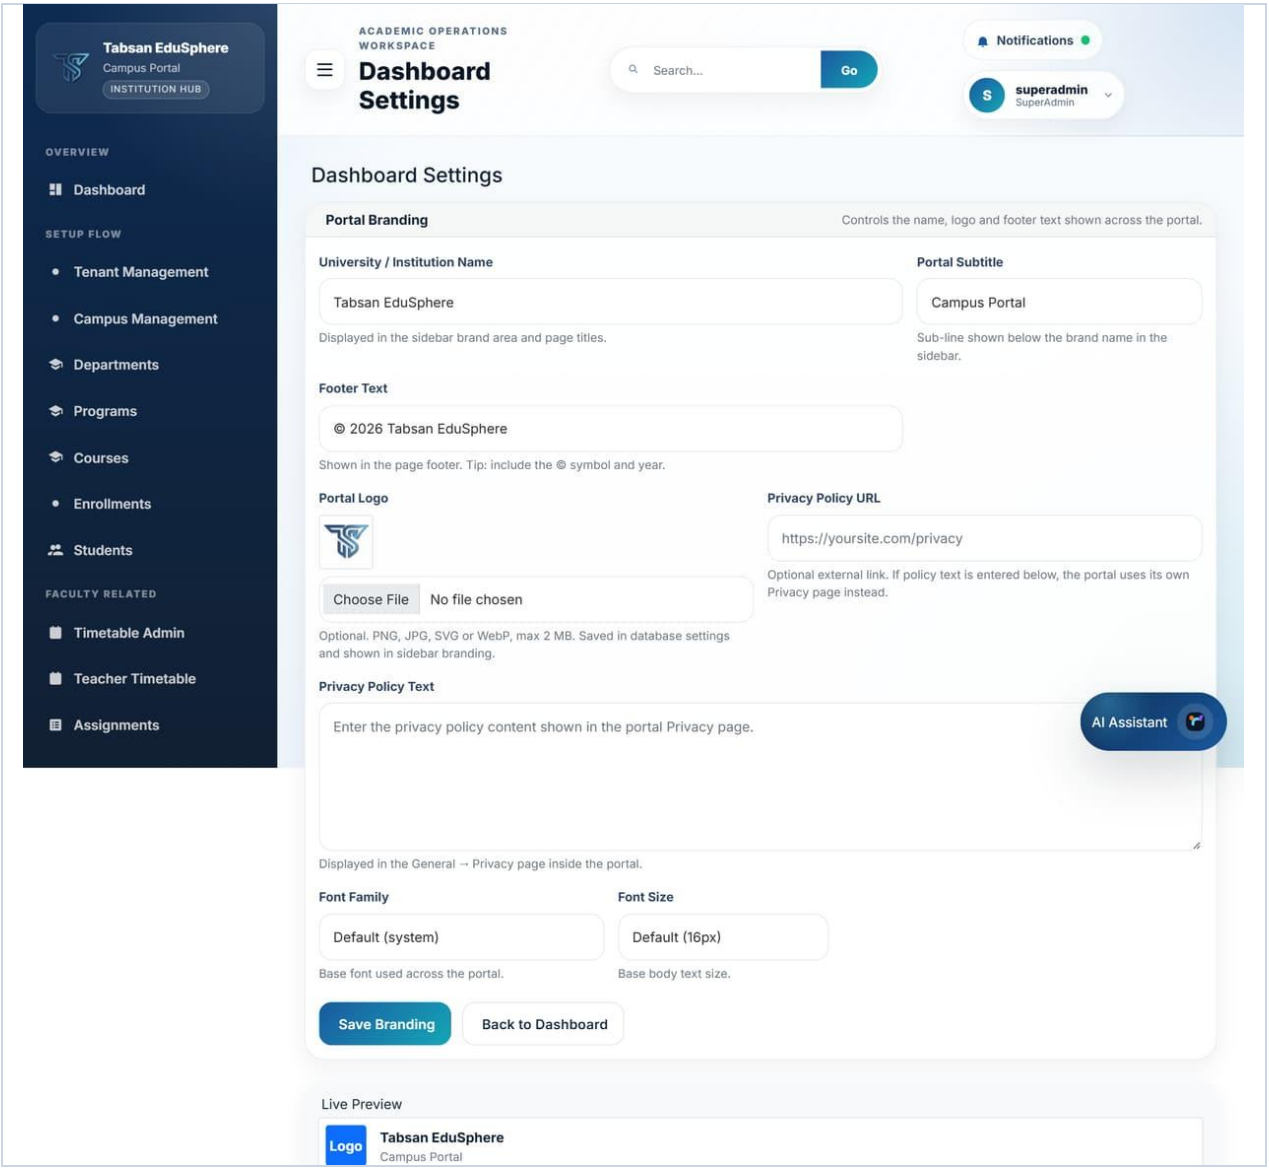

Figure 13.8 *Dashboard Settings – portal branding*

13.8 Institution Policy

Available to: SuperAdmin

Institution Policy switches the University, School and College institution types on or off for the installation, within what the license allows. Switching a type off hides its departments, menus and reports. Tick the types in use and click **Save Policy**.

© 2026 Tabsan Nexora. All rights reserved.

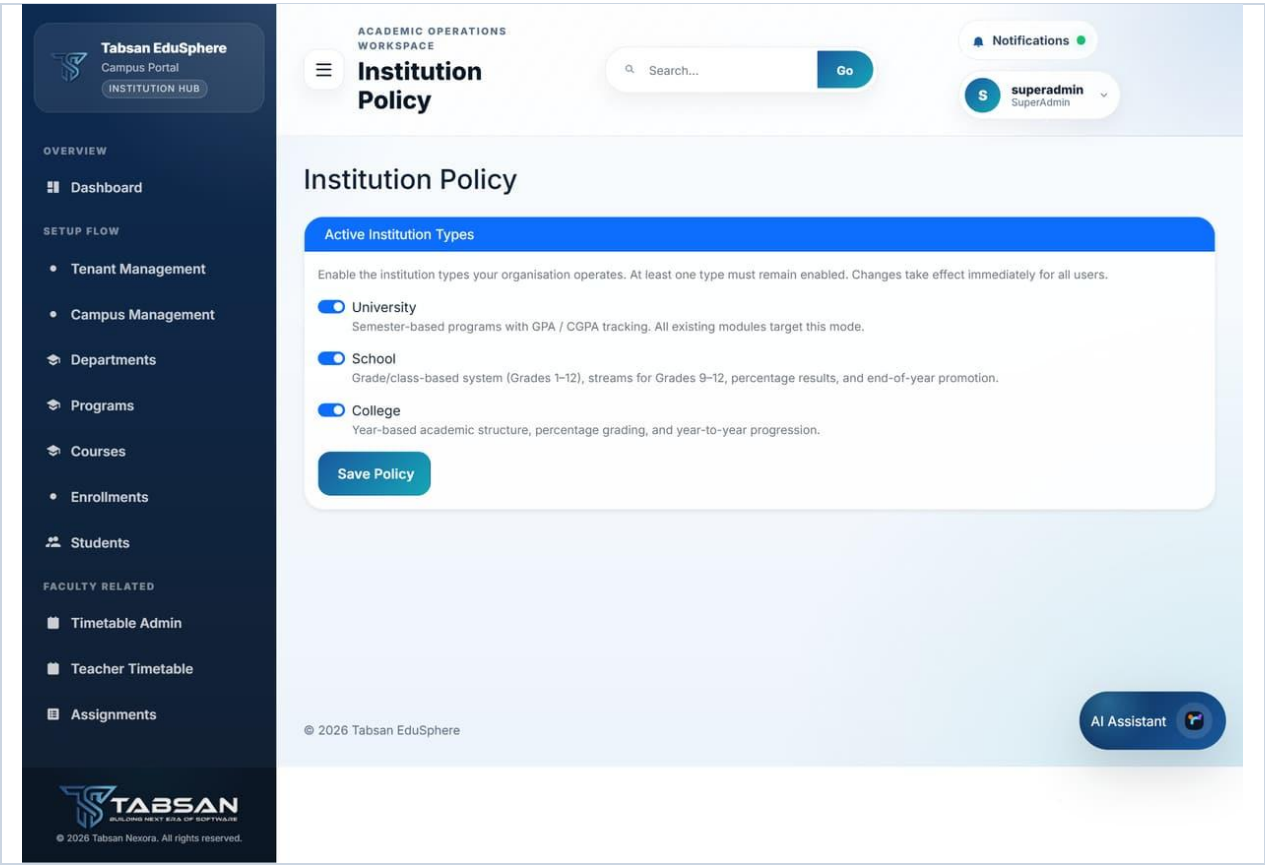

Figure 13.9 *Institution Policy*

13.9 License Update

Available to: SuperAdmin

License Update shows the current product license (status, type, activation date and expiry date) and lets you upload a new or renewed license file supplied by Tabsan.

Procedure

1. Open **License Update**.
2. Under **Upload License File**, choose the .tablic file supplied by Tabsan.
3. Click **Upload & Activate**. The Current License table updates and the license status shows Active.

© 2026 Tabsan Nexora. All rights reserved.

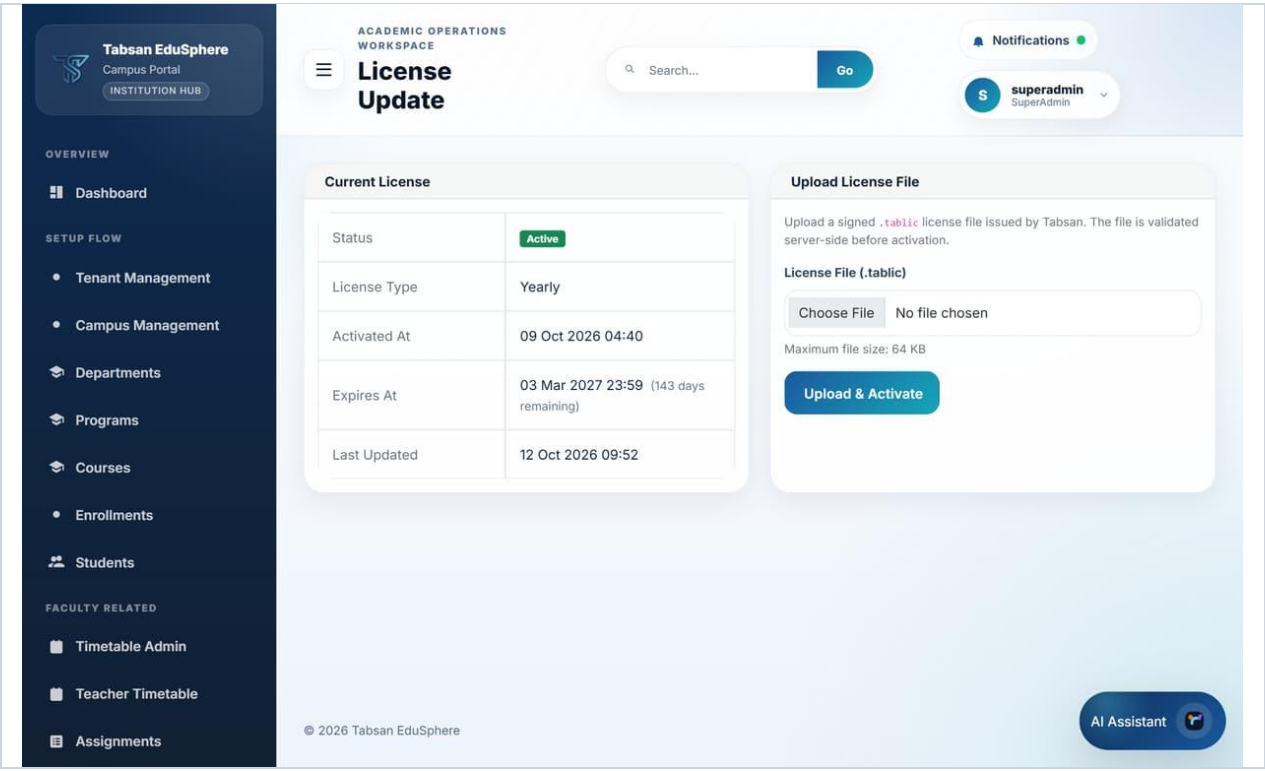

Figure 13.10 *License Update*

License statuses

Status	Meaning
Active	The license is valid; the portal works normally.
Expired	The expiry date has passed; the portal is read-only until a new license is uploaded.
Invalid	No license, or the stored license failed its security checks; the portal is read-only.

> **IMPORTANT** License files are encrypted and digitally signed. A file that has been edited in any way is rejected. The expiry date is fixed inside the file and is the same on every server it is activated on. Each license file can be activated only once.

13.10 Library Config

Available to: SuperAdmin

Library Config connects the portal to an external library system so users can search the catalogue and see loans. Enter the **Catalogue URL**, **Loan API URL** and **API Token** supplied by the library system, then click **Save Configuration**.

© 2026 Tabsan Nexora. All rights reserved.

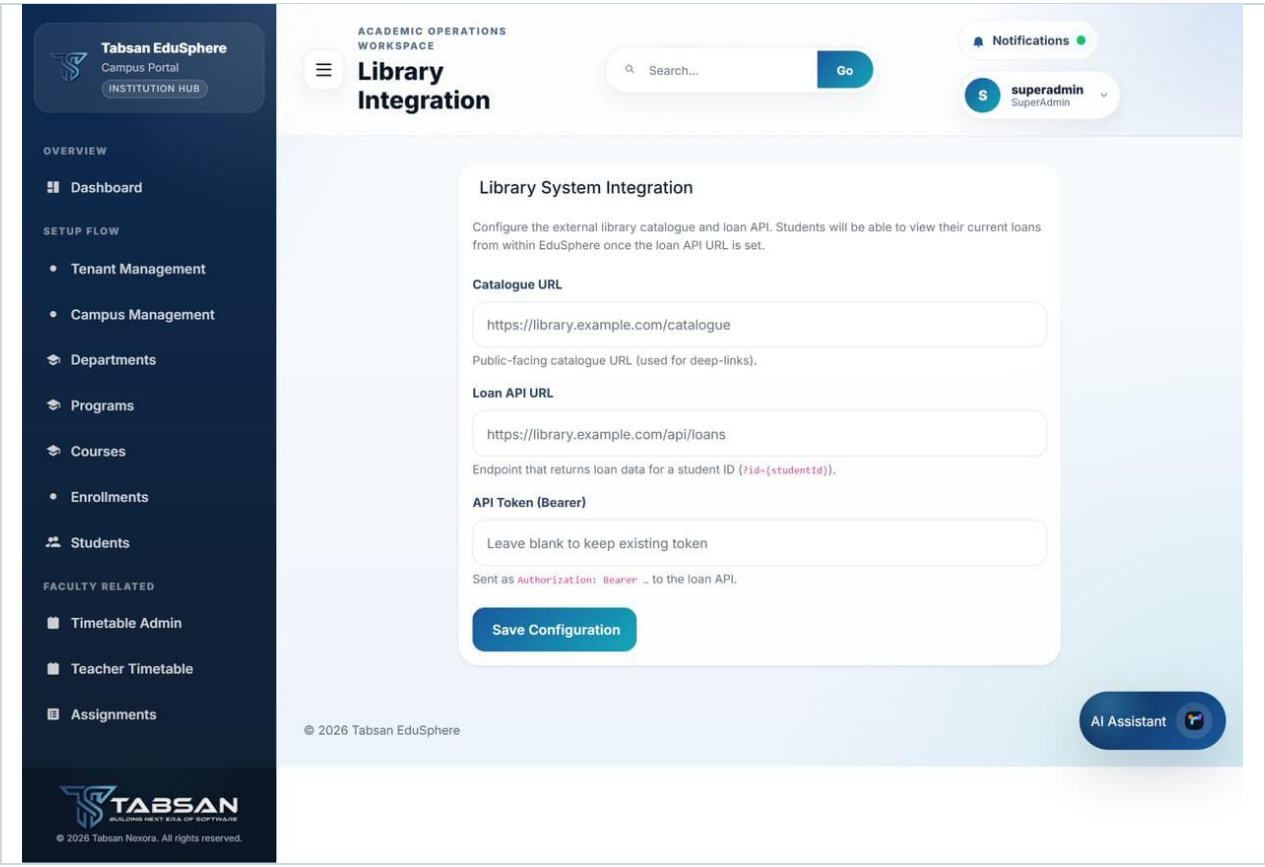

Figure 13.11 *Library Config*

13.11 Accreditation

Available to: SuperAdmin

Accreditation helps prepare documents for accreditation bodies. Download the simple template, complete it with your institution's information, and upload it back to keep it with your records.

© 2026 Tabsan Nexora. All rights reserved.

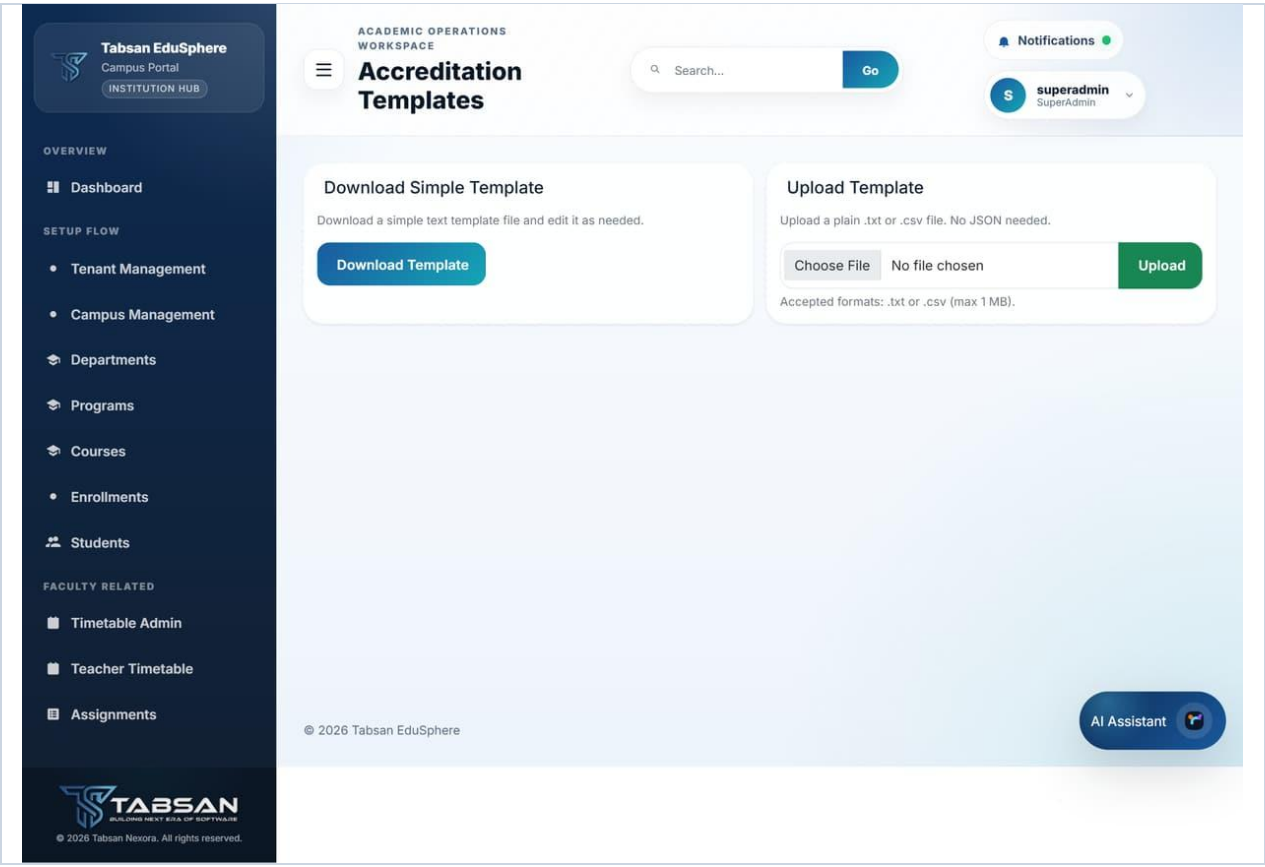

Figure 13.12 *Accreditation templates*

13.12 Advanced Audit

Available to: SuperAdmin

The audit log records who did what and when, including sign-ins, changes to records and settings, with the before and after values. Use it to investigate a problem or to answer compliance questions.

Procedure

1. Filter by any combination of **Search** text, **Actor User Id**, **Action**, **Module (Entity)** and a **From**/**To** date range (UTC), choose how many **Rows** to show, and click **Apply Filters**.
2. Use **Previous** and **Next** to page through the results. Your filters are kept.
3. Click **Export CSV**, **Export Excel** or **Export PDF** to download the filtered log.

14 Troubleshooting and FAQ

14.1 Signing in and accounts

Problem	What to do
I cannot sign in.	Check the username and that Caps Lock is off. If you have forgotten your password, ask an Admin to reset it from User Settings.
I am asked to change my password.	This happens at first sign-in and when your password expires (every 90 days by default). Choose a new password of at least 8 characters.
I was signed out unexpectedly.	Sessions end after a period of inactivity. Sign in again; save your work regularly on long forms.
I lost my authenticator device.	Use one of your recovery codes to sign in, or ask an administrator to reset two-factor authentication.
A new student cannot see their courses.	Check that the student was created with a Program (so a student profile exists) and has been enrolled in the term's offerings.

14.2 Pages and data

Problem	What to do
I was returned to the Helpdesk with a message.	The page is not available to your role. The message explains why. Ask your administrator if you need access.
A list is empty.	Check the filters at the top of the page. Most pages need a department, course or offering selected first.
Save buttons return "read-only mode".	The license is missing or expired. A SuperAdmin must upload a valid license in License Update.
A student cannot enrol in a course.	The enrollment summary on the Enrollments page gives the reason for each student: an unmet prerequisite, a timetable clash, a closed course or semester, or a student from another institute. A full course puts the student on the waitlist instead.
Results are not visible to students.	Results appear only after the teacher clicks Publish All in Enter Results.
A student cannot apply for graduation.	Only active University students in their final semester with a completed FYP can apply. Check Degree Audit for unmet requirements.
Degree Audit says no degree rule is configured.	A SuperAdmin must create a degree rule for the student's program in Degree Rules.
A report has no export buttons.	Choose all required filters and click Filter first; some reports need a semester or a student.
Exported files do not open.	Make sure the download finished. CSV files open in Excel; PDF files need a PDF reader.

© 2026 Tabsan Nexora. All rights reserved.

14.3 Getting more help

If your question is not answered here, raise a ticket in **Helpdesk** with the Technical category, describing what you were doing and what you saw. Include the page name and, if possible, a screenshot. Your administrator can also check the audit log to see exactly what happened.

© 2026 Tabsan Nexora. All rights reserved.

Appendix A Menu Access by Role

The table lists every sidebar menu and the roles that see it with the default settings. SuperAdmin can change Admin, Faculty and Student visibility in Sidebar Settings. Admin access was captured with the testadmin account.

Appendix B Glossary

Term	Meaning
CGPA	Cumulative Grade Point Average across all completed semesters.
Course offering	A course taught in a specific semester or class, usually by one faculty member. Students enrol in offerings.
Degree rule	The credit and GPA requirements a University program must meet before a student can graduate.
FYP	Final Year Project – the capstone project of a University program.
Institution type	University, College or School. Departments, grading and progression follow the institution type.
Level	A semester (University) or class (School and College) within a program.
License (.tablic)	The encrypted, signed file that activates the portal and sets its expiry date.
Module	A feature area (for example Attendance or Reports) that SuperAdmin can activate or deactivate.
Prerequisite	A course a student must pass before enrolling in another course.
Read-only mode	The state in which the portal allows viewing but blocks changes, used when the license is not valid.
Tenant	A separate institution in the installation with its own campuses, departments, users and data.
Two-factor authentication (2FA)	A second sign-in step using a 6-digit code from an authenticator app.
